SELECTIVE ELIGIBILITY TEST (S.E.T.)

PRACTICE TEST 19

Mathematics

45 minutes

Instructions:

- This test contains 50 questions.
- Rough working can be done on the paper or on a separate sheet.
- For each question, choose the correct answer and then mark its letter on the separate answer sheet provided.

Your time will start when you turn over the page.

Q1. What is $20 - 5 \times 2$?

A 30

B 10

C 50

D 15

E 20

Q2. What is $(4 + 5)^2$?

A 41

B 27

C 18

D 81

E 63

Q3. What is $25.1 - 31.2 + 7.2$?

A 1.3

B -1.1

C -1.3

D 2.9

E 1.1

Q4. How many fiftieths are there in 15?

A 750

B 0.3

C 75

D 7.5

E 7500

Q5. $\frac{3}{5}$ of 1500 = ?

A 900

B 1080

C 90

D 108

E 75

Q6. What fraction of 0.35 m is 7 mm?

A $\frac{1}{5}$

B $\frac{2}{45}$

C $\frac{1}{20}$

D $\frac{1}{50}$

E $\frac{1}{200}$

Q7. One side of a triangle is 10 cm in length.

Which one of the following cannot be the perimeter of the triangle?

A 30 cm

B 22 cm

C 20 cm

D 40 cm

E 100 cm

Q8. 20% of N = 30% of M

What is the ratio of N to M?

A 2 : 3

B 3 : 2

C 1 : 2

D 2 : 1

E 20 : 30

Q9. A theme park ride has 10 compartments.

12 people can sit in each compartment.

On one ride, half of the compartments are half full; one-fifth of the compartments are a quarter full; and the remaining compartments are two-thirds full.

How many people are there on the ride?

A 60

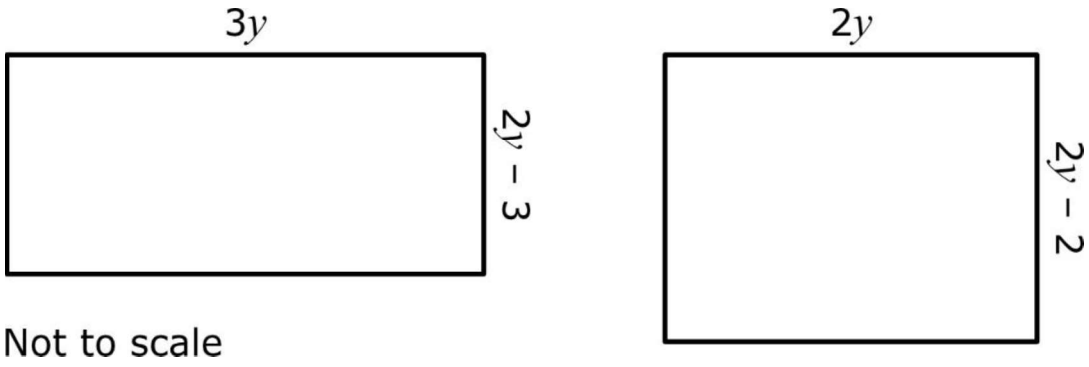

B 58

C 55

D 48

E 45

Q10. The rectangles have the same area.

What is the value of y?

A 0.5

B 1.25

C 1.5

D 2

E 2.5

Q11. Seth and Beth share a bag of chips in a ratio of 1 : 2.

What fraction of the chips does Seth receive?

A $\frac{1}{5}$

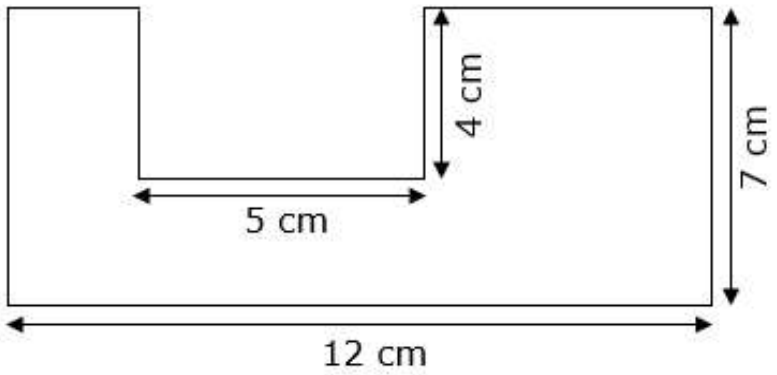

B $\frac{1}{4}$

C $\frac{1}{2}$

D $\frac{1}{3}$

E $\frac{2}{3}$

Q12. The diagram shows a room plan.

What is the perimeter of the room plan?

A 41 cm

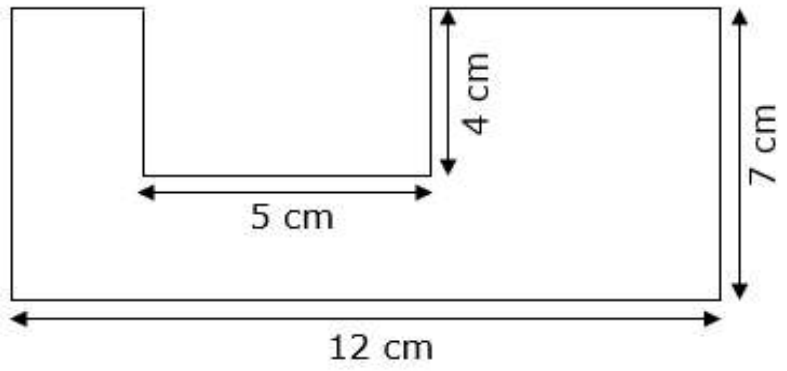

B 44 cm

C 46 cm

D 48 cm

E not enough information

Q13. The diagram shows a room plan.

What is the area of the room plan?

A 64 cm²

B 40 cm²

C 54 cm²

D 68 cm²

E not enough information

Q14. What is 543.569 to two decimal places?

A 54356.9

B 543.57

C 5.43569

D 543.56

E 543.6

Q15. Tim was t years old 2 years ago.

How old was Tim 10 years ago?

A $t - 10$

B $t - 6$

C $t - 8$

D $t + 8$

E $t - 12$

Q16. What is the first five-digit multiple of 30?

A 10030

B 10010

C 10020

D 10005

E 12000

Q17. $2(y + 4) + 3(y + 2) =$

A $5y + 6$

B $5y + 8$

C $y + 10$

D $5y + 12$

E $5y + 14$

Q18. $9\frac{1}{6} - 7\frac{3}{4} =$

A $2\frac{3}{12}$

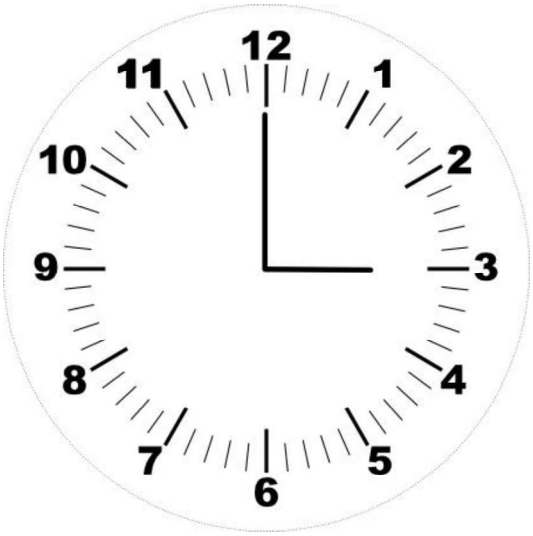

B $1\frac{11}{12}$

C $1\frac{7}{12}$

D $1\frac{5}{12}$

E $2\frac{1}{12}$

Q19. It is 15:00 now.

What will be the reflex angle between the hands of the clock in 5 hours' time?

A 260°

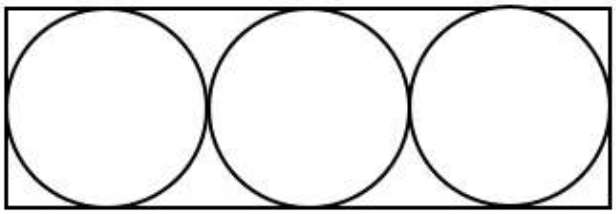

B 270°

C 120°

D 240°

E 150°

Q20. The circles each have a radius of 8 cm.

What is the perimeter of the rectangle?

A 100 cm

B 132 cm

C 32 cm

D 64 cm

E 128 cm

Q21. The table needs to be completed to show the numbers of different types of members of a tennis club.

The total number of members is 280.

There are twice as many senior members as junior members.

There are 20 more male members than female members.

Club Members	Male	Female	Total
Juniors			
Seniors			
Pensioners			
Total			

If there are 58 pensioners, 60 male seniors and 30 female juniors, how many female seniors are members of the club?

A 88

B 76

C 68

D 92

E 84

Q22. $\frac{5}{7} \times \frac{1}{2} \times \frac{7}{10} = ?$

A 0.5

B 0.25

C 0.4

D 0.6

E 10.75

Q23. The formula for the nth term of a sequence is given by $n^2 + n + 2$.

What is the difference between the 5th term and the 7th term?

A 18

B 20

C 22

D 24

E 26

Q24. A knot is a unit of speed equal to one nautical mile per hour.

A nautical mile is slightly longer than a normal mile.

5 nautical miles is approximately equal to 9 km.

In 2020, the fastest yacht travelled at a speed of 70 knots.

What speed is that in km per hour?

A 120 km/h

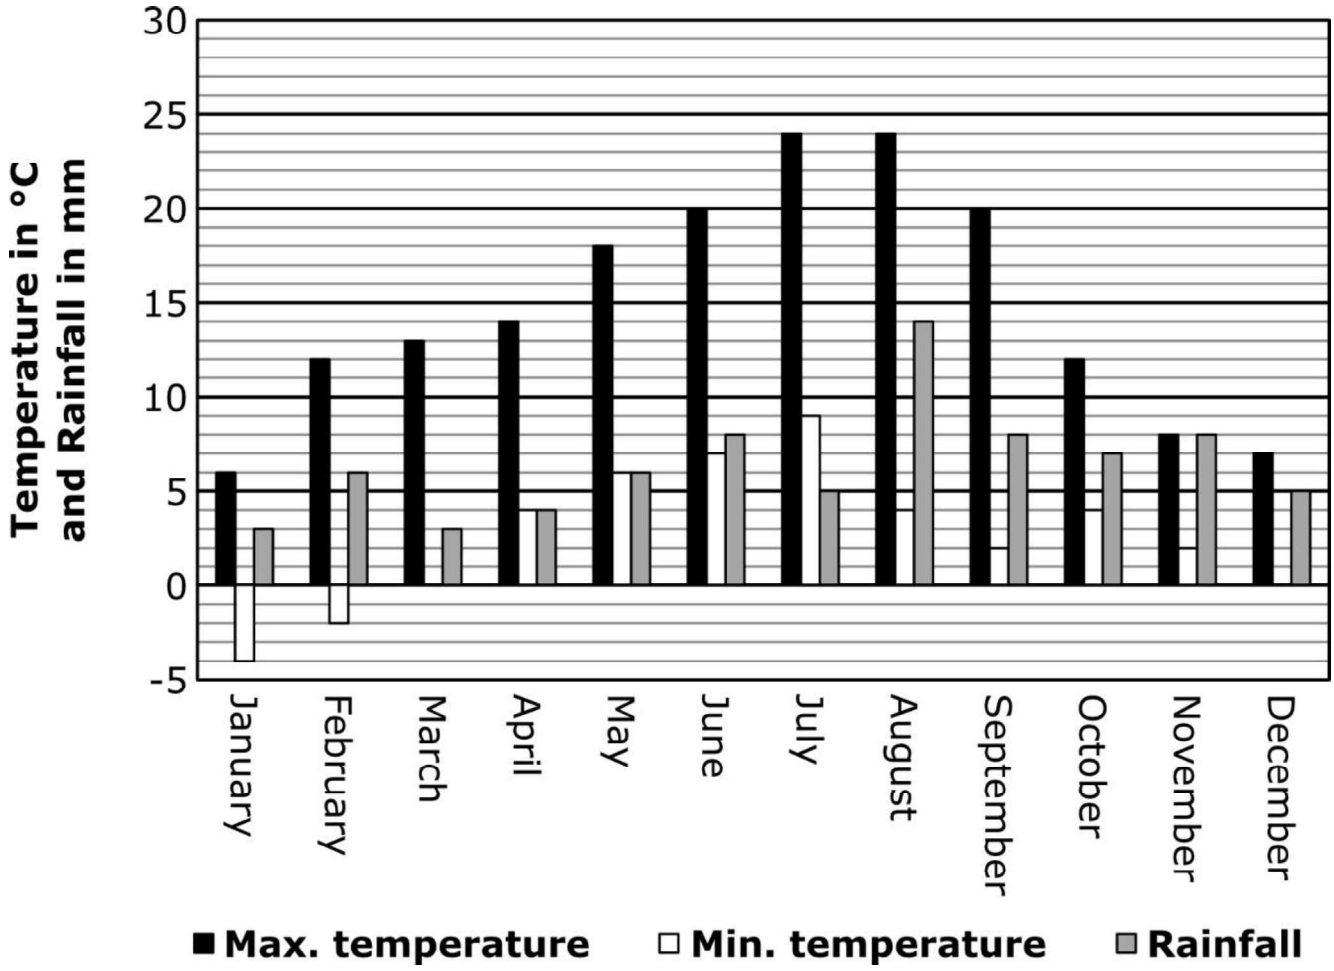

B 112 km/h

C 126 km/h

D 14 km/h

E 90 km/h

Q25. The graph shows the maximum and minimum temperatures and the total rainfall for each month during one year in a city.

What is the mode of the rainfall?

A 3 mm

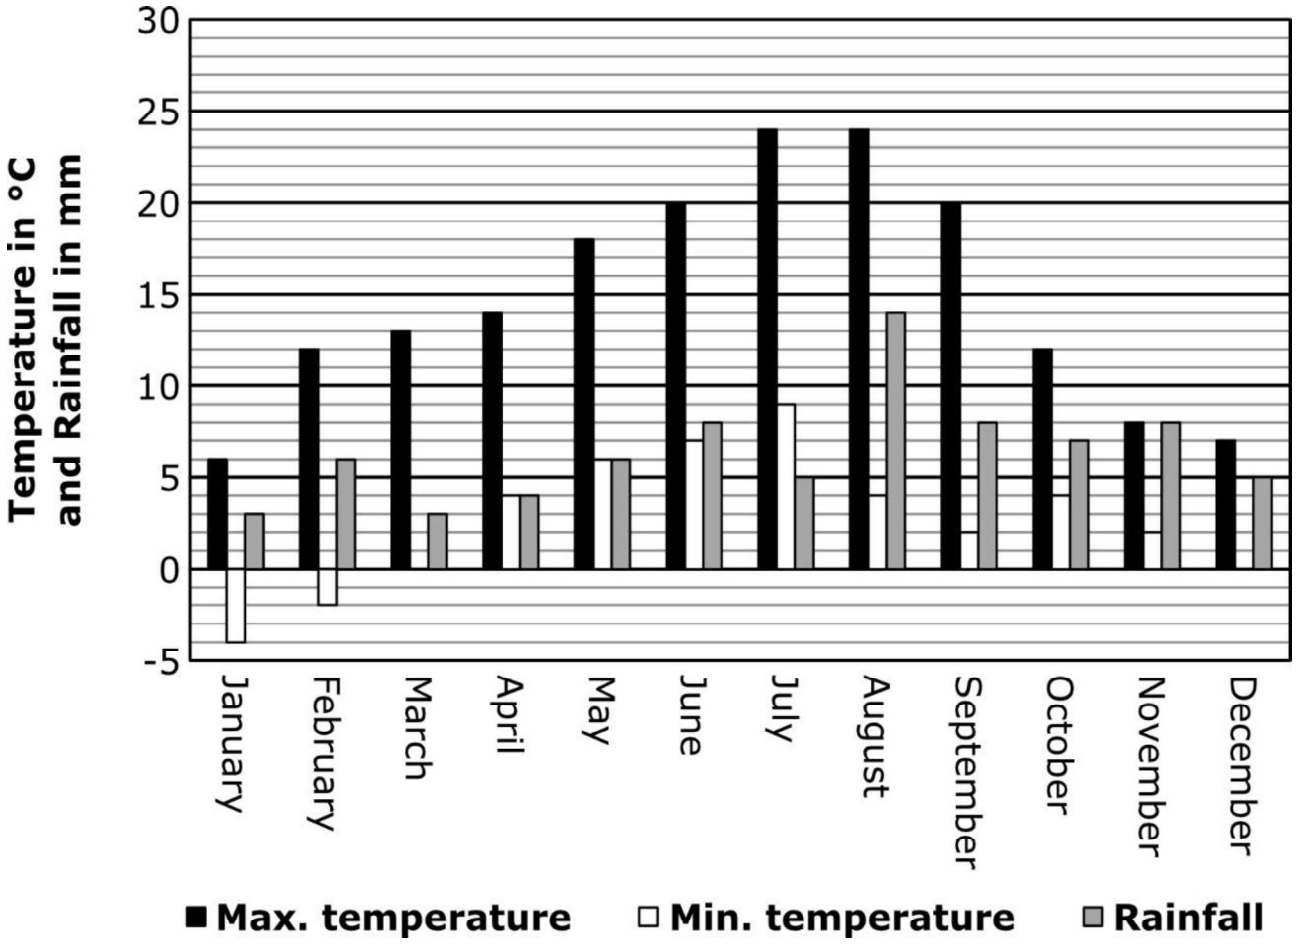

B 8 cm

C 3 cm

D 8 mm

E 3 mm and 5 mm

Q26. The graph shows the maximum and minimum temperatures and the total rainfall for each month during one year in a city.

Which month had the smallest range of temperatures?

A October

B November

C December

D January

E April

Q27. An examiner takes 5 minutes to mark one test.

How long will it take the examiner to mark 250 tests?

A 22 hours

B 20 hours and 40 minutes

C 18 hours

D 20 hours and 50 minutes

E 23 hours

Q28. What number comes next in the sequence?

-42, -31, -20, -9, ...

A -1

B 0

C 1

D 2

E 3

Q29. What is the 100th term of the sequence?

14, 24, 34, 44, 54, 64, ...

A 1040

B 2004

C 94

D 104

E 1004

Q30. Three consecutive numbers multiply together to make 1716.

Which is the median number?

A 11

B 12

C 13

D 14

E 15

Q31. What is $40 \times 0.08 \times 0.25$?

A 0.8

B 0.6

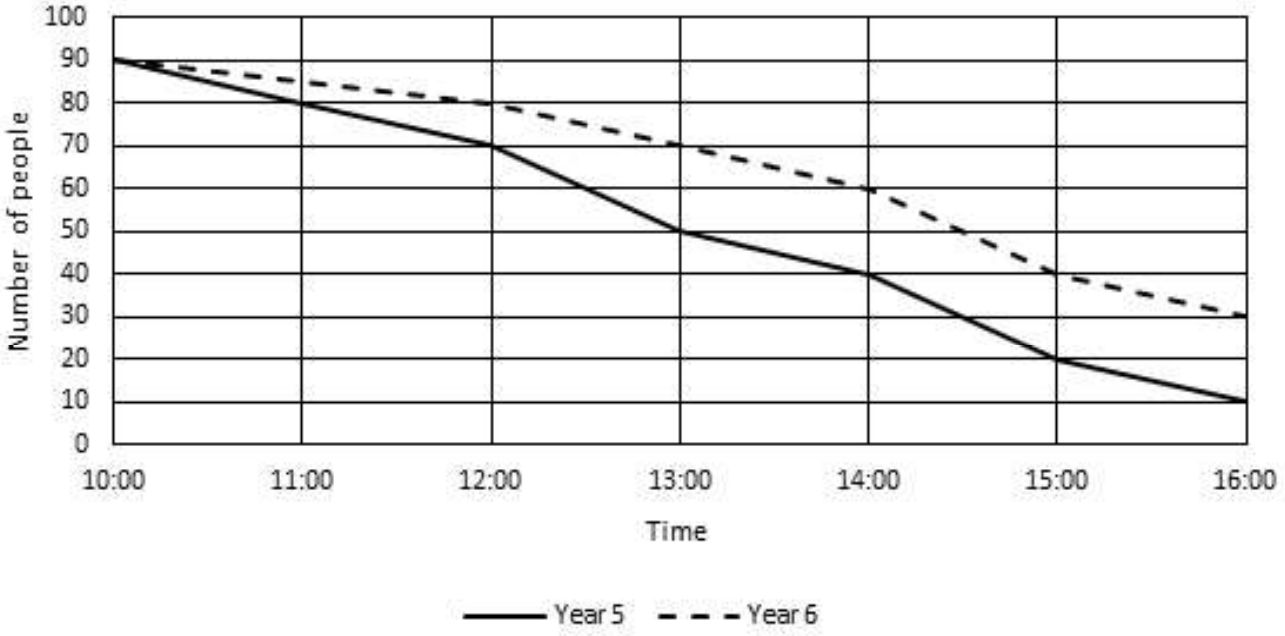

C 1.2

D 0.4

E 1.5

Q32. The graph shows the length of time that all the Year 5 and 6 pupils stayed at a school fair.

All Year 5 and 6 pupils were present at the start of the fair as they were performing an opening show at 10:00.

What fraction of the Year 5 and 6 pupils were still at the fair at 13:00?

A $\frac{1}{3}$

B $\frac{2}{5}$

C $\frac{2}{3}$

D $\frac{1}{2}$

E $\frac{3}{5}$

Q33. Hari drives for 40 minutes at an average speed of 45 km/h.

Mari does the same journey but drives at an average speed of 40 km/h.

If Hari and Mari set off at the same time, how many minutes sooner does Hari arrive at the destination?

A 1 minute

B 2 minutes

C 3 minutes

D 4 minutes

E 5 minutes

Q34. $\frac{42}{5} + \frac{37}{6} =$

A $14\frac{1}{6}$

B $16\frac{1}{10}$

C $14\frac{9}{15}$

D $14\frac{17}{30}$

E $13\frac{7}{30}$

Q35. Mrs Swatch's watch says the correct time on Monday at 12 noon.

Then her watch starts to run slowly and loses one minute every 10 minutes.

What time does Mrs Swatch's watch say at 18:00 the same day?

A 17:18

B 17:24

C 16:44

D 16:54

E 18:04

Q36. Which is the first square number to exceed 1 million?

A 1002001

B 1000004

C 1000012

D 1020201

E 1000240

Q37. A £5 note weighs 0.7 g, and a £10 note weighs 0.85 g.

If I have an equal number of £5 and £10 notes that weigh 6.2 g altogether, how much money do I have?

A £40

B £45

C £50

D £55

E £60

Q38. To check if a number is divisible by 11, it is possible to alternate a minus and plus sign between the digits to see if the resultant number is divisible by 11.

For example, if we want to check if 282579 is divisible by 11:

2 – 8 + 2 – 5 + 7 – 9 = -11, which is divisible by 11.

Therefore, 282579 is divisible by 11.

Note that 0 × 11 = 0, so 0 is considered a multiple of 11.

Which of the following is divisible by 11?

A 2222222

B 7777777

C 88888888

D 9999999

E 111111111

Q39. There are 4 brothers.

Barry is 8, Harry is 11 and Larry is 14.

When Gary joins them, the mean age of the brothers goes down to 10.

How old is Gary?

A 7

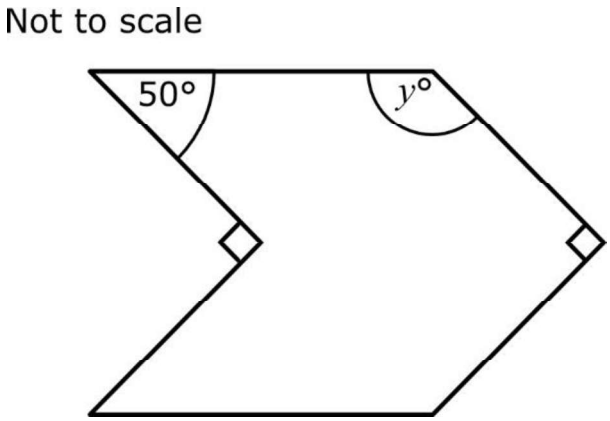

B 8

C 9

D 10

E 11

Q40. The hexagon has a horizontal line of symmetry.

What is the value of angle y?

A 100°

B 110°

C 120°

D 130°

E 140°

Q41. Pia thinks of a number.

First, she squares her number and then she adds 40 to the result.

Finally, she divides that result by 5.

Pia gets an answer of 13.

What was Pia's original number?

A 6

B 11

C 7

D 10

E 5

Q42. Nandini says:

"Adding 30 to my number and then multiplying by 2 is the same as multiplying my original number by 12."

What is Nandini's number?

A 14

B 3

C 4

D 6

E 8

Q43. X, Y and Z all work at the same company and get their first drink from the refreshment centre when arriving at work at 08:00.

Thereafter, X goes to get a drink every 40 minutes, Y goes every 15 minutes and Z every 30 minutes.

What is the next time that X, Y and Z meet at the refreshment centre?

A 09:00

B 09:30

C 10:00

D 10:30

E 12 noon

Q44. Let x be a whole number.

$5x > 174$ and $6x < 211$

What is the value of x?

A 32

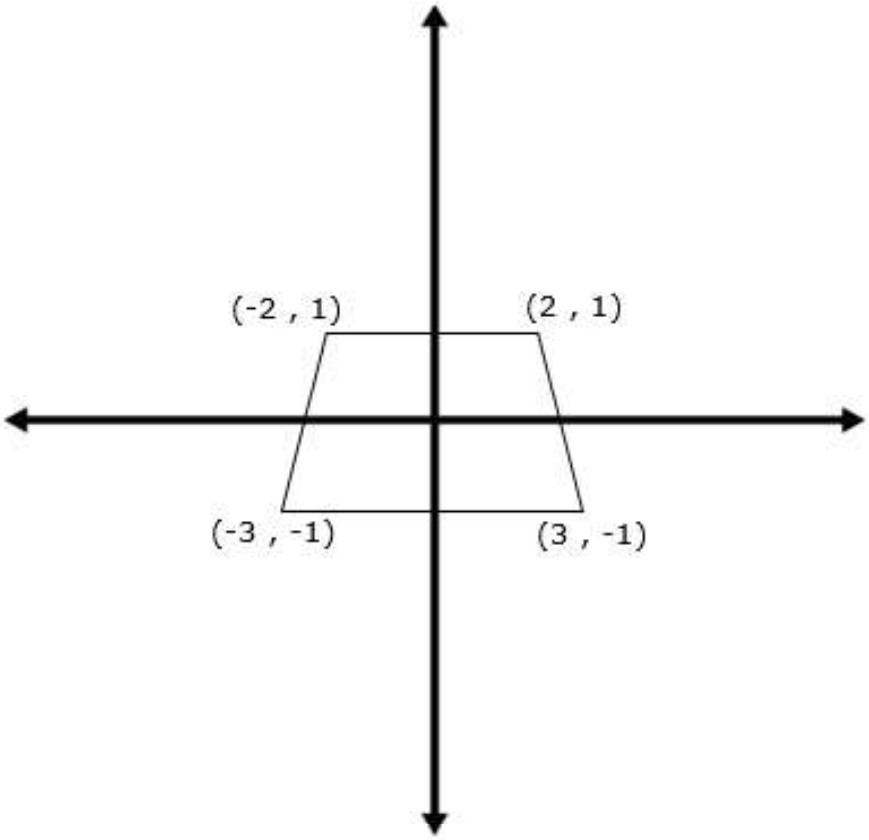

B 33

C 34

D 35

E 36

Q45. A trapezium is drawn with vertices at (-2, 1), (2, 1), (3, -1) and (-3, -1).

The trapezium is reflected in the x-axis.

What is the area of overlap of the original trapezium and the reflected trapezium?

A 10 units^2

B There is no overlap.

C 7 units^2

D 8 units^2

E 9 units^2

Q46. Let r4.30 mean 'the remainder when 4 is divided into 30'.

So, r4.30 = 2

What is the value of r6.51 × r8.100?

A 30

B 12

C 24

D 18

E 15

Q47. Let the price of gold per gram be £50.

Let the price of a diamond per gram be £10 000.

A jeweller makes rings with gold and diamonds.

The cost of a ring, **R**, in pounds (£) is:

R = 50wg + 10000wd + 10% (50wg + 10000 wd),

where **wg** is the weight of the gold in g, and **wd** is the weight of the diamond in g.

How much does a ring that consists of 6 g of gold and 0.2 g of diamond cost to buy?

A £2675

B £2400

C £2530

D £2830

E £2560

Q48. 12.5% of 50 = ?

A 4.75

B 6.5

C 5.5

D 6.25

E 5.75

Q49. Mr Mow cuts his lawn when the grass is 5 cm high.

Mr Mow cut his grass on 1st June to a height of 1 mm.

The grass grows between 1 mm and 5 mm per day depending on the weather.

What is the range of dates for when Mr Mow can expect to cut his grass next?

A 21st June to 21st July

B any day in July

C 11th June to 12th July

D 30th June to 10th July

E 11th June to 20th July

Q50. Harry works in a supermarket and is asked to stack boxes of crackers.

The boxes are cubes that measure 20 cm × 20 cm × 20 cm.

The floor space in which to stack the boxes is limited to 1 m × 1 m, and Harry can go up to a maximum height of 4 m.

What is the maximum number of boxes that Harry can put in the stack?

A 500

B 250

C 1000

D 750

E 800

End of Test

SELECTIVE ELIGIBILITY TEST (S.E.T.)

PRACTICE TEST 19

English

50 minutes

Instructions:

- This test contains 34 questions, which are split over 4 sections
- You are advised to spend the time suggested below on each section:
  Section A: Spelling – 5 minutes
  Section B: Text 1 – 25 minutes
  Section C: Text 2 – 10 minutes
  Section D: Comparison of Texts 1 & 2 – 10 minutes
- These timings are just recommendations – you are allowed to spend as much of the given time as you like on each section, and you may return to questions at any time during the test.
- Read the instructions for each section carefully.
- Mark all your responses on the separate answer sheet provided.

Your time will start when you turn over the page.

Section A

Which of these is the correct spelling?

1.
A Catagorise
B Catagorize
C Cattagorise
D Categorise
E Cattegorise

2.
A Exilaration
B Exileration
C Exhileration
D Exhilarasion
E Exhilaration

3.
A Indispensable
B Indispenseable
C Indispensible
D Indespensable
E Indespencable

4.
A Serprise
B Serprize
C Surprise
D Surprize
E Suprise

5.

A Rythmical

B Rhythmical

C Ryhthmical

D Rythemical

E Rhythemical

6.

A Perseverance

B Persaverance

C Persaverence

D Perseverence

E Percerverance

Section B

The extract below is from *The Ingenious Edgar Jones,* by Elizabeth Garner.

Read the extract carefully and then answer the questions that follow.

The night that William Jones's world changed began like any other.

At six o'clock he rose from his bed, made his prayers and his ablutions. At quarter-past six he took tea and toast with his wife, Eleanor, in their front parlour. And at half-past six, to the beat of the bell of the grandfather clock, he buttoned up his coat, pulled his hat down upon his head, kissed his wife and lifted the latch of his front door.

The steady pace of his footsteps marked out the half-hour walk across Oxford. It was a cold February night. The sky was clear and pinpricked with stars. The moon was nothing but a splinter, the curl of a stray feather stuck to the velvet dark of the sky. William pulled up his collar and watched the mists of his breath rope through the air before him.

He always loved the turning from the lanes of Jericho out on to St Giles. It was an invisible boundary between the quiet domestic world where he was a loving husband and the University where he was a watchman at the college gates. Every time he trod this path he would reflect how the change in the streets echoed the differences between his worlds. The roads of Jericho twisted in upon themselves, and a man could get easily lost. It was sometimes thus when he was sitting by the fireside with his wife. The conversation would ebb and flow between them, full of affection, and talk of the daughter that was blossoming in her belly. But there were times when there were shadowed corners in their speech, when a thing might not mean to Eleanor what it meant to him, and he would feel that he had taken a wrong turning down a dark alley, and was sitting in a room that seemed in outwards appearance to be his home, but was not.

Whereas when he emerged on to the University streets, there stood the broad walls of the colleges, set shoulder to shoulder, their domes, spires and battlements pointing magnificently towards the heavens. And here William knew exactly who he was: he was Porter Jones, warden of the nights, the man who watched over great minds as they slumbered. Here William had a place and a function, and no one could shift him from it.

But on this particular evening, the University was retreating from him as he walked through it. It was often thus when the moon waned. The college walls were swallowed by the night, the lamps that hung over the entrances illuminated them in piecemeal: the mouth of a doorway, say, or the curve of a window. As the scholars slept, it was as if the University simply dissolved itself, brick by brick, stone by stone, and drifted off into the night, leaving only a cornice here, a buttress there, and a few curious gargoyles peering down at the shattered world below.

But if William Jones understood one thing in life then it was the ways of Oxford. He had been at the college his whole life. He had worked his way up from kitchen boy to scout

to watchman. He had walked the streets at dawn, dusk, and all the hours in between. He knew every whim of the city and nothing could break his stride. He marched past the expanse of shadow that was St John's College and turned left down Broad Street. There was Balliol at his shoulder, and its companion, Trinity, with its vaulted roof and gated garden. And huddled next to Trinity, the White Horse tavern, with its belly of a window pushing out upon the street. Every night it framed the same tableau: roaring men, jostling against each other, their backs bent by the beams. It was still remarkable to William that it was here, two years previously, that he had found the woman who had made him a husband. But that was the truth, and all he could really conclude from it was that there was opportunity in any corner of this world if only one had the wits and the will to look for it.

William was by the crossroads at the bottom of Broad Street when the sky split open. He did not register the start of it. A single star fell from its fixture, flared through the sky and was gone, leaving a trail of gold, as if the velvet damask of the heavens had been sliced open. No sooner had it passed than another fell in its wake, and another, and another.

William was striding up Hollywell Street when he noticed the change in the elements. The road before him had a golden sheen about it, turning the cobbles into a river of scattered sovereigns. He looked up. The stars were falling so quick on the heels of one another that they could not be separated. The sky was a smelting pot of liquid light, picking out the ridges of the rooftops. And as the sky spat and hissed, William saw that the college he was set to guard had come alive. It was a creature with a bristled back. The bell tower was the neck of the beast, flame-snouted, snarling into the night. William shook his head, as if to shake the fancy from his mind. The college was a thing of brick and stone and well he knew it. A porter got his position for his watchfulness, not for his dreaming.

He set his shoulder to the door and walked across the threshold.

7. Think about what the opening line tells us. Which one of these is NOT correct?

Select **one** answer.

A William Jones will be the focus of the extract.

B It is evening time.

C William Jones is the title character's father.

D The following paragraph will most likely describe William Jones' usual routine.

E Something dramatic or significant will happen that night.

8. Think about the sequence of events described in lines 2–5. Which of these is NOT correct?

Select **one** answer.

A William got out of bed at 18:00.

B It took William quarter of an hour to pray, wash and dress.

C William met up with his wife in the front room.

D William's wife had made food and a hot drink for him to take with him.

E William was ready to leave exactly half an hour after getting up.

9. 'The moon was nothing but a splinter, the curl of a stray feather stuck to the velvet dark of the sky.' (lines 7–8).

Which of the following statements are true?

Select all that are correct.

A This sentence contains two metaphors.

B There is a strong contrast between the image of something sharp and the image of something soft.

C The moon was partially obscured by downy clouds.

D The moon was a thin crescent.

E There were birds silhouetted against the moon.

10. Select the **TWO** words that could replace 'rope' in line 9 without changing the meaning of the text.

A Bind

B Twist

C String

D Coil

E Cord

11. Why is Jericho significant to William?

Select all that are correct.

A It is the area where he works.

B It is the area where he lives.

C It represents his home life as distinct from his work life.

D It is the name of the university where he works.

E The labyrinth of roads in Jericho have become a metaphor for how he sometimes feels lost or out of place at home.

12. Think about what we learn of William's wife in the extract. Which of the following is NOT correct?

Select **one** answer.

A She is called Eleanor.

B She is pregnant.

C She is expecting to have a girl.

D She met William in a pub.

E She has been married to William for many years.

13. Select the **TWO** most accurate words to describe the university buildings.

A Modest

B Elaborate

C Imposing

D Austere

E Modern

14. Which of the following pairs of words from the text are architectural features?

Select all that are correct.

A ‘dome’ and ‘spire’

B ‘battlement’ and ‘buttress’

C ‘tavern’ and ‘tableau’

D ‘cornice’ and ‘gargoyle’

E ‘damask’ and ‘porter’

15. Which Oxford colleges are named in the extract?

Select all that are correct.

A Balliol

B Trinity

C St John’s

D White Horse

E St Giles’

16. Select the **TWO** most accurate words to describe how William feels on the university streets (lines 21–25).

A Humble

B Assured

C Uneasy

D Purposeful

E Misplaced

17. Look carefully at lines 26–32. Which of these is NOT correct?

Select **one** answer.

A There was very little moonlight.

B It was very dark on the streets.

C The buildings were falling into ruin.

D Parts of the buildings were lost in shadow.

E Only the parts of the buildings lit by lamps were visible.

18. Which specific words and phrases in lines 26–32 help to create the image of the college buildings disappearing?

Select all that are correct.

A Illuminated

B Swallowed

C Dissolved

D Drifted off

E Waned

19. Think about how the tavern is described. Which of these is NOT correct?

Select **one** answer.

A It is adjacent to Trinity College.

B Its window bulged out over the street.

C Its ceilings were low.

D It is always busy at night.

E It is in a surprising location.

20. Look carefully at lines 46–50. What literary techniques are used in this paragraph?

Select all that are correct.

A Alliteration

B Onomatopoeia

C Metaphor

D Simile

E Repetition

21. Compare the description of the sky in the eighth paragraph (lines 46–50) to the earlier description in the third paragraph (lines 6–9).

Which of these statements are true about BOTH?

Select all that are correct.

A The sky is likened to soft, dense cloth.

B Stars pierce or slice through the fabric of the sky.

C Stars are described as being stuck or fixed to the surface of the sky.

D The moon is not prominent.

E The stars flash with a golden light.

22. Which of the following words from lines 51–60 are examples of onomatopoeia?

Select all that are correct.

A Sheen

B Smelting

C Spat

D Hissed

E Snarling

23. Think about why William chooses to ignore the strange phenomena. Which of these is NOT correct?

Select **one** answer.

A His job is important to him because of how it makes him feel, and he is not prepared to let anything get in the way of that.

B He doesn't want anyone to think that he is prone to fanciful notions.

C He believes that he understands Oxford completely, and this is outside his understanding.

D He is too caught up in his own reveries to pay much attention to it.

E He does not want to believe his own eyes and the implications of what he has seen.

Section C

The extract below is taken from *Gaudy Night,* by Dorothy L. Sayers.

Read the extract carefully and then answer the questions that follow.

Harriet Vane sat at her writing-table and stared out into Mecklenburg Square. The late tulips made a brave show in the Square garden, and a quartet of early tennis-players were energetically calling the score of a rather erratic and unpractised game. But Harriet saw neither tulips nor tennis-players. A letter lay open on the blotting-pad before her, but its image had faded from her mind to make way for another picture. She saw a stone quadrangle, built by a modern architect in a style neither new nor old, but stretching out reconciling hands to past and present. Folded within its walls lay a trim grass plot, with flower-beds splashed at the angles, and surrounded by a wide stone plinth. Behind the level roofs of Cotswold slate rose the brick chimneys of an older and less formal pile of buildings – a quadrangle also of a kind, but still keeping a domestic remembrance of the original Victorian dwelling-houses that had sheltered the first shy students of Shrewsbury College. In front were the trees of Jowett Walk and, beyond them, a jumble of ancient gables and the tower of New College, with its jackdaws wheeling against a windy sky.

Memory peopled the quad with moving figures. Students sauntering in pairs. Students dashing to lectures, their gowns hitched hurriedly over light summer frocks, the wind jerking their flat caps into the absurd likeness of so many jesters' cockscombs. Bicycles stacked in the porter's lodge, their carriers piled with books and gowns twisted about their handlebars. A grizzled woman don crossing the turf with vague eyes, her thoughts riveted upon aspects of sixteenth-century philosophy, her sleeves floating, her shoulders cocked to the academic angle that automatically compensated the backward drag of the pleated poplin. Two male commoners in search of a coach, bareheaded, hands in their trousers-pockets, talking loudly about boats. The Warden – grey and stately – and the Dean – stocky, brisk, bird-like, a Lesser Redpoll – in animated conference under the archway leading to the Old Quadrangle. Tall spikes of delphinium against the grey, quiveringly blue like flames, if flame were ever so blue. The college cat, preoccupied and remote, stalking with tail erect in the direction of the buttery.

It was all so long ago; so closely encompassed and complete; so cut off as by swords from the bitter years that lay between. Could one face it now? What would those women say to her, to Harriet Vane, who had taken her First in English and gone to London to write mystery fiction, to live with a man who was not married to her, and to be tried for his murder amid a roar of notoriety? That was not the kind of career that Shrewsbury expected of its old students.

She had never gone back; at first, because she had loved the place too well, and a clean break seemed better than a slow wrenching-away; and also because, when her parents had died and left her penniless, the struggle to earn a livelihood had absorbed all her time and thought. And afterwards, the stark shadow of the gallows had fallen between her and that sun-drenched quadrangle of grey and green. But now—?

24. What is happening in the first paragraph of the extract?

Pick the **most accurate** explanation.

A Harriet is watching a game of tennis from her window.

B Harriet is writing a letter about a recent trip she made.

C Harriet is picturing in her mind's eye a place from her past.

D Harriet is looking out of her window at Shrewsbury College.

E Harriet is imagining what Oxford might look like.

25. Select the **TWO** most accurate words to describe the quadrangle in lines 5–8.

A Old-fashioned

B Timeless

C Smart

D Gaudy

E Fashionable

26. Look carefully at the second paragraph (lines 15–27). Which of these is NOT correct?

Select **one** answer.

A Harriet imagined some people riding on a four-wheel bike.

B Some people moved at a leisurely pace whilst others rushed around.

C An aging female academic was preoccupied by philosophy.

D The head of the college is likened to a bird.

E There were some tall blue flowers that looked like flames.

27. Which of the following words from the text are terms for different personnel at the university?

Select all that are correct.

A Porters

B Redpoll

C Dean

D Warden

E Don

28. Think about the way in which Harriet remembers Shrewsbury College in lines 15–27. Which of these is NOT correct?

Select **one** answer.

A The memory of the place is extremely detailed.

B She seems to be remembering a particular day and scene.

C The memory is very specific with regards to the people who are there and what they are doing.

D She remembers that the weather was cold and still.

E She remembers the type of flowers that were growing and the mannerisms of the cat.

29. Look carefully at lines 28–29. Which of these is NOT correct?

Select **one** answer.

A Many years have passed since Harriet attended Shrewsbury College.

B Her college years are over and completely separate from her present life.

C These lines include a rhetorical question.

D Harriet's college years had gradually merged into her current life.

E The years between Harriet's time at college and her present have not all been pleasant.

30. What has happened to Harriet since she graduated from college?

Select all that are correct.

A She moved to the capital to become an author.

B Her partner committed murder.

C She became infamous when she was charged for the murder.

D She was orphaned.

E She had to work hard to survive.

Section D

Answer the following questions using BOTH extracts.

31. Think about how the two texts are similar. Which of these is NOT correct?

Select **one** answer.

A They are written in the third person.

B They are written in the past tense.

C The present setting is a university town.

D The narrator reveals the main character's thoughts.

E The author makes use of metaphor.

32. Think about William and Harriet. From the texts, which of these statements are true about BOTH?

Select all that are correct.

A They are very familiar with certain colleges.

B They are or have been married.

C They think fondly of their respective colleges.

D The colleges represent positive things to them.

E They are figuratively distanced from the colleges by darkness or shadows.

33. Select the **TWO** quotes, one from each text, that best illustrate the contrast between the two texts in terms of time of day.

A 'there were shadowed corners in their speech' (Extract 1, lines 17–18)

B 'The college walls were swallowed by the night' (Extract 1, lines 27–28)

C 'like flames, if flame were ever so blue' (Extract 2, line 26)

D 'the stark shadow of the gallows had fallen' (Extract 2, line 37)

E 'that sun-drenched quadrangle of grey and green' (extract 2, line 38)

34. The university town in both extracts is Oxford. Think about how it is described in the two texts. Which of these is NOT correct?

Select **one** answer.

A Extract 1 focuses on the buildings, whereas Extract 2 notices natural elements such as flowers, trees and animals.

B The two texts mention different colleges.

C The streets are empty in Extract 1 but Extract 2 is teeming with people.

D Both extracts describe the architecture of buildings and mention street names.

E The buildings in Extract 1 are more modern and less formal.

11+ S.E.T. Practice Test 19 – English – Answers

Marking Guidance

For each question, the maximum number of marks available is shown.

Where questions require multiple answers and use the rubric, '**Select all that are correct**', negative marking should also be applied, whereby 1 mark is deducted for each incorrect answer selected down to 0 marks (note that the number of marks per question cannot be negative).

For example:

If a question is worth 2 marks and requires options A, B and C to be selected:

Award 2 marks for A, B **and** C selected or 1 mark for any two correct answers selected.

Award 1 mark for A, B, C **and** D **or** E selected (2 marks – 1 incorrect = 1 mark).

Award 0 marks for A, B, C, D **and** E selected (2 marks – 2 incorrect = 0 marks).

Award 0 marks for A, B and E selected or equivalent (1 mark – 1 incorrect = 0 marks).

1.	D	[1 mark]
2.	E	[1 mark]
3.	A	[1 mark]
4.	C	[1 mark]
5.	B	[1 mark]
6.	A	[1 mark]
7.	C	[1 mark]
8.	D	[1 mark]
9.	A, B, D	[2 marks]
10.	B, D (both answers must be correct)	[1 mark]
11.	B, C, E	[2 marks]
12.	E	[1 mark]
13.	B, C (both answers must be correct)	[1 mark]
14.	A, B, D	[2 marks]
15.	A, B, C	[2 marks]
16.	B, D (both answers must be correct)	[1 mark]
17.	C	[1 mark]
18.	B, C, D	[2 marks]
19.	E	[1 mark]

20.	A, C, E	[2 marks]
21.	A, B, D	[2 marks]
22.	C, D, E	[2 marks]
23.	D	[1 mark]
24.	C	[1 mark]
25.	B, C (both answers must be correct)	[1 mark]
26.	A	[1 mark]
27.	A, C, D, E	[3 marks]
28.	D	[1 mark]
29.	D	[1 mark]
30.	A, C, D, E	[3 marks]
31.	C	[1 mark]
32.	A, C, D, E	[3 marks]
33.	B, E (both answers must be correct)	[1 mark]
34.	E	[1 mark]

Total: **48 marks**
