SELECTIVE ELIGIBILITY TEST (S.E.T.)
PRACTICE TEST 10

Mathematics
45 minutes

Instructions:

- This test contains 50 questions.
- For each question, choose the correct answer and then mark its letter on the answer sheet.

Your time will start when you turn over the page.

Q1. What is $14 + 2 \times 3 - 5$?

A 43
B 15
C 10
D −32
E 1

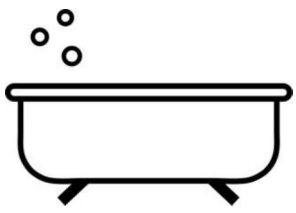

Q2. What is $4^3 \div 4^2$?

A 8
B 4
C 2
D 1
E 1.5

Q3. What is (1000 – 99) – (100 – 9)?

A 900
B 800
C 990
D 810
E 891

Q4. Which is the best estimate for the capacity of a bath tub?

A 80 litres
B 8 litres
C 800 ml
D 80 ml
E 8 ml

Q5. A school has 720 pupils, 5% of whom are not present at registration.
Of those pupils who are not present at registration, $\frac{1}{6}$ arrive late and sign in.
How many pupils sign in late?

A 9 pupils
B 12 pupils
C 4 pupils
D 6 pupils
E 8 pupils

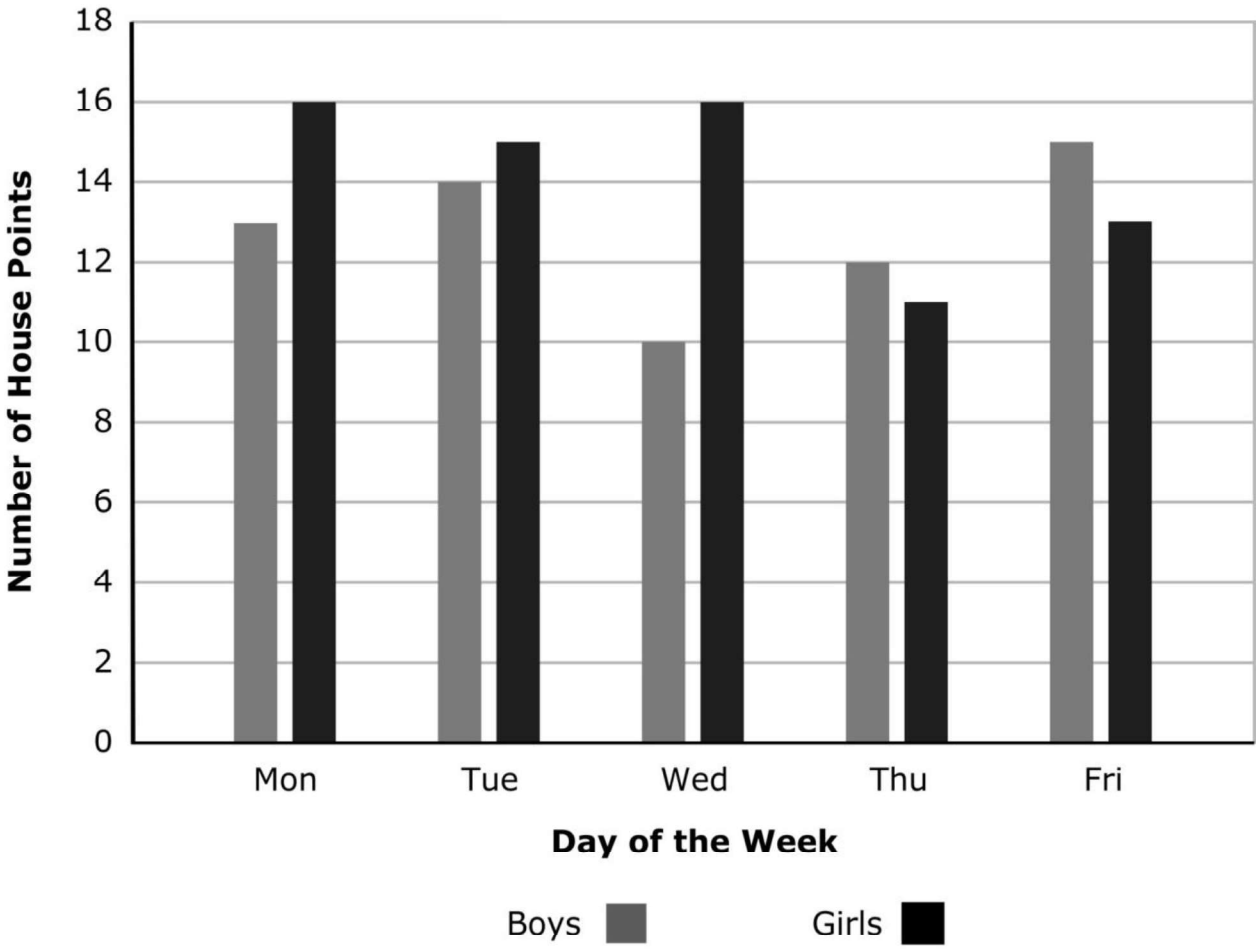

Q6. There are 25 pupils in class 3B.
As a class, they lose 3 pencils and break 2 pencils every school day.
In addition to this, the teacher estimates that each week 10 pencils are 'borrowed' by other classes and not returned.
With normal use, pencils get used up at a rate of 12 per week.
The teacher wants to ensure that each pupil in class 3B is equipped with 2 pencils at all times.
How many packs of 100 pencils should the teacher order for a 12-week term?

A 4 packs
B 5 packs
C 6 packs
D 7 packs
E 8 packs

Q7. In a school hall, 250 seats are set out for the audience of a play.
39 pupils are in the play.
How many seats can be offered to each member of the cast for their friends and family and how many seats will be left over?

A 5 seats each and 14 left over
B 5 seats each and 32 left over
C 6 seats each and 24 left over
D 6 seats each and 16 left over
E 7 seats each and 3 left over

Q8. The graph shows the number of house points awarded to girls and boys in class 4F during one week.

What is the range of the number of house points awarded to class 4F daily?

A 3
B 4
C 5
D 6
E 7

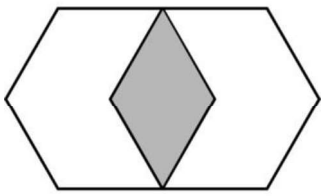

Q9. What is the area of a square that has a perimeter of 48 cm?

A $144\,cm^2$
B $121\,cm^2$
C $81\,cm^2$
D $64\,cm^2$
E $132\,cm^2$

Q10. What fraction of an hour is 8 minutes?

A $\frac{2}{15}$
B $\frac{1}{12}$
C $\frac{1}{8}$
D $\frac{1}{4}$
E $\frac{1}{6}$

Q11. The shape below is formed from two identical hexagons.

What fraction of the shape is shaded?

A $\frac{1}{5}$
B $\frac{3}{8}$
C $\frac{1}{6}$
D $\frac{1}{3}$
E $\frac{1}{4}$

Q12. When a car number plate is made, it costs £6 for every straight line and £8 for every curved line.
For example, the letter P costs £14, as it is formed from one straight line and one curved line.

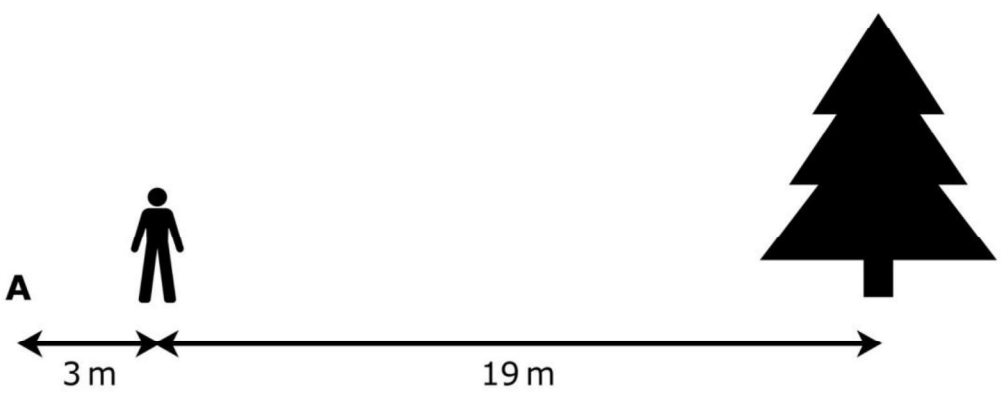

Which of the following personalised number plates will be the most expensive to make?

A HL7 D
B ROZ 4A
C KF L2H
D NBC 4K
E MWA 5

Q13. In a talent contest, the total number of singing, dance and magic acts is 81 in a ratio of 3 : 2 : 4.
How many dance acts are there?

A 20
B 40
C 36
D 18
E 27

Q14. A man is 19 m from a tall tree.

The sun casts a shadow of the man, which finishes at point A.
The shadow of the tree also finishes at A.
If the man is 1.5 m tall, how tall is the tree?

A 11 m
B 12 m
C 13 m
D 14 m
E 15 m

Q15. A log needs to be cut into 20 pieces.
It takes 4 minutes to saw right though the log each time.
How long will it take to complete the job?

A 1 hour 20 minutes
B 1 hour 16 minutes
C 1 hour 11 minutes
D 1 hour 6 minutes
E 1 hour

Q16. The table shows the height in metres of the six highest mountains.

Mountain	Height (m)
Mount Everest	8848
K2	8611
Kangchenjunga	8586
Lhotse	8516
Makalu	8485
Cho Oyu	8188

Which two mountains are the closest in height?

A Mount Everest and K2
B K2 and Kangchenjunga
C Kangchenjunga and Lhotse
D Lhotse and Makalu
E Makalu and Cho Oyu

Q17. What is the difference between 10^3 and 10^2?

A 900
B 10
C 100
D 1000
E 1

Q18. If you add any two prime numbers together, which of the following statements are true?

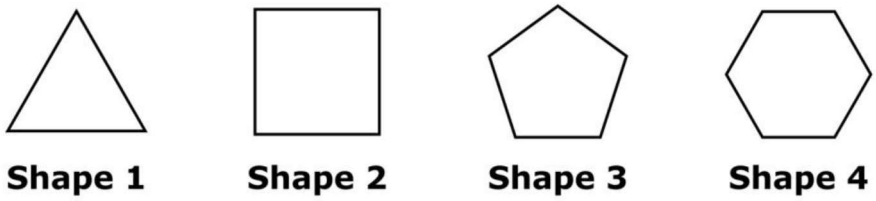

i) The result is always another prime number.
ii) The result is always an even number.
iii) The result could be another prime number.
iv) The result could be odd or even.
v) The result is never another prime number.

A only **i)**
B **i)** and **iv)**
C **ii)** and **v)**
D only **iv)**
E **iii)** and **iv)**

Q19. What is $0.2 \times \frac{1}{4} \times 60$?

A 3
B 6
C 2
D 12
E 30

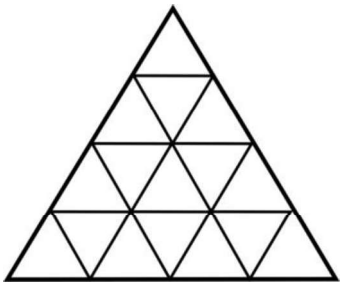

Q20. The shapes below form a sequence.

Which formula represents the number of sides of Shape n?

A n
B $n + 1$
C $n + 2$
D $2n + 1$
E $3n$

Q21. The large triangle below is formed from identical equilateral triangles with a side length of 1.5 cm.

What is the perimeter of the large triangle?

A 15.5 cm
B 12 cm
C 14.5 cm
D 16 cm
E 18 cm

Q22. Website A sells books for £2.99 each.
It charges a flat postage fee of 50 p, regardless of how many books you buy.
On website B, the same books cost £2.80 each with 10% added for postage.
Between ordering which numbers of books does it become cheaper to switch websites?

A 1 and 2 books
B 2 and 3 books
C 3 and 4 books
D 4 and 5 books
E 5 and 6 books

Q23. Kaz can run at a rate of 2 m per second.
What is this speed in kilometres per hour (km/h)?

A 10 km/h
B 6 km/h
C 7.2 km/h
D 120 km/h
E 12 km/h

Q24. What is one hundred and one million, thirty-seven thousand, one hundred and seven written in figures?

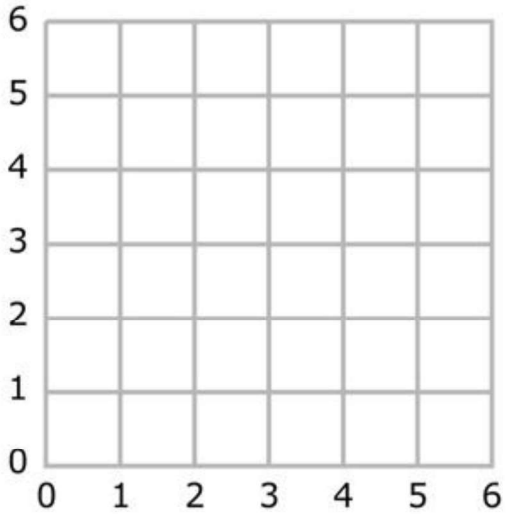

A 101 371 007
B 1 010 370 107
C 100 137 107
D 10 137 107
E 101 037 107

Q25. Five consecutive odd numbers have a sum of 35.
What is the smallest of the five numbers?

A 1
B 3
C 5
D 7
E 2

Q26. Consider the following points:

A (0, 0)
B (2, 0)
C (6, 0)
D (2, 4)
E (3, 4)
F (4, 4)

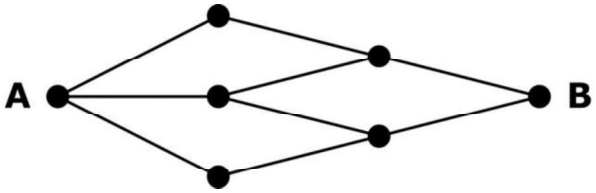

Join the points in this order to form Shape 1: ABCFEDA.
Join the following points to form Shape 2: ADBA.
How many times bigger is the area of Shape 1 than Shape 2?

A 2 times
B 3 times
C half as big
D the same size
E 4 times bigger

Q27. Jan's cat proudly brings three leaves into the house every day during November.
Jan sweeps the house but misses one in six of the leaves.
How many leaves are still in the house?

A 7 leaves
B 9 leaves
C 11 leaves
D 15 leaves
E 18 leaves

Q28. Look at the diagram below.
To travel from A to B, you cannot go over the same path or through the same intersection more than once.

How many different routes are there from A to B?

A 3
B 4
C 5
D 6
E 7

Q29. Mia has £4 less than Dru but £8 more than Zain.
Altogether they have £50.
How much money does Dru have?

A £8
B £10
C £18
D £22
E £24

Q30. What is $\frac{3}{20}$ as a decimal?

A 0.015
B 0.15
C 1.5
D 0.5
E 0.05

Q31. Which cube number lies between 500 and 600?

A 512
B 533
C 582
D 525
E 564

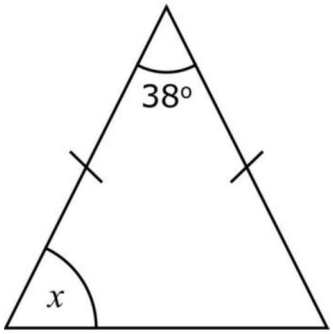

Q32. How many thirds are there in 54?

A 18
B 82
C 21
D 97
E 162

Q33. A shop has a sale in which all sporting equipment is reduced by 30%.
The sale price of a cricket bat is £84.
What was the original price of the cricket bat before the sale?

A £109
B £109.20
C £120
D £125.40
E £130

Q34. The diagram shows an isosceles triangle.

What is the size of angle x?

A 61°
B 67°
C 69°
D 71°
E 161°

Q35. Three buses on different routes – A, B and C – all leave the bus station at midday. After that, buses on route A leave every 30 minutes, buses on route B leave every 40 minutes and buses on route C leave every 45 minutes.
What is the next time that the buses for routes A, B and C all leave together?

A 1.30 p.m.
B 2.30 p.m.
C 3.30 p.m.
D 4.00 p.m.
E 6.00 p.m.

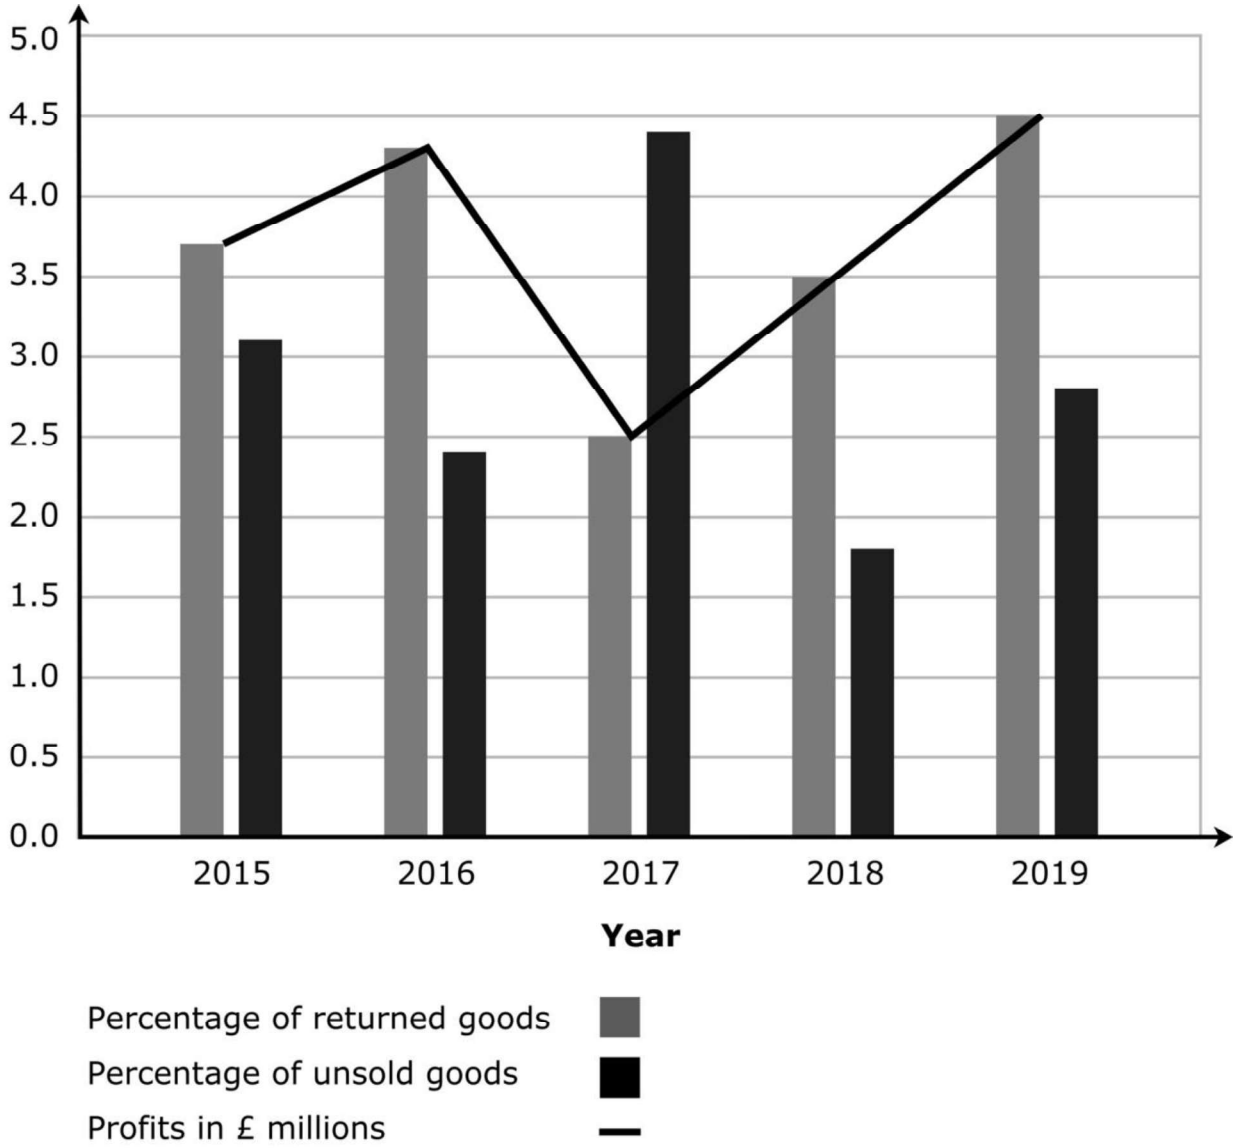

Q36. Sam wants to buy a toffee apple but he can't see the price.
However, he hears someone say, "I paid for two toffee apples with a £2 coin and received one coin in change."
He also overhears, "Four toffee apples cost more than £3.80."
How much does one toffee apple cost?

A £1.00
B 99 p
C 98 p
D 97 p
E 96 p

Q37. N is a three-digit odd number that is a palindrome (it reads the same backwards as it does forwards).
The largest digit is twice as big as the sum of the other two digits.
What is N – 100?

A 36
B 42
C 82
D 61
E 41

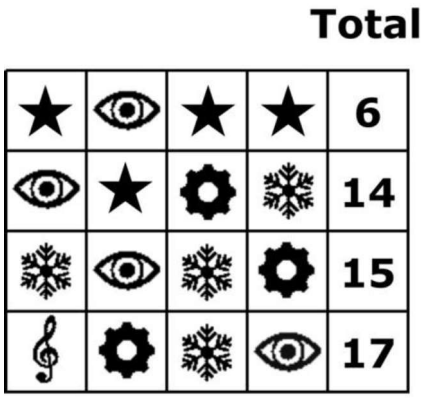

Q38. The graph shows the annual percentages of returned and unsold goods for a clothes firm and their impact on profits.

Which two years both saw an increase in profit, a rise in the percentage of returned goods and a drop in the percentage of unsold goods compared to the previous year?

A 2016 and 2017
B 2016 and 2018
C 2016 and 2019
D 2017 and 2018
E 2017 and 2019

Use the information in the grid to answer questions **39–41**.
The shapes stand for non-zero whole numbers.
The total of each line is given.

Q39. What is the value of ★?

A 1
B 2
C We don't have enough information.
D 3
E 4

Q40. What is the value of 👁 ?

A 1
B 2
C We don't have enough information.
D 3
E 4

Q41. What is the value of  ?

A 1
B 2
C We don't have enough information.
D 3
E 4

Q42. What is the smallest number of triangles from which you can form a trapezium?

A 2
B 3
C It can't be done.
D 4
E 5

Q43. Lars doubles a number and writes down the answer.
He then squares his original number and writes down the answer.
Lars notices that the answers contain the same two digits but in reverse.
What was Lars' original number?

A 5
B 6
C 7
D 8
E 9

Q44. The angles of a triangle are in the ratio 2 : 2 : 5.
What is the largest angle and what type of triangle is it?

A 100° and isosceles
B 80° and right-angled
C 110° and isosceles
D 120° and scalene
E 80° and isosceles

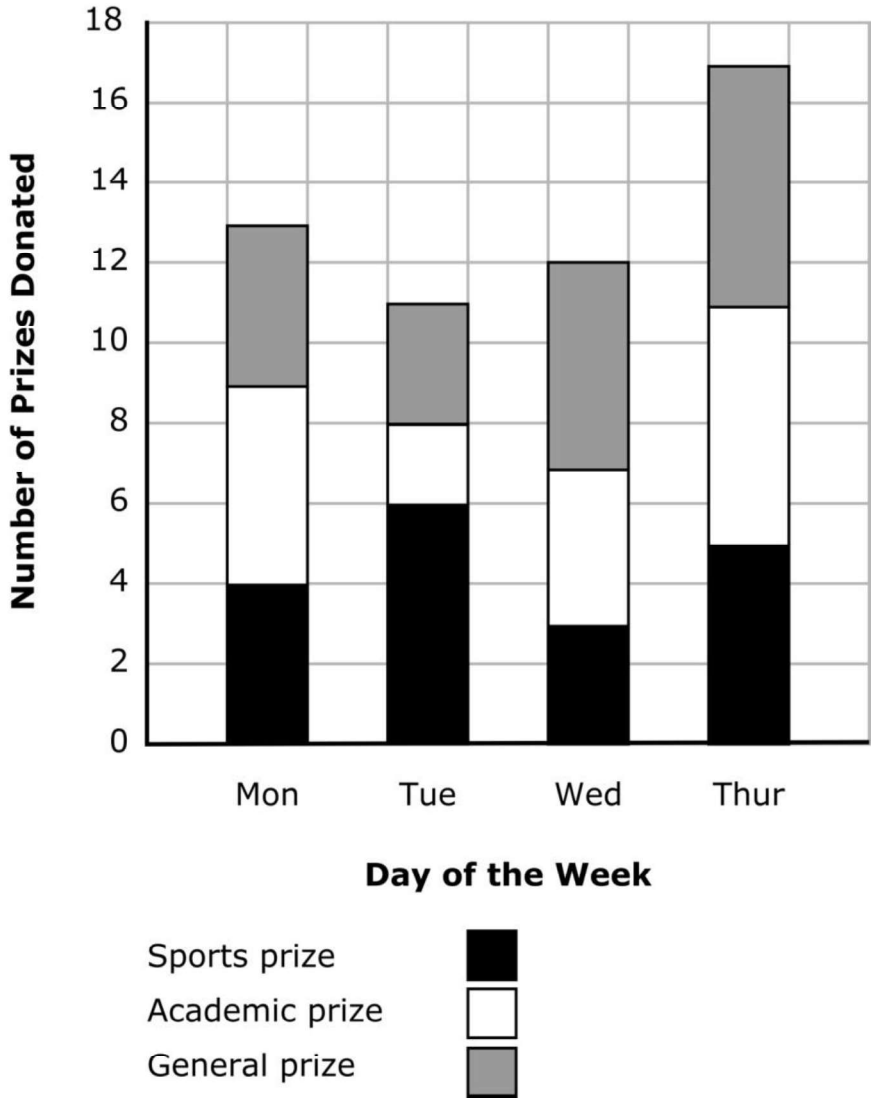

Q45. How many 25s make up 100 000?

A 400
B 4000
C 20 000
D 500
E 50 000

Q46. 2 monkeys can eat 10 nuts in 2 days.
How many nuts can 5 monkeys eat in 4 days?

A 72 nut
B 60 nuts
C 50 nuts
D 25 nuts
E 12 nuts

Q47. The pupils in class 2B were asked to donate prizes for the school fair. The chart shows the number of prizes donated from Monday to Thursday and whether they are suitable for sports, academic or general prizes.

The aim is to have 60 prizes in total, shared equally across the three categories, i.e. 20 sports prizes, 20 academic prizes and 20 general prizes. How many prizes of each type need to be donated on Friday to meet this target?

A 2 sports, 3 academic and 2 general prizes
B 2 sports, 2 academic and 3 general prizes
C 2 sports, 2 academic and 2 general prizes
D 3 sports, 3 academic and 2 general prizes
E 3 sports, 2 academic and 2 general prizes

Q48. Five friends are waiting to go on a pirate ship ride at a theme park.
There are only two spaces available on the next ride, so the friends ask the attendant to pick two of them to go on.
How many different pairs can the attendant choose?

A 5
B 6
C 8
D 9
E 10

Q49. (0, 5) and (5, 0) are two points on a straight line.
Which of the following points is **not** on the same line?

A (1, 4)
B (3, 2)
C (4.5, 0.5)
D (2, 2.5)
E (4, 1)

Q50. The product of two consecutive numbers is 2450.
What is their sum?

A 96
B 97
C 98
D 99
E 100

SELECTIVE ELIGIBILITY TEST (S.E.T.)
PRACTICE TEST 10

English
50 minutes

Instructions:

- This test contains 34 questions, which are split over 4 sections
- You are advised to spend the time suggested below on each section:
  Section A: Spelling – 5 minutes
  Section B: Text 1 – 25 minutes
  Section C: Text 2 – 10 minutes
  Section D: Comparison of Texts 1 & 2 – 10 minutes
- These timings are just recommendations – you are allowed to spend as much of the given time as you like on each section, and you may return to questions at any time during the test.
- Read the instructions for each section carefully.
- Mark all your responses on the separate answer sheet provided.

Your time will start when you turn over the page.

Section A

Which of these is the correct spelling?

1.
A Amiable
B Ameabel
C Ameable
D Amiabal
E Amiabel

2.
A Century
B Scenturie
C Centurie
D Sentury
E Centurey

3.
A Gaurdien
B Gardien
C Guardien
D Gardian
E Guardian

4.
A Punishmant
B Punnishment
C Punnishmeant
D Punishment
E Punnishmant

5.

A Violance

B Vylants

C Vileance

D Vilance

E Violence

6.

A Corduroy

B Cordurouy

C Cordrouy

D Courdroy

E Cordroy

Section B

The extract below is from *Ladies Can't Climb Ladders,* by Jane Robinson.

Read the extract carefully and then answer the questions that follow.

It was unseasonably cold on the evening of 8 March 1920. There was already a promise of frost in the air as small groups of women began to arrive through the gas-lit dusk at the Palace of Westminster. Three or four strode confidently, neat and slim in loose-fitting coats with hems well above the ankle and close-brimmed hats. The rest walked more slowly. Their costumes were structured on old-fashioned lines; their fur stoles dangled the limbs and snouts of long-dead foxes and their hats were as wide as their hips. It would be difficult at first glance to imagine what brought this unlikely company together.

Business was over for the day at the House of Commons. Its 700-odd members (all men but one) had grappled with the fate of a military mission in Soviet Russia; the employment of ex-servicemen; how children should be provided with medical care at school; and the parlous state of the House's ventilation system. Further afield, the country was struggling to come to terms with the aftermath of war and the recent pandemic of Spanish flu: a cruel blow to an exhausted people only just beginning to raise heads above the parapet and look to the future. No family was untouched by grief. Some reacted to personal loss by reverting to the *carpe diem* philosophy of soldiers and their lovers between 1914 and 1918, telling themselves that all that mattered was to live for the day. Others disapproved of such purblind hedonism, preferring to trust in the pre-war values that had built the British Empire. Those gathering in Westminster that early spring evening in 1920 represented a third way. Between them, they were changing the world for British women at home, in politics and in the workplace. Radiant with the (partial) success of recent crusades for the vote and the right to a career, they had come to celebrate.

Among the first to turn up at the banquet was Ray Strachey, a veteran of the suffrage campaign and a progressive champion of women in the traditional professions. Not that there *were* many women in the professions yet: a few score doctors and surgeons, seasoned by war work but unwelcome in most teaching hospitals; some pretend engineers and architects whose unfeminine ambition made right-minded people laugh; a handful of unorthodox priestesses, recalling Samuel Johnson's famous quip that 'a woman's preaching is like a dog's walking on its hinder legs. It is not done well; but you are surprised to find it done at all.' There were thousands of women teachers, but until the end of the Second World War they were expected to resign upon marriage, which meant their average working life was just three years. A couple of fully fledged professors had been appointed, one at a Johnny-come-lately modern

university and the other at a medical school — and there were no qualified barristers or solicitors at all.

Ray Strachey was something of a Renaissance woman. Her interests included mathematics, which she studied at Newnham College, Cambridge; cricket, which she played with aplomb; engineering — especially electrical engineering; and architecture. In 1921 she would design and build her own house in Sussex, where she brought up the family. Though constructed essentially of mud, it still stands. She was closely involved with politics, standing unsuccessfully as a parliamentary candidate in 1918, 1920 and 1922. As next best thing to being elected herself, she worked as a political secretary to the first and for a time the only woman MP, Nancy Astor (1879–1964).

The venue of this evening's celebration was particularly gratifying to Ray's friend and mentor Millicent Garrett Fawcett (1847–1929). Walking into Parliament by invitation remained a novelty for her. Memories of past violence and despair still stirred in the corridors of power, and it seemed strange to be hailed as a heroine by other guests — the Lord Chancellor, Attorney General and Solicitor General among them. Mrs Fawcett was in her seventy-third year. Her face was instantly familiar, apple-cheeked and cheerful despite that slightly downturned mouth, though her once slender frame looked bulkier now. She had never enjoyed the easy elegance of her old adversary Emmeline Pankhurst.

Most of the other women at the banquet were younger, including the bespectacled Helena Normanton (1882–1957), who would become one of the first two female barristers to take silk in England; her almost exact contemporary Lady Rhondda (1883-1958), an extraordinarily energetic business magnate and political activist from Wales; Lucy Nettlefold (1891–1966), known as Nancy, one of the first women to apply to the Law Society for training as a solicitor (though she had now joined her father's hardware business instead); and a young wife and mother called Gwyneth Bebb Thomson.

It was an enjoyable evening, with speeches and high-flown compliments on all sides. And lavish: oysters were on the menu, followed by trout, mutton, chicken casserole, croquette potatoes, peas, salad and *poires belle Hélène.* (When the suffragists of the Women's Freedom League had held a similar celebration on winning the vote in 1918, it had been an altogether more frugal affair involving ravioli, carrots and some jam tarts.)

7. What does 'unseasonably cold' (line 1) mean?

Select the **most accurate** definition.

A Too cold to be outside for long

B Extremely cold

C A little bit cold

D Colder than the average autumn

E Unusually cold for the time of year

8. Select the **TWO** words that are synonyms of 'company' in line 8.

A Friendship

B Group

C Pal

D Bunch

E Business

9. Look carefully at lines 1–8. What can we infer about 1920 from these lines?

Select all that are correct.

A It was acceptable to wear real fur.

B Wide-brimmed hats were not the height of fashion.

C Close-brimmed hats were fashionable.

D All women had wide hips.

E Women were only allowed out in groups.

10. What had been discussed in the House of Commons during the day on the 8th of March 1920?

Select all that are correct.

A Work for men who had been in the armed forces

B Whether women should be allowed to join the army

C The terrible condition of the House's ventilation system

D Medical care for children at school

E How to manage the outbreak of the Spanish flu

11. Which of these words from the second paragraph are military terms?

Select all that are correct.

A Hedonism

B War

C Parapet

D Philosophy

E Servicemen

12. What type of word is 'live' in line 18?

Select all that are correct.

A A homograph

B A noun

C An adverb

D A verb

E A compound word

13. Why were the women going to the Palace of Westminster on the 8th of March 1920?

Select the **most accurate** explanation.

A To campaign for women to have the right to vote

B To campaign for women to be allowed to join the armed forces

C To celebrate the end of the war

D To celebrate the advancement in equal rights for women

E To celebrate having a woman in the House of Commons

14. Look carefully at lines 24–36. Which of these statements is NOT true?

Select **one** answer.

A In 1920, there were no qualified female barristers.

B In 1920, married women were not expected to work.

C In 1920, there were no qualified female solicitors.

D In 1920, two women were professors.

E In 1920, there were over one hundred female doctors.

15. Select the **TWO** words that are synonyms of 'banquet' in line 24.

A Campaign

B Meal

C Meeting

D Conference

E Feast

16. Select the **TWO** most likely words that female priests would use to describe Samuel Johnson's quip.

A Sexist

B Insightful

C Offensive

D Astute

E Petty

17. What was the situation regarding women and work in 1920?

Select the **most accurate** explanation.

A Most women had careers that they continued until retirement age.

B Most women worked until they had children.

C All women were happy to work in the home.

D On the whole, society felt a woman's place was in the home.

E Women had pressure on them to have careers.

18. What can we infer about female teachers in 1920?

Select all that are correct.

A Most were unmarried.

B Most had been teachers for decades.

C Most were married.

D Most gave up teaching when they got married.

E Most were teachers for less than five years.

19. Select the **TWO** most accurate words to describe Ray Strachey.

A Progressive

B Regressive

C Submissive

D Intelligent

E Compliant

20. Which of the following statements about Nancy Astor are true?

Select all that are correct.

A She died when she was in her seventies.

B She was a Member of Parliament.

C In 1920, she was the only woman in the House of Commons.

D Ray Strachey worked as her secretary.

E She was born in the 1870s.

21. What do the words 'Walking into Parliament by invitation remained a novelty for her' (lines 46–47) suggest?

Select the **most accurate** explanation.

A Millicent had never been in the Houses of Parliament before.

B Millicent had been invited to the Houses of Parliament on many occasions.

C Millicent had entered the Houses of Parliament before without permission.

D Millicent had never been able to accept an invitation to the Houses of Parliament before.

E Millicent was not personally involved with politics.

22. What can we say about Millicent in 1920?

Select all that are correct.

A She was still mobile.

B She was in her seventies.

C She had rosy cheeks.

D She was no longer slim.

E She was extremely elegant.

23. What was available for the attendees to eat at the Palace of Westminster on the evening of the 8th of March 1920?

Select all that are correct.

A Ravioli

B The flesh of sheep

C Shellfish

D Chips

E Fish

Section C

The extract below is from *Wild Embers: Poems of Rebellion, Fire and Beauty,* by Nikita Gill.

Read the extract carefully and then answer the questions that follow.

Ariel

In this fairy tale, Ariel does not look at her childhood, her family, the ocean as though it is something she needs to leave behind for the love of a man. In this fairy tale, she chooses her ocean over the Prince because she knows love is something that can happen over and over again, but everything in the ocean that is dying cannot be brought back to life again.

She uses her voice to empower other mermaids to stand against humans destroying their home. She nurses injured sharks and dolphins and fish back to health.

She wears armour, and with her warrior sisters topples poachers' boats leaving them to fight their own way out of the water. She loves her body as it is and does not resent her fish tail and wish for legs or wish to be a land girl because she recognises what she was born in was special. She teams up with the sea witch and encourages her to use magic to aid in her quest to save the ocean, home to both of them.

And maybe one day, she will fall in love.
And maybe one day, she will find a prince.

Or maybe one day, she will choose never to marry.
Or maybe one day, she will decide to rule instead.

But before she does any of that, for all her hard work
for the ocean, she will be remembered.

Cinderella

There is only so much a good person can be verbally insulted and abused before they unleash their inner, sleeping dragon. And this is why Cinderella, locked in her attic, doomed to a life of cleaning, decided enough was enough and decided to take some action.

Cinderella's fairy Godmother wasn't a fairy Godmother at all. She was the best damned lawyer in town, and she took Cinderella's stepsisters and stepmother to the cleaners before they were unceremoniously thrown out of a house that wasn't theirs. At the end of the day, that house was her father's last possession and as its mistress, Cinderella could return it to its former glory and bring back its sunny disposition. She

didn't need to worry about balls and glass slippers because she took over her father's business of trading beautifully woven fabric from lands far and wide.

When the Prince did come to her door, he hand delivered her invitation, and Cinderella, who had to leave for a business trip that very evening, told him she had no inclination. She needed no husband at the tender age of nineteen. And she didn't want to become a princess and abandon what she had built, as a royal she would have no time. Because girls who were building empires for themselves did not need kingdoms to shine.

24. Does Nikita think that Ariel should get married in the fairy tale?

Select the **most accurate** explanation.

A No, because she doesn't believe in marriage.

B Yes, because she thinks all women should get married.

C No, because mermaids can't get married.

D Only if she wants to and not before she has accomplished many things.

E Yes, so her husband can help her to save the ocean and the sharks in it.

25. Look carefully at lines 1–13. What can we infer about Nikita's beliefs from these lines?

Select all that are correct.

A Nikita believes it is possible to fall in love more than once in a lifetime.

B Nikita does not think that women should judge themselves by their appearance.

C Nikita believes that men are superior to women.

D Nikita believes that women should stand up for what is right.

E Nikita believes that women should support each other.

26. What is the effect of the repetition of the word 'maybe' in lines 14–17?

Select the **most accurate** explanation.

A It tells us that Ariel is indecisive.

B It emphasises that women have options and should make their own choices.

C It emphasises that women are not as good at making decisions as men.

D It tells us that Nikita has no idea how the traditional story about Ariel ends.

E It suggests that women should leave any decision-making to men.

27. Select the **TWO** words that are synonyms of 'quest' in line 13.

A Desire

B Crusade

C Wish

D Mission

E Plea

28. Look carefully at lines 20–23. Which of these is NOT correct?

Select **one** answer.

A The lines contain a simile.

B The lines contain a metaphor.

C The lines contain repetition.

D The lines contain verbs in the past and present tense.

E The word 'sleeping' is used as an adjective.

29. Select the **TWO** most accurate words to describe the character of Cinderella in the traditional fairy tale.

A Submissive

B Passive

C Competitive

D Effusive

E Demonstrative

30. Select the **TWO** most accurate words to describe the character of Cinderella in Nikita's version of the fairy tale.

A Vengeful

B Arrogant

C Assertive

D Successful

E Angry

Section D

Answer the following questions using BOTH extracts.

31. Think about Ray and Nikita. From the texts, which of these statements are true about BOTH?

Select all that are correct.

A They are politicians.

B They are feminists.

C They are proponents for equality.

D They both disapprove of marriage.

E They are traditionalists.

32. Think about BOTH extracts. Which of these statements is NOT true?

Select **one** answer.

A Neither extract relies heavily on direct speech.

B Both extracts name at least one legal profession.

C Both extracts could be classified as feminist literature.

D Both extracts use a direct quote.

E Both extracts use language associated with war.

33. How are the writing styles of the two extracts different?

Select the **most accurate** explanation.

A Extract one is highly descriptive, whereas extract two lacks description.

B Extract one is humorous throughout, whereas extract two lacks humour.

C Extract one uses numerous metaphors and similes, whereas extract two lacks metaphors and similes.

D Extract one is poetic, whereas extract two is in prose.

E Extract one is factual and informative, whereas extract two is imaginative and thought-provoking.

34. Think about Lucy Nettlefold and Nikita's Cinderella. From the texts, which of these statements are true about BOTH?

Select all that are correct.

A They had jobs.

B They were in charge of businesses.

C They were political activists.

D They became solicitors.

E They had fathers who established businesses.

11+ S.E.T. Practice Test 10 – English – Answers

Marking Guidance

For each question, the maximum number of marks available is shown.

Where questions require multiple answers and use the rubric, '**Select all that are correct**', negative marking should also be applied, whereby 1 mark is deducted for each incorrect answer selected down to 0 marks (note that the number of marks per question cannot be negative).

For example:

If a question is worth 2 marks and requires options A, B and C to be selected:

Award 2 marks for A, B **and** C selected or 1 mark for any two correct answers selected.

Award 1 mark for A, B, C **and** D **or** E selected (2 marks – 1 incorrect = 1 mark).

Award 0 marks for A, B, C, D **and** E selected (2 marks – 2 incorrect = 0 marks).

Award 0 marks for A, B and E selected or equivalent (1 mark – 1 incorrect = 0 marks).

1.	A	[1 mark]
2.	A	[1 mark]
3.	E	[1 mark]
4.	D	[1 mark]
5.	E	[1 mark]
6.	A	[1 mark]
7.	E	[1 mark]
8.	B, D (both answers must be correct)	[1 mark]
9.	A, B, C	[2 marks]
10.	A, C, D	[2 marks]
11.	B, C, E	[2 marks]
12.	A, D	[2 marks]
13.	D	[1 mark]
14.	E	[1 mark]
15.	B, E (both answers must be correct)	[1 mark]
16.	A, C (both answers must be correct)	[1 mark]
17.	D	[1 mark]
18.	A, D, E	[2 marks]
19.	A, D (both answers must be correct)	[1 mark]

20.	B, C, D, E	[3 marks]
21.	C	[1 mark]
22.	A, B, C, D	[3 marks]
23.	B, C, E	[2 marks]
24.	D	[1 mark]
25.	A, B, D, E	[3 marks]
26.	B	[1 mark]
27.	B, D (both answers must be correct)	[1 mark]
28.	A	[1 mark]
29.	A, B (both answers must be correct)	[1 mark]
30.	C, D (both answers must be correct)	[1 mark]
31.	B, C	[2 marks]
32.	D	[1 mark]
33.	E	[1 mark]
34.	A, E	[2 marks]

Total: **48 marks**
