SELECTIVE ELIGIBILITY TEST (S.E.T.)

PRACTICE TEST 11

Mathematics

45 minutes

Instructions:

- This test contains 50 questions.
- For each question, choose the correct answer and then mark its letter on the answer sheet.

Your time will start when you turn over the page.

Q1. What is the difference between one-quarter of 64 and three-quarters of 48?

A –20

B 10

C 20

D –16

E 8

Q2. What is the value of 89 – 91 + 2 × 6?

A 0

B 11

C 16

D 10

E 18

Q3. What is the value of 10.08 + 11.1 + 9.014 + 0.806?

A 31

B 30.905

C 29.15

D 31.25

E 30

Q4. What is the most likely height of the tallest building in the world?

A 73 m

B 828 m

C 2000 cm

D 3 km

E 2 miles

Q5. What is the product of $\frac{1}{11}$ and $1\frac{5}{6}$?

A 1

B 0.5

C $\frac{1}{3}$

D $\frac{1}{4}$

E $\frac{1}{6}$

Q6. 120 g of sugar is mixed with some flour in a ratio of 4:7.

How much flour is in the mixture?

A 150 g

B 240 g

C 250 g

D 210 g

E 180 g

Q7. There are 36 more occupied seats than unoccupied seats in a cinema.

If there are 204 seats in total in the cinema, what is the ratio of the number of occupied seats to the number of unoccupied seats in its lowest form?

A 21:30

B 42:60

C 10:7

D 20:40

E 13:11

Q8. What is the volume of a cube of side length 3 cm?

A $27\,cm^3$

B $9\,cm^3$

C $18\,cm^2$

D $16\,cm^3$

E $54\,cm^2$

Q9. How many more sevenths are there in 3.5 than in 1.5?

A 8

B 16

C 9

D 14

E 5

Q10. Ash Class was awarded 330 house points from Monday to Friday during one week.

If there are 22 pupils in Ash Class, how many house points did each pupil collect on average each day?

A 1

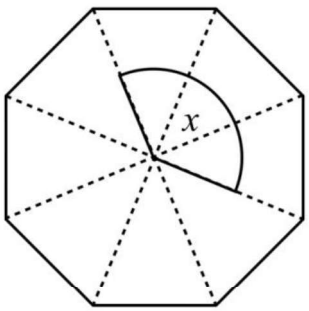

B 5

C 4

D 2

E 3

Q11. What is the size of angle x in this regular octagon?

A 125°

B 135°

C 120°

D 110°

E 90°

Q12. Which number between 300 and 400 divides exactly by 3, 5 and 7?

A 340

B 365

C 375

D 350

E 315

Q13. The average weight of four dogs is 4.2 kg.

Three of the dogs are the same weight and each weigh 3.6 kg.

What is the weight of the fourth dog?

A 4.5 kg

B 5.3 kg

C 6 kg

D 5 kg

E 5.8 kg

Q14. One angle of a triangle measures 24°.

Assuming that all the angles are a whole number of degrees, what is the largest possible angle that the triangle could have?

A 155°

B 135°

C 136°

D 145°

E 149°

Q15. Henry has some money.

He spends $\frac{3}{4}$ of his money on a pair of trainers and then $\frac{1}{2}$ of the remainder on a jumper.

If the jumper costs £6.50, how much money did Henry start with?

A £42

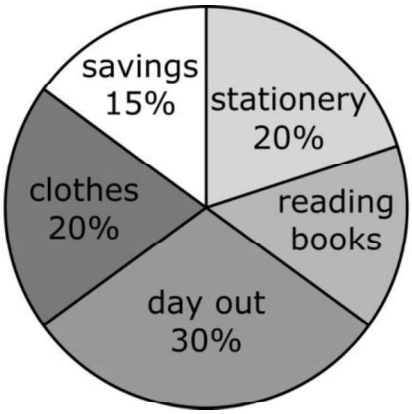

B £56

C £48

D £54

E £52

Q16. The chart shows how Ann spent her birthday money.

If Ann received £55 for her birthday, how much of the money did she spend on reading books?

A £6.50

B £10.40

C £9.50

D £8.25

E £15

Q17. The milk person delivers 4 pints of milk to Mrs White every 5 days.

How many pints of milk does Mrs White have delivered in one year?

A 365

B 292

C 1460

D 340

E 73

Q18. A pole is 1.53 m in length.

It is divided into 9 pieces of equal length.

How long is each piece in mm?

A 17 mm

B 1.7 mm

C 170 mm

D 147 mm

E 14.7 mm

Q19. The table shows the population of the world at certain times.

Year	Population in millions
800	220
1500	450
1700	610
1927	2000
1970	3700
2018	7631

In which of the following periods was there the greatest increase in the number of people per year?

A 800–1500

B 1500–1700

C 1700–1927

D 1927–1970

E 1970–2018

Q20. What is the first four-digit multiple of 35?

A 1005

B 1010

C 1015

D 1020

E 1025

Q21. It takes Sam 1 minute and 40 seconds to learn 5 spellings.

How long does it take Sam to learn 16 spellings?

A 5 minutes and 20 seconds

B 6 minutes

C 5 minutes and 10 seconds

D 6 minutes and 30 seconds

E 4 minutes and 50 seconds

Q22. What is $0.3 \times \frac{1}{4} \times 75\%$ of 480?

A 42

B 13.5

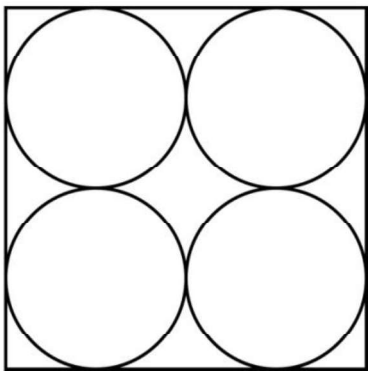

C 54

D 27

E 36

Q23. The circles each have a radius of 3 mm.

Not to scale.

What is the area of the square?

A 3.6 cm²

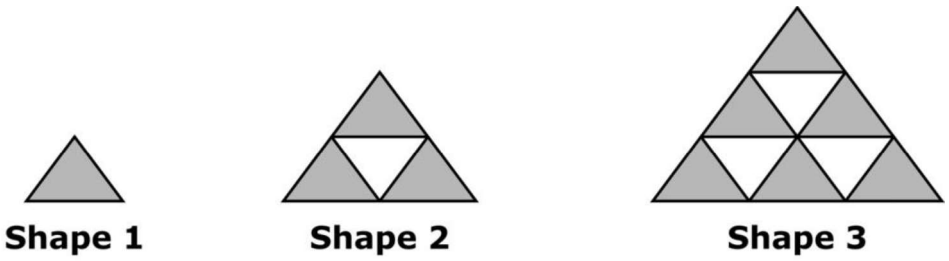

B 36 cm²

C 9 cm²

D 144 cm²

E 1.44 cm²

Q24. Study the pattern below, which is made up of upright grey triangles and inverted white triangles.

How many white triangles will there be in Shape 6?

A 21

B 20

C 15

D 18

E 23

Q25. A number of people apply for a job.

Half are interviewed on Tuesday and the other half are interviewed on Wednesday.

On Tuesday, the ratio of the number of male interviewees to the number of female interviewees is 1:2.

On Wednesday, the ratio of the number of female interviewees to the number of male interviewees is 5:3.

If 18 males are interviewed on Wednesday, how many females are interviewed on Tuesday?

A 32

B 45

C 40

D 28

E 16

Q26. George says, "I jog at a speed of 4 km per hour."

Jamil says, "I jog at a speed of 1 m per second."

If the boys start a race and jog at these speeds, how far ahead will George be after half an hour?

A 100 m

B 200 m

C 400 m

D 250 m

E 300 m

Q27. What is the difference between the number of factors of 20 and the number of factors of 30?

A 4

B 0

C 2

D 1

E 3

Q28. Three consecutive whole numbers have a sum of 123.

What is the product of the range of the three numbers and the median of the three numbers?

A 64

B 84

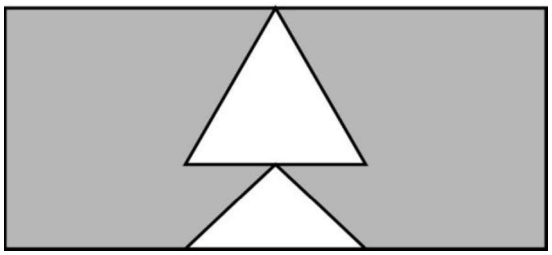

C 44

D 80

E 82

Q29. The diagram shows a rectangle of dimensions 4 cm × 9 cm.

Not to scale.

Two white triangles are placed on top of each other, as shown.

Both triangles have a base of 3 cm.

What is the total area of the shaded part of the diagram?

A 32 cm²

B 35 cm²

C 36 cm²

D 30 cm²

E 24 cm²

Q30. A cinema is going to show a new film.

Each showing lasts for 2 hours and 20 minutes, and the cinema must allow 20 minutes between showings for the auditorium to be cleaned.

Cleaning takes place after the final showing, in readiness for the next day, after the cinema has closed to the public.

If the cinema opens at 10.00 a.m. and closes at 10.00 p.m., how many showings of the new film can take place daily?

A 5

B 3

C 2

D 4

E 6

Q31. How many numbers between 0 and 400 are divisible by both 5 and 6?

A 12

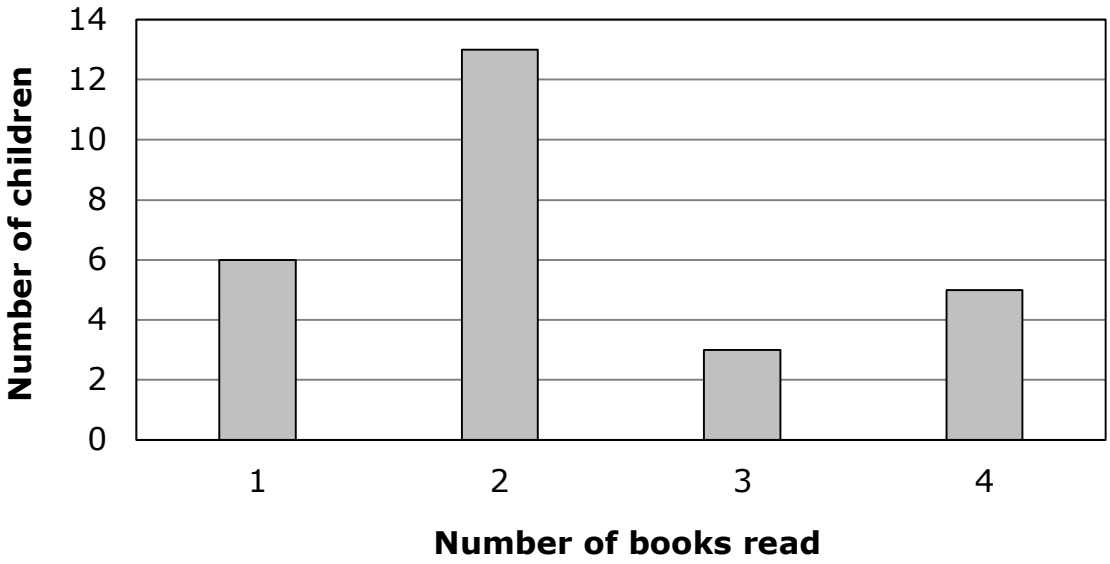

B 13

C 10

D 11

E 25

Q32. The graph shows the number of books that each child in Elm Class read during the month of May.

How many books in total did the children of Elm class read in May?

A 27

B 54

C 25

D 44

E 61

Q33. Bilal is one-fifth of his mother's age and one-eighth of his grandmother's age.

If Bilal's grandmother is 24 years older than Bilal's mother, how old is Bilal?

A 8

B 12

C 6

D 10

E 9

Q34. What should be added to 101 010.101 to make 1 000 000?

A 898 989.889

B 898 988.899

C 898 989.899

D 998 989.899

E 898 999.899

Q35. Diya thinks of a positive number.

She divides her number by 2 and then adds 3.

Diya then squares the result and rounds it to the nearest 10.

The final answer is 50.

With what number did Diya start?

A 4

B 10

C 7

D 8

E 6

Q36. Alan has a total of £280 in £10 notes and £5 notes.

He has three times as many £10 notes as £5 notes.

How many notes does Alan have altogether?

A 70

B 32

C 16

D 42

E 56

Q37. Three vertices of a symmetrical trapezium are located at the following coordinates:

$(A, 0)$, $(B, 0)$, $((A + 1), 4)$

Which one of the following is the 4th pair of coordinates?

A $((B + 1), 4)$

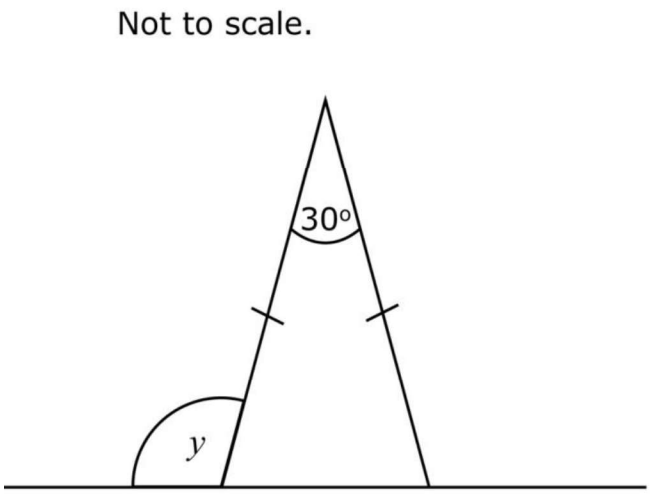

B $(B, 4)$

C $(A, 4)$

D $((B - 1), 4)$

E $(4, B)$

Q38. An isosceles triangle is shown in the diagram.

What is the size of angle y?

A 105°

B 100°

C 130°

D 110°

E 115°

Q39. The sum of three prime numbers is 39.

The product of the three prime numbers is 897.

What is the median of the three prime numbers?

A 15

B 9

C 11

D 13

E 10

Q40. The information below shows the cost of printing booklets based on the number of pages.

	Price in £ for 100 booklets			
Number of pages	**8**	**12**	**16**	**Each extra 4 pages above 16 pages**
Glossy paper	40	60	72	10
Matt paper	24	36	40	6

Extras: Colour printing 20% extra

With a cover £5 extra

What is the price to print one hundred 24-page booklets in colour on matt paper with no cover?

A £52

B £100.60

C £62.40

D £67.40

E £70

Q41. N is a multiple of 6 and 8 that lies between 100 and 150.

If $x^2 = N$, what is the value of x?

A 10

B 11

C 13

D 12

E 14

Q42. May and Fay both start with £200 at the beginning of 2020.

May spends m pounds every week and Fay spends f pounds every month.

Neither receives any extra money.

At the end of the year, May has more money left than Fay.

What is the difference in pounds between May's final amount and Fay's final amount at the end of 2020?

A $200m - 200f$

B $200 - 52m - 200 - 12f$

C $200 + 52m - 200 + 12f$

D $200 - 52m + 200 - 12f$

E $(200 - 52m) - (200 - 12f)$

Q43. Two points are 3 cm apart on a map.

If the two points are actually 75 km apart in real life, what is the scale of the map?

A 1:250 000

B 1:2 500 000

C 1:100 000

D 1:2500

E 1:300 000

Q44. What is the value of y if $50y = 20y + 90$?

A 3

B 2

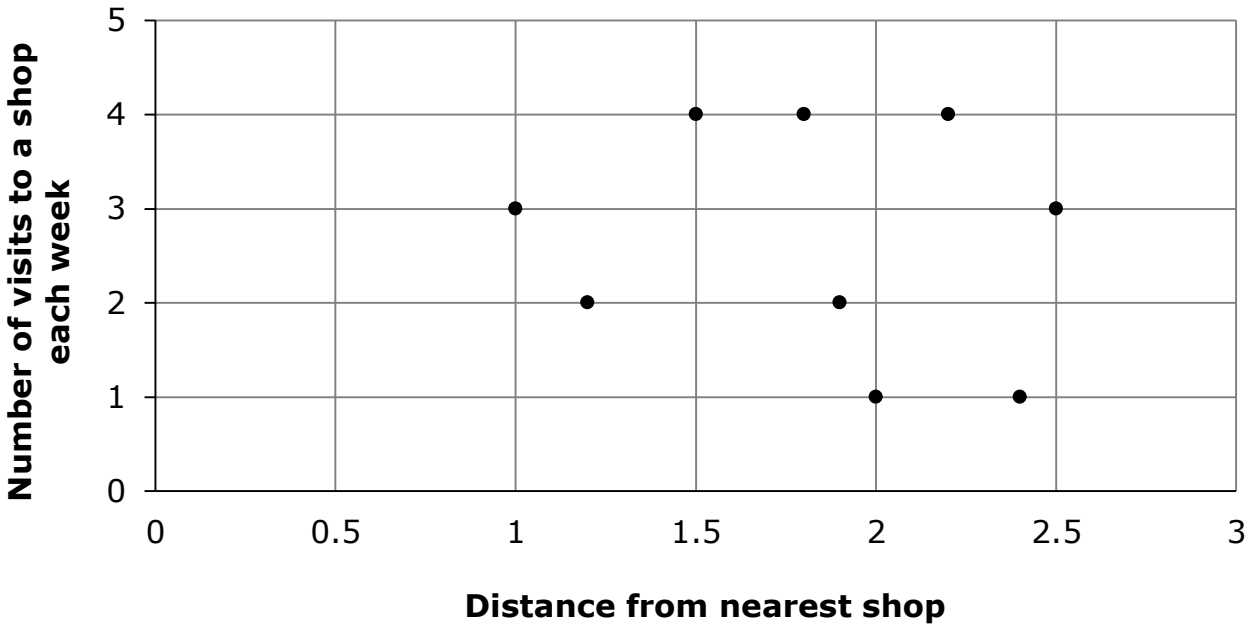

C 9

D 4

E 6

Q45. Nine people are asked how far they live from their nearest shop and how many times they shop each week.

The results are shown in the scatter graph.

How many times does the person who lives the median distance from the nearest shop visit a shop each week?

A 0

B 4

C 3

D 1

E 2

Q46. Four towns are positioned along a road as shown.

Not to scale.

The distance of A to B is the same as C to D.

The distance of B to C is 50 km and the distance of B to D is 80 km.

What is the distance from A to D?

A 110 km

B 80 km

C 100 km

D 120 km

E 105 km

Q47. Which number comes next in the following sequence?

2, 5, 10, 17, 26, 37, 50, 65, 82, 101, …

A 121

B 122

C 120

D 119

E 118

Q48. What is the difference between the smaller angles made by the hands of a clock at 13:00 and at 17:00?

A 150°

B 90°

C 135°

D 120°

E 110°

Q49. Christmas decorations cost 99 p each.

There is a special offer of 'buy four, get an extra one free'.

Mrs Claus buys a selection of Christmas decorations that cost £16.83 in total.

What is the maximum number of decorations that Mrs Claus could take home for this price?

A 18

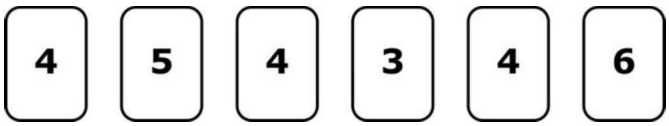

B 20

C 21

D 19

E 22

Q50. Karam has six cards with the following numbers on:

How many different 2-digit numbers could Karam make with the cards?

A 12

B 29

C 17

D 13

E 20

End of Test

SELECTIVE ELIGIBILITY TEST (S.E.T.)
PRACTICE TEST 11

English
50 minutes

Instructions:

- This test contains 34 questions, which are split over 4 sections
- You are advised to spend the time suggested below on each section:
  Section A: Spelling – 5 minutes
  Section B: Text 1 – 25 minutes
  Section C: Text 2 – 10 minutes
  Section D: Comparison of Texts 1 & 2 – 10 minutes
- These timings are just recommendations – you are allowed to spend as much of the given time as you like on each section, and you may return to questions at any time during the test.
- Read the instructions for each section carefully.
- Mark all your responses on the separate answer sheet provided.

Your time will start when you turn over the page.

Section A

Which of these is the correct spelling?

1.
A Amateur
B Amature
C Ammateur
D Ammature
E Amateure

2.
A Concious
B Consious
C Constious
D Conscous
E Conscious

3.
A Higherarchy
B Hierarchy
C Higherarcy
D Hierarcy
E Heirarchy

4.
A Maintainance
B Maintanence
C Maintenance
D Maintanance
E Maintainence

5.

A Privaleged

B Priveleged

C Priviledged

D Privileged

E Priveledged

6.

A Viciously

B Vicously

C Visously

D Visiously

E Viciousley

Section B

The extract below is from *The Longest Winter: Scott's Other Heroes,* by Meredith Hooper.

Read the extract carefully and then answer the questions that follow.

In 1771 Samuel Hearne, a young Hudson Bay official, described being guided across the snows and frozen lakes of northern Canada by a group led by a Chipewyan chief he called Matonabbee. Women, Matonabbee told Hearne, were the only way to get loads moved in this kind of country. One woman could carry, or haul, as much as two men, and travelling any considerable distance, or for any length of time, without their help was not possible. Women also dressed the meat, prepared it for eating, pitched the tents, made and mended the clothing, found fuel and kept the men warm at night. And the expense of maintaining them was trifling. They cooked, so they could subsist in scarce times by licking their fingers. Matonabbee used seven wives to drag his sledges during the seven-month journey. When the terrain made sledges unusable, the women shifted the loads on to their backs. Hearne noted in his journal that Matonabbee's wives were selected for strength. The men, he wrote, looked for wives to be broad of shoulder, sturdy of leg.

The requirements for travelling in the southern polar regions were substantially the same as those for Matonabbee and his wives in the north: tents for camping, food and cooking utensils, fuel, bedding, warm clothing, adequate footwear, axes, knives and weapons. Like Hearne, travellers in Antarctica also needed to carry navigating instruments, diaries, books, maps and writing implements. In the Canadian north the land yielded much of what was required for a journey. In the Antarctic there was no timber to make tent-poles and sledges and frames for snowshoes, no birch bark and wood for canoes, no dry moss to burn as fuel. Animals for food, fuel and skins could be found only along the coasts, and most were summer visitors. There were none inland, where men yearned to go.

But women as beasts of burden were not an option in the southern polar regions. There were no indigenous people at all, and never had been: no one to coerce, flatter or persuade with trade goods or newly acquired Christianity, no one to act as porter or bearer and carry the necessities of survival. There were not even any local animals to capture and use as burden carriers, although Japanese explorers, on seeing emperor penguins, did briefly joke about using them instead of sledge dogs. The largest land-living all-the-year-round animal in Antarctica turned out to be a 2-millimetre-long mite. The largest plants were thumb-high.

Explorers travelling to Antarctica had to transport from their metropolitan centres, or collect from colonial outposts en route, every single thing they needed or might need. The necessities for survival had first to be loaded into ships, transported south across

the world's stormiest ocean, then unloaded on to ice or land. Logistics were central to all plans, and the issue demanded constant attention. Expedition ships as carriers plus containers were ideal bases from which to explore. But once men landed ashore, the intractable problem was moving away from base. However pruned down, however fretted over, enough basic supplies to maintain life, and efficient work, had to be carried. Man in Antarctica was a snail creeping along with his house on his back. Either he introduced animals to drag and carry or he looked to the industrial leadership of the Western world – the remarkable innovations in transport – and tried adapting them to ice and snow: motorised sledges, a tracked motor car, even an aeroplane. Or man became the pack animal, carrying his load or dragging it behind him on a sledge.

The absence of indigenous people had other impacts. Explorers had always, where possible, used local informants, reluctant or willing, to assist as pilots for sea journeys or guides over land: key moments in the transfer of knowledge, the gaining of those 'hard won fragments' to fit on to the map of the world. In Antarctica explorers could not draw on oral traditions: there were no tales of mountain passes, no insider knowledge to fillet out concerning seasonal variation and animal behaviour or the vagaries of weather and climate. There was no chance to observe local survival techniques: ways of living off the land or management of wind, water and ice. Antarctica was *tabula rasa*. This unknown land demanded no understanding of foreign ways or languages. It required no money, passports or negotiations with officials. There were no police, no laws, no armies, no rules and regulations. No markets or bazaars, no roads, no foreign diseases to catch or avoid. No children or old people. No females at all. Explorers were on their own. They had to make decisions, and act, according to their understanding of the appropriate ways to solve problems. Exclusively male, they arrived carrying their sense of themselves, their sense of their nationalities, and their place in society, in their minds. Confident that challenges were there to be met and overcome, their only points of comparison were each other.

7. Select the **TWO** most accurate words to describe northern Canada.

A Arctic

B Water-logged

C Temperate

D Barren

E Remote

8. Look carefully at lines 3–9. Which of these is NOT correct?

Select **one** answer.

A Matonabbee saw women as a useful asset.

B Matonabbee regarded men and women as equals.

C Expeditions were not possible without women.

D All essential practical tasks were carried out by women.

E A woman could carry twice the amount that a man could carry.

9. Select the **TWO** words that could replace 'trifling' in line 8 without changing the meaning.

A Sweet

B Minor

C Insignificant

D Inadequate

E Tremendous

10. Look carefully at lines 8–13. What parallels are there between how Matonabbee regards women and how a farmer might regard his working animals?

Select all that are correct.

A Women are selected based on their conformation.

B They are versatile and can switch between pulling and carrying loads.

C He talks about the cost of their upkeep.

D He has a team of wives to pull his sledges.

E He puts their needs before his own.

11. Look carefully at lines 14–23. Which of these is NOT correct?

Select **one** answer.

A The equipment required for expeditions in northern Canada and the Antarctic was largely the same.

B The Antarctic did not have the same useful natural resources as northern Canada.

C Explorers in both regions carried log-keeping equipment.

D Explorers in both regions carried hunting equipment so that they could kill animals for food.

E Instruments were required for navigating both regions.

12. 'women as beasts of burden' (line 24)

Which of these is NOT correct?

Select **one** answer.

A This is an example of personification.

B This is an example of alliteration.

C The word 'beast' means animal rather than human.

D The word 'burden' means a heavy load.

E This short phrase summarises Matonabbee's treatment of women.

13. From the text, why couldn't Antarctic expeditions use women for labour?

Pick the **most accurate** explanation.

A Explorers had ethical objections to using women in this way.

B Western women were not strong enough for the work.

C Christianity forbade the use of women as slaves.

D There were no people native to Antarctica.

E The local inhabitants could not be coaxed into doing the work.

14. What do we learn about the Antarctic in this extract?

Select all that are correct.

A It attracts tourists during the summer months.

B It is in the southern polar region.

C It is uninhabited.

D Plants grow no more than a couple of inches in height.

E No animals, apart from tiny insects, can be found in the interior.

15. Look carefully at lines 24–27. What do these lines suggest about explorers' attitudes towards indigenous people?

Select all that are correct.

A They could be persuaded to supply goods for the expedition.

B They could be bought or bullied into joining expeditions.

C They were useful for menial work.

D The explorers regarded them as equals.

E They were a commodity to be exploited.

16. Select the **TWO** examples of 'metropolitan centres' (32).

A Villages

B Counties

C Cities

D Towns

E Provinces

17. What is the meaning of 'logistics' as it is used in line 35?

Pick the **most accurate** explanation.

A The careful planning of a complex operation

B A set of underlying principles

C The activity of organising the transport of equipment and accommodation

D The commercial activity of transporting goods to customers

E The quality of being justifiable by reason

18. From the text, what role did ships play in expeditions?

Select all that are correct.

A They were used to plough a route through the ice.

B They were used for emergency evacuations.

C They were used for storage.

D They were used as a base camp.

E They were used for transport.

19. 'Man in Antarctica was a snail creeping along with his house on his back' (line 40)

What does this metaphor tell the reader?

Select all that are correct.

A Explorers were a blight on the Antarctic landscape.

B Expeditions into Antarctica required patience and persistence.

C Explorers needed to wear armour to protect themselves.

D Expeditions into Antarctica were painfully slow.

E Explorers must carry everything they needed with them.

20. Think about why indigenous people were useful to explorers.

Which of these is NOT correct?

Select **one** answer.

A They possessed invaluable local knowledge.

B They could help explorers navigate across the region.

C They had specialised motor vehicles that the explorers could use.

D They had tried and tested methods for finding food and water.

E They understood the local climate wildlife and weather.

21. What is '*tabula rasa*' (line 52) most likely to be?

Pick the **most accurate** explanation.

A It is the name of an expedition ship.

B It is the native name for Antarctica.

C It is a Latin phrase meaning 'a clean slate'.

D It was the operation name for the first Antarctic expedition.

E It is a Latin phrase meaning 'chartered territory'.

22. Look at lines 53–57. Which of these is NOT correct?

Select **one** answer.

A Antarctica is personified in the first line.

B It is an example of hyperbole.

C The only people to venture into Antarctica were men.

D Repetition is used to emphasise that Antarctica had, so far, been unaffected by man.

E It suggests that Antarctica is a place of freedom.

23. Look carefully at lines 58–61.

Select the **TWO** most accurate words to describe the first Antarctic explorers.

A Self-assured

B Apprehensive

C Arrogant

D Apathetic

E Amenable

Section C

The extract below is from the poem *The Introduction,* by Anne Finch, Countess of Winchilsea (1661–1720).

Read the extract carefully and then answer the questions that follow.

Did I, my lines intend for public view,
How many censures, would their faults pursue,
Some would, because such words they do affect,
Cry they're insipid, empty, and uncorrect.
And many have attained, dull and untaught,
The name of wit only by finding fault.
True judges might condemn their want of wit,
And all might say, they're by a woman writ.
Alas! a woman that attempts the pen,
Such an intruder on the rights of men,
Such a presumptuous creature, is esteemed,
The fault can by no virtue be redeemed.
They tell us we mistake our sex and way;
Good breeding, fashion, dancing, dressing, play
Are the accomplishments we should desire;
To write, or read, or think, or to inquire
Would cloud our beauty, and exhaust our time,
And interrupt the conquests of our prime;
Whilst the dull manage of a servile house
Is held by some our outmost art, and use.
Sure 'twas not ever thus, nor are we told
Fables, of women that excelled of old;
To whom, by the diffusive hand of Heaven
Some share of wit, and poetry was given.

24. Select the **TWO** most accurate words to describe how the poet is feeling in the poem.

A Frustrated

B Vengeful

C Indignant

D Resigned

E Desperate

25. What is the poem about?

Pick the **most accurate** explanation.

A The poet is tired of people criticising her writing.

B The poet is annoyed by the restrictions imposed on her by society.

C The poet thinks that it is important for women to know and accept their place in society.

D The poet is moaning about having to manage the house when she would rather be reading.

E The poet wishes that her writing were more imaginative and intelligent.

26. Look carefully at lines 1–8. Which of these is NOT correct?

Select **one** answer.

A The poet conveys the impression that her writing is not intended for an audience.

B The poet expects that some people would deem her poetry meaningless and uninteresting.

C The poet thinks that come critics have gained a reputation for being intelligent just through criticising the work of others.

D The poet does not think her writing is good enough to share.

E The poet thinks her writing would be dismissed because it has so obviously been written by a woman.

27. What do lines 9–12 tell us about society's attitudes towards men and women at that time?

Select all that are correct.

A Women were encouraged to write poetry and to leave serious writing to men.

B Writing was seen as something that only men should do.

C Women were seen as a threat to men.

D It would be inappropriate for a woman to try to write poetry.

E Failing to accept her limitations could permanently sully a woman's reputation.

28. From the text, what were women expected to be interested in?

Select all that are correct.

A Breeding dogs

B Reading novels

C Beauty and fashion

D Becoming actresses

E Entertainment

29. From the text, why should women not attempt cerebral activities?

Select all that are correct.

A It would make them less attractive.

B It would get in the way of them finding a husband.

C It would give them ideas above their station.

D It would result in mental and emotional strain.

E It would be a waste of their time.

30. Look carefully at lines 19–24. Which of these is NOT correct?

Select **one** answer.

A The poet thinks that women who willingly manage the home and serve their husbands are boring.

B Some people think that looking after the house and family is the most that a woman is capable of.

C The poet states that attitudes towards women have not always been like this.

D The poet recalls there being true stories of strong women in history.

E History provides evidence of women blessed with the capacity for inventive thought.

Section D

Answer the following questions using BOTH extracts.

31. Think about the narrative voice and themes in the two texts. Which of these statements are true about BOTH?

Select all that are correct.

A The authors are women.

B They highlight attitudes towards women within British society.

C They portray men in a negative light to the modern reader.

D They are emotional.

E They use the first person.

32. How are the attitudes to women the **same** in BOTH texts?

Select all that are correct.

A Women are expected to focus on frivolous pursuits.

B Women are referred to using language associated with animals.

C Women are valued for qualities other than intellect.

D Women are below men in the social hierarchy.

E Wives are expected to serve their husbands.

33. Think about how women are portrayed **differently** in the two texts. Which of these is NOT correct?

Select **one** answer.

A The reader does not know how the women in Extract 1 feel – they do not have a voice.

B Women are valued for their resilience in Extract 1 and their beauty in Extract 2.

C Only the women in Extract 1 are expected to carry out domestic duties.

D Women are portrayed as essential to survival in Extract 1 but as having no serious purpose in Extract 2.

E The women in Extract 1 are portrayed as accepting of their positions, whereas the narrator of Extract 2 is 'presumptuous'.

34. Samuel Hearne (in Extract 1) was an English explorer and author.

From the texts, why would Samuel Hearne have found Matonabbee's attitude to women so surprising?

Pick the **most accurate** explanation.

A Hearne comes from a society in which women are valued for their minds rather than their physical strength.

B Hearne comes from a society in which women are not expected to be subservient to men.

C Matonabbee regards women as essential workhorses, but an English man could envisage no practical use for a woman on an expedition.

D Hearne would believe that it is essential for women to be given opportunities to dress nicely, dance and play.

E Hearne would be amazed that the men of Matonabbee's tribe had managed to successfully exploit such strong women for so long.

11+ S.E.T. Practice Test 11 – English – Answers

Marking Guidance

For each question, the maximum number of marks available is shown.

Where questions require multiple answers and use the rubric, '**Select all that are correct**', negative marking should also be applied, whereby 1 mark is deducted for each incorrect answer selected down to 0 marks (note that the number of marks per question cannot be negative).

For example:

If a question is worth 2 marks and requires options A, B and C to be selected:

Award 2 marks for A, B **and** C selected or 1 mark for any two correct answers selected.

Award 1 mark for A, B, C **and** D **or** E selected (2 marks – 1 incorrect = 1 mark).

Award 0 marks for A, B, C, D **and** E selected (2 marks – 2 incorrect = 0 marks).

Award 0 marks for A, B and E selected or equivalent (1 mark – 1 incorrect = 0 marks).

1.	A	[1 mark]
2.	E	[1 mark]
3.	B	[1 mark]
4.	C	[1 mark]
5.	D	[1 mark]
6.	A	[1 mark]
7.	A, E (both answers must be correct)	[1 mark]
8.	B	[1 mark]
9.	B, C (both answers must be correct)	[1 mark]
10.	A, B, C, D	[3 marks]
11.	D	[1 mark]
12.	A	[1 mark]
13.	D	[1 mark]
14.	B, C, D, E	[3 marks]
15.	B, C, E	[2 marks]
16.	C, D (both answers must be correct)	[1 mark]
17.	C	[1 mark]
18.	C, D, E	[2 marks]
19.	B, D, E	[2 marks]

20.	C	[1 mark]
21.	C	[1 mark]
22.	B	[1 mark]
23.	A, C (both answers must be correct)	[1 mark]
24.	A, C (both answers must be correct)	[1 mark]
25.	B	[1 mark]
26.	D	[1 mark]
27.	B, D, E	[2 marks]
28.	C, E	[2 marks]
29.	A, B, E	[2 marks]
30.	A	[1 mark]
31.	A, C	[2 marks]
32.	B, C, D, E	[3 marks]
33.	C	[1 mark]
34.	C	[1 mark]

Total: **47 marks**
