SELECTIVE ELIGIBILITY TEST (S.E.T)

PRACTICE TEST 4

Mathematics

45 minutes

Instructions

- This test contains 50 questions.
- For each question, choose the correct answer and then mark its letter on the answer sheet.

Your time will start when you turn over the page.

Q1. What is the sum of 'half of three' and 'half of seven'?

A 4.5
B 5.5
C 3.5
D 5
E 4

Q2. What is 'a quarter of 12' subtracted from 'a third of 15'?

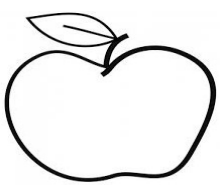

A 2
B −2
C 1
D −1
E 0

Q3. What is the answer to ½ divided by 5?

A $^1/_{10}$
B 10
C 2.5
D 0.001
E 0.4

Q4. What is the most likely weight of an apple?

A 1 g
B 100 g
C 1 kg
D 10 cm
E 10 g

Q5. Tom was born in December 1993. Which birthday does he celebrate in 2017?

A 23rd
B 14th
C 13th
D 24th
E 33rd

Q6. Mrs. Singh plants a flower, which measures 5 cm in height, on the first day of July. On 29th July, the flower is 85 cm tall. How much does the plant grow on average each week?

A 16 cm
B 18 cm
C 20 cm
D 22 cm
E 24 cm

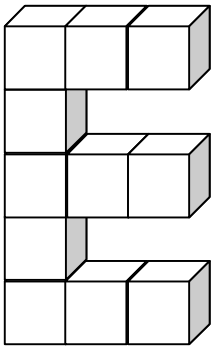

Q7. Sam has a rabbit, two dogs and a cat. The rabbit eats 100 g of food once a day. The dogs each have 200 g of food three times a day while the cat eats 150 g of food twice a day. How much pet food does Sam have to supply to his animals each day?

A 1.2 kg
B 1.6 kg
C 800 g
D 1.01 kg
E 1.4 kg

Q8. How many letters of the word STRANGE have a vertical or horizontal line of symmetry?

A 1
B 5
C 2
D 4
E 3

Q9. The letter E is formed from 11 cubes, each measuring 1 cm^3.
The cubes are stuck together as shown and then the shape is painted.
What is the area of paint required to cover the shape?

A 46 cm^2
B 66 cm^2
C 55 cm^2
D 48 cm^2
E 50 cm^2

Q10. What fraction of half-an-hour is 5 minutes?

A $^1/_{12}$
B $^1/_8$
C $^1/_7$
D $^1/_6$
E $^1/_9$

Q11. At midnight, all the digits of a 24-hour clock are the same i.e.

How many times are all the digits on a 24-hour clock the same in 24 hours?

A 12
B 2
C 3
D 4
E 5

Q12. A full container holds 50 litres of water. It starts to leak at 6.00 p.m. and water drips out at a rate of 1 litre every quarter of an hour. By what time the next day is the container empty?

A 6.30 p.m.
B 6.00 a.m.
C 6.30 a.m.
D 3.30 a.m.
E 5.30 p.m.

Q13. The minute hand of a clock turns through 720° as the time goes from 2.00 p.m. to 4.00 p.m. Through how many degrees does the hour hand turn during the same two-hour period?

A 45°
B 60°
C 90°
D 120°
E 135°

Q14. The table shows the length of time for which several Prime Ministers held office.

Harold Macmillan	10 January 1957 – 19 October 1963
Anthony Eden	6 April 1955 – 10 January 1957
Winston Churchill	26 October 1951 – 6 April 1955
Clement Attlee	26 July 1945 – 26 October 1951
Ramsay MacDonald	5 June 1929 – 7 June 1935

Which of the listed Prime Ministers' terms in office was for the longest duration?

A Harold Macmillan
B Anthony Eden
C Winston Churchill
D Clement Attlee
E Ramsay MacDonald

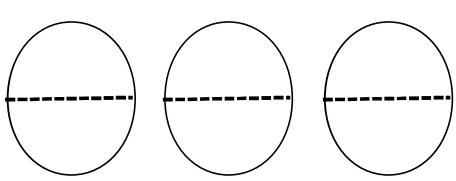

Q15. It costs £12 for an adult to enter the zoo, while children's tickets cost £5. How much change do the Singh family, consisting of two parents and three children, receive from £50 when they pay the entrance fee?

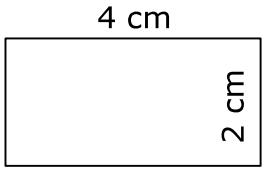

A £39
B £19
C £11
D £21
E £25

Q16. What is the first three-digit multiple of 8?

A 888
B 100
C 102
D 104
E 106

Questions 17 and 18 use the following shapes:
ovals, which each have an area of 4 cm² and rectangles that measure 4 cm x 2 cm, as shown.

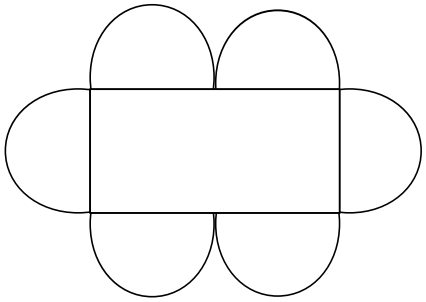

Not drawn to scale

The ovals are cut in half along the dotted line as shown above.

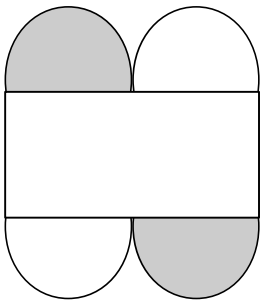

Q17. What is the area of the following shape, made from a rectangle and six semi- ovals?

Not drawn to scale

A 12 cm²
B 14 cm²
C 16 cm²
D 18 cm²
E 20 cm²

Q18. A second shape is formed from an identical rectangle and four of the semi-ovals. What percentage of the following shape is shaded?

Not drawn to scale

A 10%
B 15%
C 28%
D 25%
E 22%

Q19. A car travels 30 km at 60 km/h. Then it travels 10 km at a speed of 30 km/h. What was the car's average speed for the 40 km journey?

A 20 km/h
B 45 km/h
C 30 km/h
D 40 km/h
E 48 km/h

Q20. Arya takes Test A and scores 80%. Tim takes Test B and scores 80%. Arya scores 4 more marks than Tim. If there is a total of 40 marks available in Test A, how many marks are available in Test B?

A 35
B 30
C 40
D 38
E 50

Q21. How many factors has the number 48?

A 8
B 11
C 12
D 10
E 9

Q22. If 2787 x 73 = 203451, what is the value of 27.87 x 0.73

A 203.451
B 2034.51
C 20.3451
D 2.03451
E 20345.1

Q23. A shop opens between 8.30 a.m. and 5.30 p.m. every weekday. The shop is open from 8.00 a.m. until 12 noon on Saturdays and closed all day Sunday. For how many hours is the shop open each week?

A 36 hours
B 45 hours
C 63 hours
D 54 hours
E 49 hours

Q24. A shop has running costs of £210 each week. If it sells all items at a profit of 50%, how much produce must the shop sell each week, to ensure it covers its running costs?

A £210
B £420
C £630
D £840
E £1050

Q25. Single apples are on sale. If three apples cost less than £1.20 and two apples cost more than 77 p. What is the price of one apple?

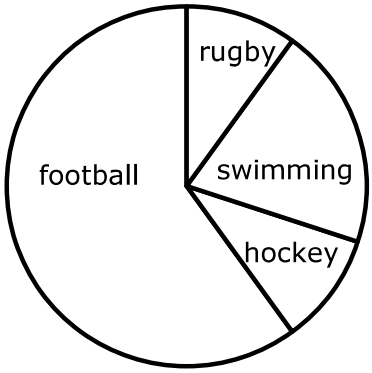

A 40 p
B 35 p
C 37 p
D 39 p
E 38 p

The following pie charts relate to questions 26 and 27.
A class, made up of ten boys and twenty girls, are asked which sport they most enjoy watching.
The results are put into two separate pie-charts.
Study the charts and then answer the following two questions.

Boys

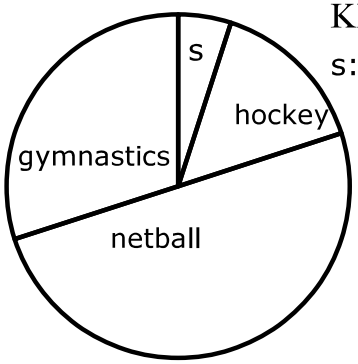

Favourite sport to watch

10 boys

Girls

Favourite sport to watch

KEY:
s: swimming

20 girls

Q26. Which is the least popular sport to watch of the class?

A rugby
B swimming
C hockey
D football
E netball

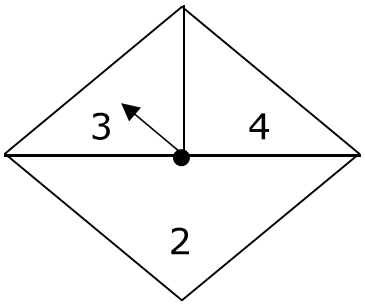

Q27. Which sport do most children in the class choose as their favourite to watch?

A rugby
B gymnastics
C hockey
D football
E netball

Q28. There are 10 balls in a bag. Three are green, two red and five blue. Matt puts his hand in the bag and randomly picks out a ball. What is the chance that it isn't red?

A 1/5
B 4/5
C 1/7
D 2/3
E 1/3

Q29. Using the following spinner, the arrow can land on any one of three numbers. What is the chance that it will land on an even number?

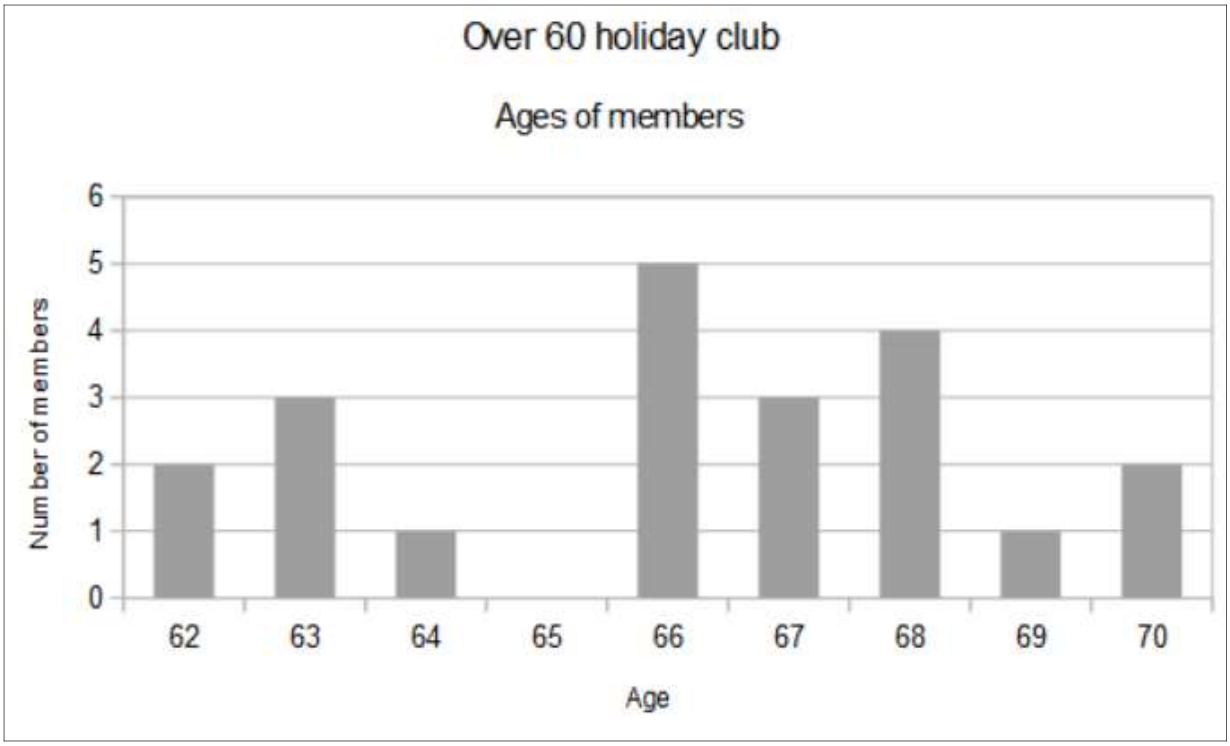

A 1/4
B 1/2
C 3/4
D 2/3
E 1/3

Q30. It costs £10 to rent a canoe for one hour on a boating lake. Thereafter, the price is £2 for every additional half hour. How much does Tim have to pay if he hires the canoe from 11.00 a.m. until 2.30 p.m.?

A £20
B £35
C £25
D £30
E £10

The graph relates to questions 31-33 and shows the ages of the members of an over 60 club.

Q31. What is the mode of the ages of the members of the holiday club?

A 62
B 63
C 64
D 66
E 67

Q32. What is the median of the members' ages ?

A 64
B 65
C 66
D 67
E 68

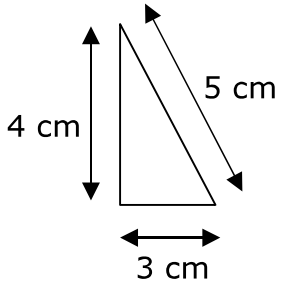

Q33. What is the range of the ages?

A 62
B 70
C 8
D 7
E 66

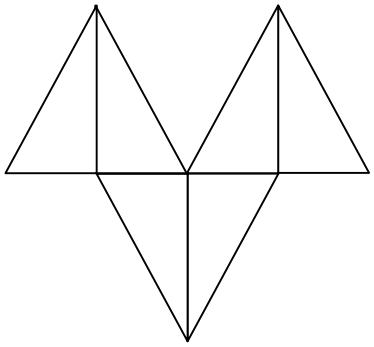

Q34. What is the answer in kg if you subtract 150 g from 5 kg?

A 4.5 kg
B 3.85 kg
C 4850 kg
D 4.085 kg
E 4.85 kg

Q35. Consider the right-angled triangle.

Six of these triangles are made into the following shape.
What is its perimeter?

A 36 cm
B 30 cm
C 38 cm
D 32 cm
E 40 cm

Q36. Ben starts to measure the rainfall every day during a week in April. The average rainfall after six days is 8 mm. The rainfall on the final day is 1 mm. What is the average rainfall for the seven days?

A 9 mm
B 7 mm
C 48 mm
D 8 mm
E 4.5 mm

Q37. Arya purchases a bag of crisps for 37p.
She pays with two coins and is given two coins in change.
How much change does she receive?

A 2 p
B 7 p
C 3 p
D 12 p
E 4 p

Q38. Ben thinks of a number. He adds 5, doubles it and then subtracts 4.
The answer is 12. What is Ben's original number?

A 1
B 9
C 27
D 3
E 13

Q39. $n > 0$. If $n = n^2$, what is the value of n?

A 64
B 32
C 4
D 1
E 2

Q40. How many millilitres make up 2.75 litres?

A 2750
B 275
C 27500
D 27.5
E 2705

Q41. The scale of the following map is 1 : 1,000,000

Not drawn to scale

If the distance between two towns (marked with crosses) is 400 km in real life, what is the distance between the crosses on the map?

A 40 cm
B 2.5 cm
C 25 cm
D 4 mm
E 4 cm

Q42. Which of the following values would be in the middle if placed in descending order?

80% $^{17}/_{20}$ $^{7}/_{9}$ 0.8509 ¾

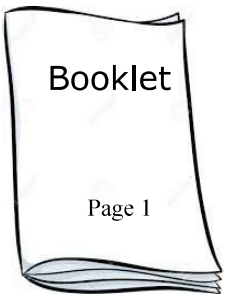

A 80%
B $^{17}/_{20}$
C $^{7}/_{9}$
D 0.8509
E ¾

Q43. Which of the following shapes **cannot** have a right-angle?

A triangle
B kite
C trapezium
D circle
E pentagon

A booklet is made up of 4 large A3 sheets of paper, folded in the centre and stapled along the fold. The front cover is counted as page 1. The penultimate page and back cover share the same A3 sheet with pages 1 and 2 and are numbered page 15 and 16 respectively.

The booklet relates to questions 44 – 46.

Q44. What are the page numbers in the centre of the booklet?

A 6 and 7
B 6 and 8
C 7 and 8
D 7 and 9
E 8 and 9

Q45. Which page number of the 16-page booklet shares the same side of an A3 sheet with page 4?

A 13
B 5
C 8
D 12
E 11

Q46. If a 64-page booklet were put together in the same way, which two pages share an A3 sheet with pages 7 and 8?

A 52 and 53
B 57 and 58
C 9 and 10
D 55 and 56
E 43 and 44

Q47. (0 , 5) and (5 , 0) are two points which are joined by a straight line. Which point lies on the same line?

A (0 , 3)
B (2 , 0)
C (2 , 3)
D (1 , 6)
E (2 , 2)

Q48. A bag and six identical packets of biscuits weigh 680 g. If the bag weighs 80g, how much does one packet of the biscuits weigh?

A 55 g
B 500 g
C 600 g
D 620 g
E 100 g

Q49. 50 can be written as a product of prime numbers.
For example, 2 x 5 x 5 = 50 and 3 x 7 = 21.

What is 200 as a product of prime numbers?

A 2 x 2 x 50
B 2 x 2 x 2 x 5 x 5
C 5 x 5 x 5
D 10 x 5 x 4
E 2 x 2 x 2 x 5

Q50. If the numbers from 1 – 100 are written out, how many times does the digit '5' appear?

A 20
B 19
C 10
D 21
E 9

SELECTIVE ELIGIBILITY TEST (S.E.T.)

PRACTICE TEST 4

English

50 minutes

Instructions:

- This test contains 34 questions, which are split over 4 sections
- You are advised to spend the time suggested below on each section:
  Section A: Spelling – 5 minutes
  Section B: Text 1 – 25 minutes
  Section C: Text 2 – 10 minutes
  Section D: Comparison of Texts 1 & 2 – 10 minutes
- These timings are just recommendations – you are allowed to spend as much of the given time as you like on each section, and you may return to questions at any time during the test.
- Read the instructions for each section carefully.
- Mark all your responses on the separate answer sheet provided.

Your time will start when you turn over the page.

Section A

Which of these is the correct spelling?

1.
A Handeling
B Handiling
C Handleing
D Handerling
E Handling

2.
A Disproov
B Dispruve
C Disspruve
D Disprove
E Dissprove

3.
A Narration
B Narattion
C Narasion
D Narrasion
E Narrassion

4.
A Ghastley
B Ghastly
C Gastly
D Gastley
E Gasterly

5.

A Curfue

B Currfew

C Currfue

D Curfew

E Curphew

6.

A Whispa

B Whispar

C Wissper

D Wisper

E Whisper

Section B

The extract below is from *Chicken Unga Fever,* by Dr Phil Whitaker.

Read the extract carefully and then answer the questions that follow.

GPs can be divided into two distinct groups: "buzzers" and "meeters". The former stay put in their consulting rooms, employing a variety of devices such as buzzers or intercoms to call their patients through. “Meeters”, on the other hand, walk along to collect each patient from the waiting room in person.

We are “meeters” in my practice. I like the brief interlude of physical activity, which helps clear the mind in readiness for the next consultation. Equally important is the opportunity to begin putting patients at ease, greeting them with a smile and making small talk as we walk the corridor together. The rapport-building helps the consultation get off to a good start, rather than the patient arriving "cold" at my consulting room door.

“Meeting” also provides valuable advance information. Musculoskeletal problems are the most obvious: back pain is instantly recognisable from the way someone gets out of their chair. Hip, knee and ankle pathology produce characteristic gaits. The severity of respiratory problems can be gauged by the degree of breathlessness with exertion. Eye contact, body posture, and facial expression when crossing the waiting room give clues as to the patient's state of mind — depression, acute anxiety, or frustration and anger all transmit themselves clearly, and one can prepare oneself for the likely tenor of the consultation.

“Waiting room diagnoses” are sometimes memorable, as in the case of Simon, a 45-year-old I went to collect a little while ago. His notes had already revealed him to be an infrequent attender, making it more likely that he would be coming about something significant. When I called his name, his wife got up to accompany him — often a sign of high levels of concern; sometimes indicative of a reluctant male being frogmarched to the doctor by a spouse who’s decided enough-is-enough. Both their faces were taut with worry. By the time Simon reached me I had the full picture. He was noticeably out of breath after just walking those dozen yards. A glance told me the reason: he was strikingly pale, a sign of gross anaemia. The amount of the oxygen-carrying red pigment (haemoglobin) in his blood was very low.

As we made our way along the corridor, I thought ahead. There are several types of anaemia, but by far the commonest is iron-deficiency. This arises either because of inadequate iron in the diet (rare in the UK), failure to absorb iron from food (coeliac disease is the most frequent culprit), or — most often — sustained loss of blood. Women of reproductive age quite commonly become anaemic from excessive menstrual bleeding. In a male of Simon’s age, however, a marked iron-deficiency anaemia is unusual and worrying — it is a typical presentation of gastrointestinal cancer, an

otherwise unsuspected tumour leaking small amounts of blood into the bowel day after day until haemoglobin levels fall sufficient to cause symptoms. By the time Simon, his wife, and I had seated ourselves in my consulting room, I was braced for a delicate discussion. And once Simon admitted that he'd been keeping quiet about periodic blood in his stools for some months, the path ahead was clear.

Since 2000, GPs have been able to refer suspected cancer cases under the "two week wait" (2WW) rule, ensuring that investigations are undertaken speedily. The only proviso is the patient must be made aware that cancer is a distinct possibility, both to ensure they attend the urgent appointment slot and to prepare the ground for any discussion that may be needed at the hospital. In Simon's case, he required direct inspection of his lower digestive tract. Colonoscopy is a fairly unpleasant procedure, not least because endoscopic inspection of the lower bowel is only possible after a purge with powerful laxatives. Simon was going to have to spend a couple of days staying very close to a loo.

There was a lot to explain and prepare him for, not least the fact that, were a bowel cancer to be discovered, there was a reasonable prospect of cure. Survival rates in the UK have more than doubled over the past thirty years, with at least half of patients being disease-free after ten years, rising to a 90% cure rate if the tumour is detected at an early stage. Even though the outlook is far from gloomy, and even though the 2WW rule has dramatically shortened the time spent in limbo waiting for results, the uncertainty can be very difficult to cope with. Simon and his wife were understandably anxious, but I was impressed by the phlegmatic way in which they greeted each new piece of information, all the more so because they have a young family. Simon's comments stayed with me: about how they would remain calm, and square up to whatever they needed to deal with.

A couple of weeks later, a fax brought the good news: Simon was clear of cancer. The bleeding was from an unusual blood vessel anomaly in the bowel wall, readily treatable by laser. He and his wife made an appointment a few days later to discuss the next steps. It was a genuine pleasure to see the smiles on their faces as they came across the waiting room towards me, a sight I would have missed were I a "buzzer" rather than a "greeter".

7. According to the narrator, what are the advantages of being a "meeter"?

Select all that are correct.

A It gives them the chance to get some fresh air.

B It gives them the chance to connect with their patients.

C It gives them the chance to stretch their legs.

D It gives them the chance to put patients at their ease.

E It gives them the chance to detect certain conditions in their patients.

8. Select the **TWO** words that are synonyms of 'distinct' in line 1.

A Large

B Separate

C Colossal

D Variable

E Different

9. What is 'small talk' (line 7)?

Select the **most accurate** definition.

A A very brief conversation

B Polite conversation about unimportant things

C Conversation about deep and meaningful things

D A short conversation between complete strangers

E An awkward conversation about difficult matters

10. Look carefully at lines 10–17. Which of these is NOT correct?

Select **one** answer.

A Breathlessness is associated with respiratory problems.

B How a patient rises from a chair can reveal if they have back problems.

C Knee problems can cause a patient to walk in a certain way.

D Hip problems can affect the way a patient walks.

E Lack of eye contact indicates extreme pain.

11. Why does the narrator find observing a patient's body language helpful?

Select the **most accurate** explanation.

A They can determine the length of consultation required.

B They can make a complete diagnosis before the consultation.

C It shortens the amount of time they need to spend with the patient.

D They can gauge whether they will be safe to see the patient alone.

E They can mentally prepare for what the consultation is likely to be like.

12. What are "Waiting room diagnoses" (line 18)?

Select the **most accurate** definition.

A Seriously ill patients waiting to see a doctor

B People who have a consultation with the doctor in the waiting room

C People who exhibit symptoms that are easy to identify

D Judgements made in the waiting room about a patient's condition

E Symptoms that are associated with a particular disease

13. According to the narrator, what can a wife accompanying her husband to an appointment be a sign of?

Select all that are correct.

A That the wife feels the husband needs to see a doctor

B That the wife is overprotective of her husband

C That the husband has not come for something trivial

D That the husband does not feel there is anything wrong with him

E That the husband has been dragging his feet about going to the doctor

14. Which **TWO** symptoms did the narrator spot in Simon before the consultation had even started?

A An unusually pale complexion

B Stomach pains

C Breathlessness

D Haemoglobin

E A strange gait

15. What can cause iron deficiency?

Select all that are correct.

A Heavy periods

B A diet that lacks iron

C Too much exercise

D Cancer

E The body being unable to absorb iron

16. What do the words 'infrequent attender' (line 20) tell us about Simon?

Select the **most accurate** explanation.

A He never got ill.

B He was too busy to visit the doctor regularly.

C He often failed to turn up for appointments.

D He did not feel that doctors were able to help him.

E He rarely made an appointment to see the doctor.

17. Select the **TWO** most accurate words to describe the type of doctor the narrator is.

A Dedicated

B Dismissive

C Diffident

D Compassionate

E Slapdash

18. Select the **TWO** words that are synonyms of 'proviso' in line 42.

A Confirmation

B Trepidation

C Condition

D Stipulation

E Validation

19. What do the words 'the path ahead was clear' (line 39) tell us?

Select the **most accurate** explanation.

A That the narrator knew exactly what was wrong with Simon

B That the narrator knew what action needed to be taken

C That the narrator was confident that Simon would be fine

D That Simon was being honest about his symptoms

E That Simon's future was looking uncertain

20. Why was it important for Simon to know that the narrator thought he could have cancer?

Select all that are correct.

A So that Simon would be prepared for this possible diagnosis

B So that Simon would try to rest as much as possible

C So that Simon could start investigating his condition

D So that Simon's wife would offer him the necessary support

E So that Simon would definitely attend his hospital appointment

21. Select the **TWO** words that the narrator would be most likely to use to describe Simon.

A Emotional

B Composed

C Amazing

D Hysterical

E Ignorant

22. What do we learn about Simon from the extract?

Select all that are correct.

A He is married.

B He is a father.

C He is scared of doctors.

D He is middle-aged.

E He did not have cancer.

23. What is the main point the narrator is making in this extract?

Select the **most accurate** explanation.

A Many people recover from cancer.

B You should never put off going to see a doctor.

C It is advantageous for a doctor to be a "meeter".

D Doctors can get a diagnosis wrong.

E An appointment with a doctor is nothing to worry about.

Section C

The extract below is from *War Doctor,* by David Nott.

Read the extract carefully and then answer the questions that follow.

Every now and then, at any time of day or night, we might hear the blaring of a car or pickup truck's horn in the distance, getting louder and louder as the vehicle sped towards us with its cargo of victims. The horns acted as a siren, and we'd know to get the emergency room ready so we could assess the patients and decide who needed to go straight into theatre. On one occasion the first patient to need our help turned out to be the wife of a local bomb-maker. At that time there were a lot of small factories opening up in Atmeh that were making explosives. These were fairly crude devices and few of the people making them knew what they were doing – they were mostly working at home, making it up as they went along, and putting their own families at terrible risk.

The woman's husband had apparently been making a bomb in his kitchen when it had detonated prematurely. The whole house was destroyed, the bomb-maker killed and his wife rushed to us with a fragment injury to her lower left leg. She was haemorrhaging significantly from the wound, which required a tourniquet to be placed immediately on the thigh.

The anaesthetist took a quick blood sample and put it through our very basic haemoglobinometer, a device which measures the red cell count in blood. It confirmed that she had a haemoglobin of 4 grams per litre – the normal amount of haemoglobin in our bodies, the stuff that carries oxygen in the blood, is between 12 and 15g/L. It was clear she had lost a great deal of blood. He quickly established her blood group and then went to get a pint of fresh blood of the right type from our dwindling supplies. Then, on the other arm, he set up a saline drip to replace some of the fluid that she had lost.

All this happened on the operating table in the dining room. The sister in charge set up the trolley with sterile drapes and instruments as the patient was given general anaesthetic. It was impossible to assess the wound properly as there was arterial bleeding, most likely from the superficial femoral artery in the leg. There was a large dressing on the top, which was acting as a local compression. I scrubbed up and prepared to operate.

One of the Syrian assistants, who didn't speak much English, was helping to lift the leg. As I prepped the limb with iodine, I asked the helper to take off the pressure dressing.

24. Look carefully at lines 1–5. Why was the sound of horns helpful to the narrator?

Select the **most accurate** explanation.

A It helped to keep him awake.

B It always woke him up.

C It told him an ambulance was on its way.

D It told him he needed to get ready to receive a patient.

E It told him that war had broken out.

25. Select the **TWO** words that are synonyms of 'crude' in line 7.

A Vulgar

B Simple

C Revolting

D Tricky

E Basic

26. What did the bomb-maker's wife require once she had reached the doctor?

Select all that are correct.

A A blood test

B The application of a tourniquet

C A blood transfusion

D A saline drip

E Antibiotics

27. What do the words 'dwindling supplies' (line 20) suggest?

Select all that are correct.

A The doctor had access to plenty of blood.

B The doctor had recently received a supply of blood.

C The doctor's blood supplies were running low.

D The doctor had had many patients requiring blood transfusions.

E It was not easy to get hold of more blood.

28. Which of the **TWO** following quotes alert us to the fact that the doctor was not working in a traditional hospital?

A 'go straight into theatre' (lines 4– 5)

B 'he set up a saline drip' (line 21)

C 'in the dining room' (line 22)

D 'sterile drapes' (line 23)

E 'I asked the helper' (line 29)

29. Look carefully at lines 25–27. Which of the following words from the lines are nouns?

Select all that are correct.

A Compression

B Dressing

C Local

D Acting

E Operate

30. Who assisted the narrator in looking after the bomb-maker's wife?

Select all that are correct.

A A brother

B A doctor

C A Syrian assistant

D A sister

E An anaesthetist

Section D

Answer the following questions using BOTH extracts.

31. Think about the style of writing in the two texts. Which of these statements are true about BOTH?

Select all that are correct.

A They do not use direct speech.

B They have a first-person narrator.

C They contain multiple similes.

D They are written in the present tense.

E They contain medical terminology.

32. What problems did the patients in BOTH extracts have?

Select all that are correct.

A They needed a blood transfusion.

B They were bleeding.

C They had low haemoglobin levels.

D They had been injured.

E They had low sugar levels.

33. Think about the narrators in the two texts. Which of these statements are true about BOTH?

Select all that are correct.

A They are working outside of the United Kingdom.

B They are over the age of twenty.

C They are doctors.

D They perform surgery.

E They are recounting events that actually happened.

34. The patient in the second extract is in more immediate danger than the patient in the first extract.

Select the best **TWO** quotes to use as evidence to support this statement.

A 'He and his wife made an appointment a few days later to discuss the next steps.' (Extract 1, lines 62–63)

B 'The amount of the oxygen-carrying red pigment (haemoglobin) in his blood was very low.' (Extract 1, lines 26–27)

C 'He was noticeably out of breath' (Extract 1, lines 24–25)

D 'She was haemorrhaging significantly from the wound' (Extract 2, lines 12–13)

E 'rushed to us with a fragment injury to her lower left leg' (Extract 2, line 12)

Marking Guidance

For each question, the maximum number of marks available is shown.

Where questions require multiple answers and use the rubric, '**Select all that are correct**', negative marking should also be applied, whereby 1 mark is deducted for each incorrect answer selected down to 0 marks (note that the number of marks per question cannot be negative).

For example:

If a question is worth 2 marks and requires options A, B and C to be selected:

Award 2 marks for A, B **and** C selected or 1 mark for any two correct answers selected.

Award 1 mark for A, B, C **and** D **or** E selected (2 marks – 1 incorrect = 1 mark).

Award 0 marks for A, B, C, D **and** E selected (2 marks – 2 incorrect = 0 marks).

Award 0 marks for A, B and E selected or equivalent (1 mark – 1 incorrect = 0 marks).

1.	E	[1 mark]
2.	D	[1 mark]
3.	A	[1 mark]
4.	B	[1 mark]
5.	D	[1 mark]
6.	E	[1 mark]
7.	B, C, D, E	[3 marks]
8.	B, E (both answers must be correct)	[1 mark]
9.	B	[1 mark]
10.	E	[1 mark]
11.	E	[1 mark]
12.	D	[1 mark]
13.	A, C, E	[2 marks]
14.	A, C (both answers must be correct)	[1 mark]
15.	A, B, D, E	[3 marks]
16.	E	[1 mark]
17.	A, D (both answers must be correct)	[1 mark]
18.	C, D (both answers must be correct)	[1 mark]
19.	B	[1 mark]

20.	A, E	[2 marks]
21.	B, C (both answers must be correct)	[1 mark]
22.	A, B, D, E	[3 marks]
23.	C	[1 mark]
24.	D	[1 mark]
25.	B, E (both answers must be correct)	[1 mark]
26.	A, B, C, D	[3 marks]
27.	C, D, E	[2 marks]
28.	C, E (both answers must be correct)	[1 mark]
29.	A, B	[2 marks]
30.	C, D, E	[2 marks]
31.	A, B, E	[2 marks]
32.	B, C	[2 marks]
33.	B, C, E	[2 marks]
34.	A, D (both answers must be correct)	[1 mark]

Total: **50 marks**
