SELECTIVE ELIGIBILITY TEST (S.E.T)

PRACTICE TEST 5

Mathematics

45 minutes

Instructions

- This test contains 50 questions.
- For each question, choose the correct answer and then mark its letter on the answer sheet.

Your time will start when you turn over the page.

Q1. What is ¼ of 1⅓?

A ⅔
B ⅓
C 1
D ¼
E 2⅙

Q2. What is 'a fifth of 60’ divided by 'a quarter of 16'?

A 4
B 2
C 3
D 2.5
E 3.5

Q3. How much needs to be added to 0.792 to make 1?

A 0.308
B 0.318
C 0.218
D 0.208
E 0.207

Q4. What is the most likely maximum depth of an ocean?

A 11 km
B 1 km
C 1,100 m
D 100,000 mm
E 15,000 cm

Q5. Ann has a grandmother who was 50 years old in 2000.
Ann's grandmother is 65 years older than her.
In what year was Ann born?

A 2005
B 2007
C 2011
D 2013
E 2015

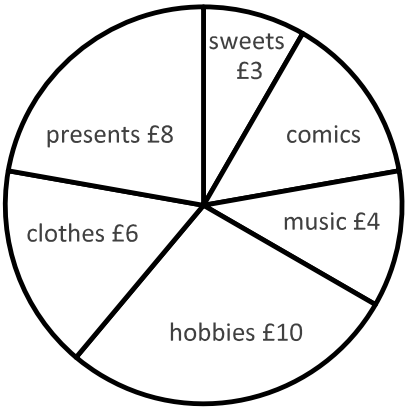

Q6. Ben has a football album that holds 12 stickers on each page.
There are 28 pages in the album.
The album is full, except for the last page which has room for 10 more stickers.
How many stickers are in the album?

A 342
B 326
C 328
D 336
E 332

Q7. A planet rotates around a star in an orbit once every 10 hours.
How many orbits does the planet complete in one week?

A 18
B 17
C 16
D 15
E 150

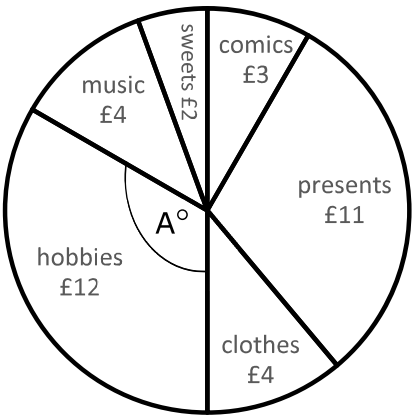

Q8. This pie chart shows how Eli spends his pocket money in one month. Eli receives £36 monthly.

How much does Eli spend on comics?

A £4
B £5
C £6
D £7
E £8

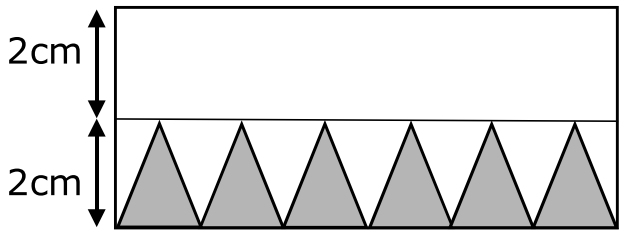

Q9. Eli's brother also receives £36 pocket money each month.

What is the size of A, the angle representing the proportion of pocket money that Eli's brother spends on his hobbies?

A 60°
B 90°
C 100°
D 120°
E 125°

Q10. What fraction of this shape is shaded?

A ¼
B ⅓
C ⅕
D ⅔
E ⅙

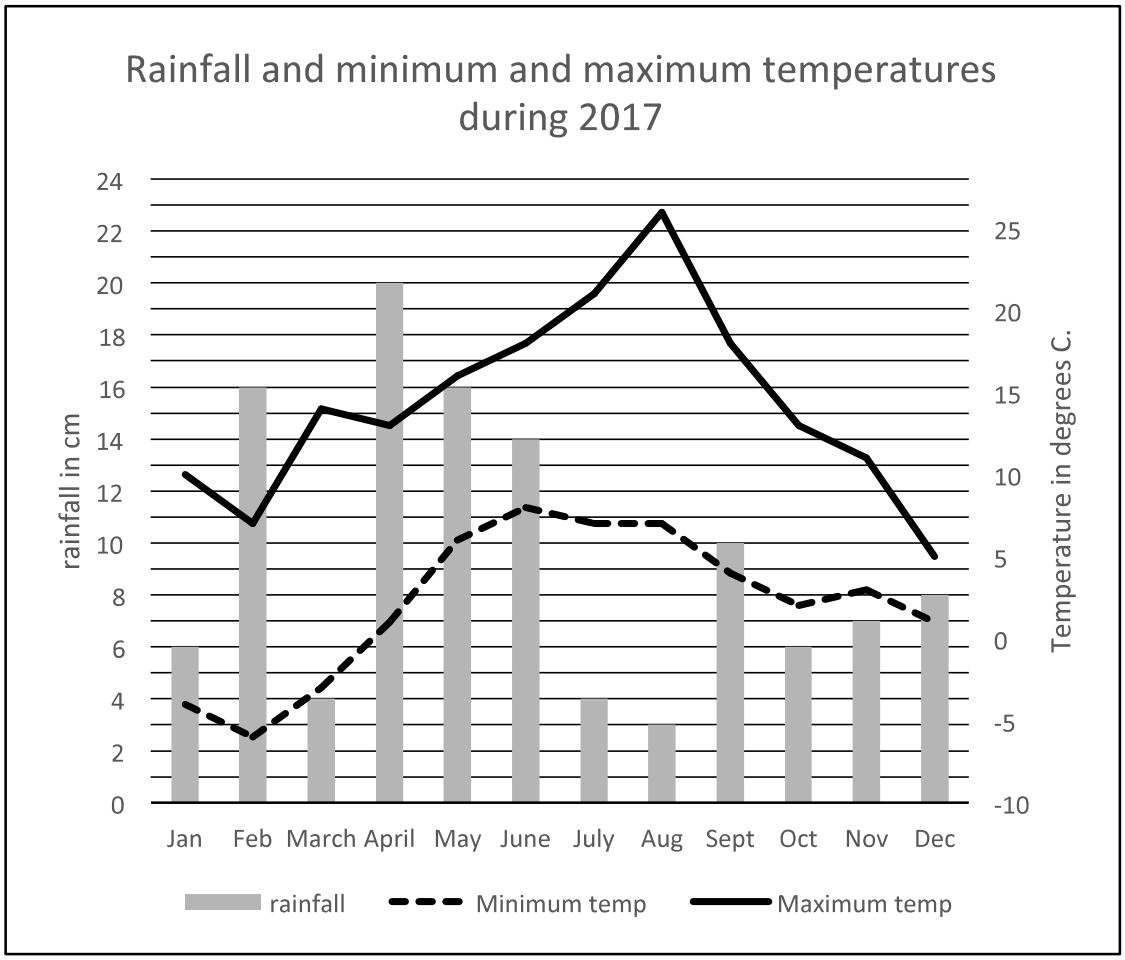

Q11. At 01:01 on a 24-hour clock, two digits alternate: 0,1,0,1.
The pattern is MP:MP, where M and P stand for the two different digits.
How many times does the same pattern occur during the next twelve hours?

A 8
B 9
C 10
D 11
E 12

Q12. The mean of five numbers is 5. The mode of the five numbers is 7.
If the median is 6, what is the sum of the two smallest numbers?

A 4
B 5
C 6
D 7
E 8

Q13. This graph shows rainfall and temperature data for 2017.

Which months saw a) the lowest temperature and b) the lowest rainfall?

A a) August and b) February
B a) August and b) December
C a) August and b) April
D a) March and b) August
E a) February and b) August

Q14. Using the same graph above, what was the approximate range of temperature for March?

A 17°C
B 12°C
C 10°C
D 21°C
E 14°C

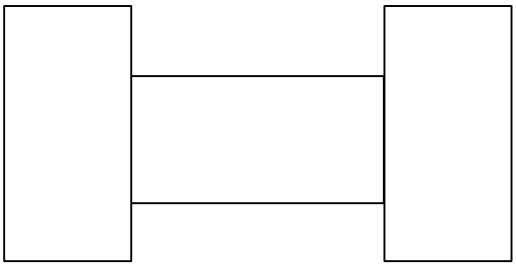

Q15. It costs £11.50 for an adult to see a film, while children's tickets are half the adult price. How much change does Mr. Brown receive from £40 if he takes his three children to watch a film with him?

A £13.25
B £11.25
C £15
D £17.75
E £23.75

Q16. What is the smallest three-digit common multiple of 7 and 8?

A 156
B 168
C 106
D 104
E 112

Q17. Three identical rectangles (measuring 6 cm x 3 cm) are put together to form the shape below.

Not drawn to scale

What is the perimeter of the shape?

A 42 cm
B 44 cm
C 46 cm
D 38 cm
E 36 cm

Q18. A train takes 2 hours and 40 minutes to travel from London to Weymouth. If the train is due in Weymouth at 15:15, at what time does it leave London?

A 12:10
B 12:15
C 12:25
D 12:35
E 13:20

Q19. A train travels 60 km at 60 km/h. It then travels 60 km at a speed of 120 km/h. What was the train's average speed for the 120 km journey?

A 85 km/h
B 100 km/h
C 70 km/h
D 90 km/h
E 80 km/h

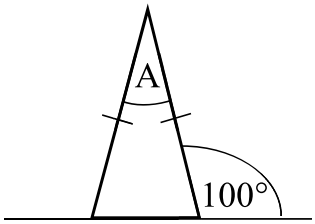

Q20. If 37 x 589 = 21793, what is the value of 217930 ÷ 58.9?

A 37
B 3700
C 370
D 3.7
E 0.37

Q21. What is the product of all the factors of 6?

A 6
B 12
C 24
D 36
E 48

Q22. What is the size of angle A?

A 100°
B 40°
C 60°
D 30°
E 20°

Q23. A greengrocer buys 500 kg of potatoes every day.
2% of the potatoes have to be thrown away as they are rotten.
He sells 10% of what is left to a restaurant next door.
The greengrocer then sells the rest of the potatoes in his shop, except for 1 kg that he cooks with every evening.
How many kg of potatoes does the greengrocer sell in his shop per day?

A 400 kg
B 422 kg
C 440 kg
D 445 kg
E 464 kg

Q24. 5 children sent each other a card at Christmas.
How many cards are sent between the friends?

A 10
B 15
C 16
D 20
E 25

Q25. Red pens are on sale. If nine red pens cost less than £2.70 and three red pens cost more than 84 p, what is the price of one red pen?

A 26 p
B 27 p
C 28 p
D 29 p
E 30 p

Q26. Ben is taking the following items on holiday:

ITEM	WEIGHT kg
books	1.5
clothes	3.5
shoes	2.25
toiletries	1
snacks	2.25
games	2
towel	0.5
chargers	1
suitcase	4

If the weights of these items were represented on a pie chart, what size angle would show the shoes as a proportion of the total weight?

A 30°
B 45°
C 40°
D 60°
E 50°

Q27. What is 10556 g, rounded to the nearest kg?

A 105 kg
B 106 kg
C 10.5 kg
D 11 kg
E 110 kg

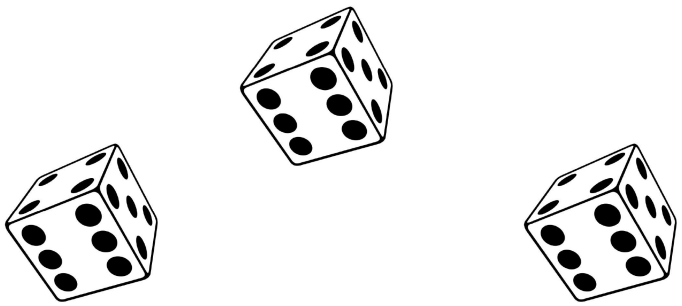

Q28. If the following numbers are put in order of size, which would come in the middle?

0.48 46.5% $\frac{3}{7}$ 0.417 $\frac{4}{9}$

A 0.48
B 46.5%
C $\frac{3}{7}$
D 0.417
E $\frac{4}{9}$

Q29. Three dice are thrown at the same time. The numbers they land on are added together. What is the range of possible results?

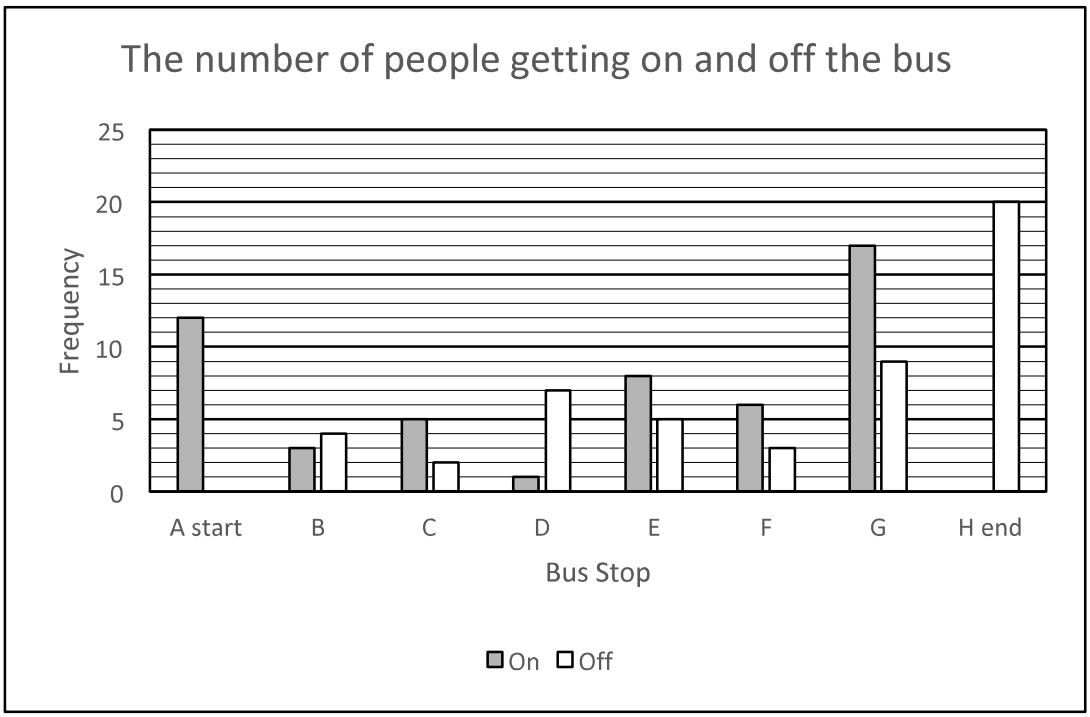

A 15
B 16
C 17
D 18
E 19

Q30. What is the difference between the number of edges and vertices of a cuboid?

A 2
B 4
C 6
D 8
E 10

This graph relates to questions 31-33. It shows the number of people who got on and off bus no. 42 at each bus stop on its route.

Q31. At how many stops did more people get off than get on?

A 0
B 1
C 5
D 3
E 4

Q32. How many passengers were on the bus between stops E and F?

A 11
B 12
C 14
D 10
E 13

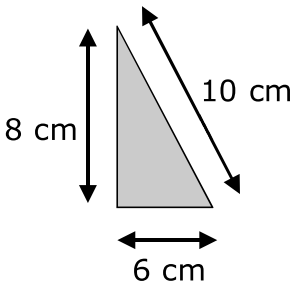

Q33. Not everyone got off the bus at the final stop H, as they had missed their stop and wanted to go back on the same bus.
How many passengers stayed on the bus when it reached stop H?

A 1
B 2
C 3
D 4
E 5

Q34. 2 pasties and a tea can be purchased for £2.80
2 pasties and two teas can be purchased for £3.20
What is the price of one pasty?

A £0.90
B £1
C £1.10
D £1.20
E £1.25

Q35. Consider this right-angled triangle.

Ten of these triangles make up Figure A below.
What is the area of Figure A?

A 600 cm²
B 480 cm²
C 360 cm²
D 300 cm²
E 240 cm²

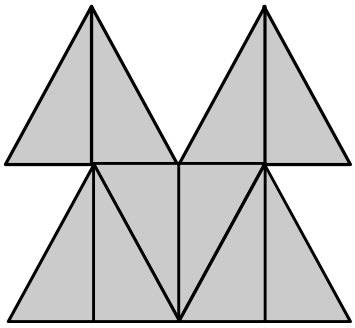

Figure A

Q36. Ben thinks of a number and divides it into 40. Ben then doubles the result and gets 10. Of which number did Ben first think?

A 200
B 20
C 5
D 2
E 8

Q37. What number is exactly halfway between 0.34 and 1.28?

A 0.81
B 0.83
C 0.85
D 0.47
E 0.91

Q38. Ben shares his crisps with his brother in a ratio of 4:3.
If Ben's brother receives 18 crisps, how many crisps are there altogether?

A 7
B 42
C 27
D 24
E 13

Q39. 100 people sit two tests: a theory test, followed by a driving test. 80 people passed the theory test and 75 people passed the driving test. If 70 people passed both tests, how many people failed both tests?

A 15
B 18
C 20
D 25
E 28

Q40. How many 10 millilitre spoonfuls of water will it take to fill a 0.75 litre jug?

A 7.5
B 75
C 750
D 7500
E 0.75

Q41. The scale of a map is 1:20000.
If the distance between two points on the map is 6 cm, what is the actual distance between the two points?

A 120 km
B 120 m
C 1020 m
D 1.2 km
E 20 km

Q42. $4 + 2 \times 3 - 6 =$

A 18
B 8
C 4
D 10
E 6

Q43. Which of the following shape's interior angles add up to 540°?

A triangle
B square
C pentagon
D hexagon
E octagon

Q44. (3 , 1) and (10 , 1) are two points which are joined by a straight line. Which of the following points lies on the same line?

A (-1 , 3)
B (-2 , -1)
C (1 , 6)
D (8 , 1)
E (2 , 2)

The table relates to questions 45-47.
Each shape on the grid below represents a number. The total for each row and column is given.

				16
				15
				20
				19
17	16	15	22	

Q45. What is the value of shape  ?

A 1
B 2
C 3
D 5
E 6

Q46. What is the value of shape  ?

A 1
B 2
C 3
D 4
E 5

Q47. What is the value of shape  ?

A 7
B 6
C 3
D 4
E 5

Q48. I think of a number. 4% of my number is 16.
What is my number?

A 400
B 40
C 4
D 64
E 640

Q49. If $2f - 4h = 6g$, which of the following is incorrect?

A $2f = 6g + 4h$
B $f - 2h = 3g$
C $2f - 6g = 4h$
D $4h = 6g - 2f$
E $2(2f - 4h) = 12g$

Q50. Three children sold raffle tickets for a school fair.
Ben sold twice as many Carl, who sold twice as many as Dan.
The total number of raffle tickets sold between them was 161
How many raffle tickets did Ben sell?

A 23
B 46
C 89
D 21
E 92

SELECTIVE ELIGIBILITY TEST (S.E.T.)

PRACTICE TEST 5

English

50 minutes

Instructions:

- This test contains 34 questions, which are split over 4 sections
- You are advised to spend the time suggested below on each section:
  Section A: Spelling – 5 minutes
  Section B: Text 1 – 25 minutes
  Section C: Text 2 – 10 minutes
  Section D: Comparison of Texts 1 & 2 – 10 minutes
- These timings are just recommendations – you are allowed to spend as much of the given time as you like on each section, and you may return to questions at any time during the test.
- Read the instructions for each section carefully.
- Mark all your responses on the separate answer sheet provided.

Your time will start when you turn over the page.

Section A

Which of these is the correct spelling?

1.

A Accomodate

B Acommodate

C Accommodate

D Accommadate

E Accomadate

2.

A Commited

B Comitted

C Committied

D Commitied

E Committed

3.

A Fluoresent

B Floresent

C Florescent

D Fluorescent

E Flourescent

4.

A Knowledgeable

B Knowledgible

C Knowlegeable

D Knowledgeble

E Knowlegible

5.

A Parliment

B Parliament

C Parlament

D Parlement

E Parliamint

6.

A Succesfully

B Succesfuly

C Successfuly

D Successfully

E Sucessfully

Section B

The extract below is from *Turtle Diary,* by Russell Hoban.

Read the extract carefully and then answer the questions that follow.

Very dark in the Aquarium. Green windows, things swimming. People black against the windows murmuring, explaining to children, holding them up, putting them down, urging them on, calling them back. Echoing footsteps of children running in the dark. Very shabby in the Aquarium, very small. Too many little green windows in the dark. Crabs, lobsters, two thornback rays, a little poor civil-servant-looking leopard shark. Tropical fish, eels, toads, frogs and newts. There was no octopus.

Sea turtles. Two or three hundred pounds the big ones must have weighed. Looping and swinging, flying in golden-green silty water in a grotty little tank no bigger than my room. Soaring, dipping and curving with flippers like wings in a glass box of second-hand ocean. Their eyes said nothing, the thousands of miles of ocean couldn't be said.

I thought: when I was a child I used to like the Zoo. The rain had stopped. I went to the Reptile House. No. Didn't want to see the snakes on hot sand under bright lights behind glass. Left the Reptile House, approached the apes. The gorilla lay on his stomach in his cell, his chin resting on his folded arms. No. I couldn't think which was worse: if he could remember or if he couldn't.

I went out of the Zoo to the 74 bus stop at the North Gate. There was a young woman with a little boy and girl. Maybe the boy was eight or nine. He had a little black rubber gorilla on a bit of elastic tied to a string and he danced the little black gorilla up and down in a little puddle, spat spat spat, not splashing. It was only a bit of wet on the pavement.

'Stop that,' said his mother. 'I told you to stop that.'

It must have been soft plastic, that gorilla the little boy had. I don't think they make those things out of rubber any more.

There are green turtles whose feeding grounds are along the coast of Brazil, and they swim 1,400 miles to breed and lay their eggs on Ascension Island in the South Atlantic, half way to Africa. Ascension Island is only five miles long. Nobody knows how they find it. Two of the turtles at the Aquarium are green turtles, a large one and a small one. The sign said: 'The Green Turtle, *Chelonia mydas*, is the source of turtle soup …' I am the source of William G. soup if it comes to that. Everyone is the source of his or her kind of soup. In a town as big as London that's a lot of soup walking about.

How do the turtles find Ascension Island? There are sharks in the water too. Some of the turtles get eaten by sharks. Do the turtles know about sharks? How do they not think about the sharks when they're swimming that 1,400 miles? Green turtles must

have the kind of mind that doesn't think about sharks unless a shark is there. That must be how it is with them. I can't believe they'd swim 1,400 miles thinking about sharks. Sea turtles can't shut themselves up in their shells as land turtles do. Their shells are like tight bone vests and their flippers are always sticking out. Nothing they can do if a shark comes along. Pray. Ridiculous to think of a turtle praying with all those teeth coming up from below.

Mr Meager, manager of the shop and the source of Meager soup, stood in front of me for a while. When I noticed him he asked me if I'd got something on my mind. Green turtles, I said. Was that something we'd subscribed, he wanted to know. No, I said, it was the source of turtle soup. He went away with a hard smile.

It's hard to believe they do it by observing the angle of the sun like a yachtsman with a sextant. Carr doubts it and he's about the biggest turtle authority there is. But that's what penguins do on overland journeys. They're big navigators too. I think of the turtles swimming steadily against the current all the way to Ascension. I think of them swimming through all that golden-green water over the dark, over the chill of the deeps and the jaws of the dark. And I think of the sun over the water, the sun through the water, the eye holding the sun, being held by it with no thought and only the rhythm of the going, the steady wing-strokes of the flippers in the water. Then it doesn't seem hard to believe. It seems the only way to do it, the only way in fact to be: swimming, swimming, the eye held by the sun, no sharks in the mind, nothing in the mind. And when they can't see the sun, what then? Their vision isn't good enough for star sights. Do they go by smell, taste, faith?

7. Think about the style of the extract. Which of these is NOT correct?

Select **one** answer.

A It includes some very short and very long sentences.

B It is a continuous flow of thoughts and observations.

C It follows conventional grammar rules.

D Some sentences are incomplete – they are just fragments.

E It is written in the first person.

8. What makes the Aquarium seem like a confusing place?

Select all that are correct.

A People are silhouetted – you can't see their faces.

B The narrator uses a very long sentence to convey lots of things happening at once.

C You would not expect to find some of the listed animals in an aquarium.

D It is noisy, with indistinct voices and reverberating footsteps.

E The narrator describes one action and then immediately describes the opposite action.

9. Select the **TWO** most accurate words to describe the Aquarium building.

A Poky

B Airy

C Tidy

D Tatty

E Fishy

10. 'There was no octopus.' (line 6)

What does this line suggest?

Select all that are correct.

A The narrator is unsurprised that there is no octopus.

B There used to be an octopus, but it has died.

C The narrator is disappointed that there is no octopus.

D The deep sea exhibit was empty.

E The narrator was expecting to see an octopus.

11. Look carefully at lines 7–10. Which of these is NOT correct?

Select **one** answer.

A The narrator compares the turtles' movement to flying.

B Even the largest turtles in the tank are relatively small.

C The narrator creates a strong contrast between the turtles themselves and the tank they live in.

D The turtles seem to dance despite their squalid surroundings.

E The water in the turtles' tank looks stale and murky.

12. 'I thought: when I was a child I used to like the Zoo' (line 11)

What does this line tell us about the narrator?

Select all that are correct.

A He is no longer a child.

B He is a teenager.

C He still likes the zoo.

D He does not like the zoo.

E He didn't really like the zoo when he was a child.

13. Select the **TWO** most accurate words to describe how the narrator perceives the gorilla.

A Liberated

B Intimate

C Content

D Incarcerated

E Listless

14. Look carefully at lines 44–45. Which of these is NOT correct?

Select **one** answer.

A The word 'they' refers to green turtles.

B The narrator is continuing on from the end of line 39 as if the intermediate paragraph is not there.

C The narrator likes to understand how things work.

D Carr is a friend of the narrator.

E The narrator respects Carr.

15. 'No. I couldn't think which was worse: if he could remember or if he couldn't.' (lines 14–15)

What does this line mean?

Select the **most accurate** explanation.

A The narrator cannot decide if it would be worse for the gorilla not to recall forests and freedom or to think of them whilst held captive.

B The narrator is not sure whether the gorilla recognises him from when he visited as a child.

C The narrator is not sure whether the gorilla is capable of remembering things from its past.

D The narrator cannot decide if the gorilla is aware that it is in captivity.

E The narrator knows that the gorilla has been badly treated in the past and wonders if it remembers.

16. 'spat spat spat, not splashing.' (line 19)

Which of these is NOT correct?

Select **one** answer.

A 'spat spat spat' is an example of onomatopoeia.

B 'splashing' is an example of onomatopoeia.

C This phrase is an example of alliteration.

D This phrase is an example of personification.

E This phrase makes a comparison between two sounds.

17. Think about what we are told about green turtles in the text. Which of these is NOT correct?

Select **one** answer.

A Some green turtles find food on the shores of South America.

B The *Chelonia mydas* is a type of green turtle.

C Green turtles may swim vast distances to reach their breeding grounds.

D Green turtles use their flippers to propel them through the water.

E Green turtles have been hunted by man for food.

18. What do we learn about Ascension Island from the text?

Select all that are correct.

A It is in the Atlantic ocean.

B It is over 2000 km from Brazil.

C It is about the same size as mainland Britain.

D It is midway between South America and Africa.

E It is close to the South Pole.

19. Think about the use of questions in the text. Which of these is NOT correct?

Select **one** answer.

A They help to show the narrator's thought processes.

B The narrator uses them to plead with the reader to help him make sense of it all.

C They show that the narrator genuinely wants to understand.

D One question often leads to another.

E They show that the narrator is not merely concerned with facts, but wants to know how turtles think and feel.

20. 'Ridiculous to think of a turtle praying with all those teeth coming up from below.' (lines 38–39)

What does this line tell us about the narrator?

Pick **the most accurate** explanation.

A He thinks it is preposterous to imagine that a turtle is capable of faith and prayer.

B He thinks that it would be stupid for a turtle to pray when it should be concentrating on escaping.

C He thinks that it would be pointless for the turtle to pray when it is obviously too late to be saved.

D He does not dismiss the idea of a turtle praying, but he thinks it would only do so when alone.

E He thinks that a turtle is accepting of its position in the food chain.

21. 'Mr Meager, manager of the shop and the source of Meager soup' (line 40)

What is the effect of this line?

Select all that are correct.

A It recalls the sign in the zoo about turtle soup.

B It shows that Mr Meager is the manager of a soup shop.

C It links back to the narrator's thoughts about individuals being the source of their own kind of soup.

D It shows that Mr Meager is the inventor of a type of soup.

E It shows that the narrator tends to fixate on an idea.

22. What literary techniques does the author use in the final paragraph?

Select all that are correct.

A Simile

B Alliteration

C Metaphor

D Rhetorical question

E Irony

23. Select the **TWO** most accurate words to describe how the narrator feels in lines 51–53.

A Convinced

B Dubious

C Ambivalent

D Perplexed

E Enlightened

Section C

The extract below is taken from the 'Species Directory' on the NOAA Fisheries website. The NOAA is the National Oceanic and Atmospheric Administration of the USA.

Read the extract carefully and then answer the questions that follow.

Green Turtle

The green sea turtle is the largest hard-shelled sea turtle. They are unique among sea turtles in that they are herbivores, eating mostly seagrasses and algae. This diet is what gives their fat a greenish colour (not their shells), which is where their name comes from.

Green turtles are found throughout the world. They nest in over 80 countries and live in the coastal areas of more than 140 countries. Historically, green turtles were exploited for their fat, meat and eggs, causing global population declines. Many countries, including the United States, prohibit the killing of sea turtles and collection of their eggs. However, in some areas, the killing of green turtles for their meat or to supply shells to the wildlife trafficking trade remains a threat to their recovery. Bycatch in commercial and recreational fishing gear, vessel strikes, loss of nesting habitat from coastal development, and climate change are the biggest threats facing green turtles.

Population Status

Green turtles are found worldwide with 11 distinct population segments (DPS) listed under the Endangered Species Act. The largest green turtle nesting populations in the world are found at:

- Tortuguero on the Caribbean coast of Costa Rica—30,000 females nest here per season (on average).
- Raine Island on the Great Barrier Reef in Australia—During a peak nesting season, up to 60,000 females nest on this island and the surrounding reef.

Appearance

Green turtles are the largest of all the hard-shelled sea turtles but have a comparatively small head. A typical adult is 3 to 4 feet long and weighs 300 to 350 pounds. They have dark brown, grey, or olive coloured shells and a much lighter, yellow-to-white underside. Their shells have five scutes running down the middle and four scutes on each side. Other distinct characteristics of the green turtle are their serrated beak on the lower jaws and two large scales located between the eyes.

Behaviour

Green turtles, like all sea turtles, are reptiles and must surface to breathe and lay their eggs on land. Green turtles migrate hundreds to thousands of kilometres each way between their foraging grounds and nesting beaches. They are solitary, night-time nesters.

The life history of green turtles involves a series of stages of development from hatchling to adult. After emerging from the nest, hatchlings swim to offshore areas, where they live for several years in pelagic habitat. Juveniles eventually leave the open ocean habitat and travel to nearshore foraging grounds in shallow coastal habitats, where they mature to adulthood and spend the remainder of their lives. Adults migrate every 2 to 5 years from their coastal foraging areas to the waters off the nesting beaches where they originally hatched to reproduce.

24. Select the **TWO** most accurate words to describe the tone of the text.

A Persuasive

B Objective

C Subjective

D Informative

E Empathetic

25. Look carefully at lines 2–12. Which of these is NOT true?

Select **one** answer.

A Hunting greatly reduced the numbers of green turtles.

B The green turtle has a soft shell.

C Green turtles are a species of sea turtle.

D Green turtles do not eat meat.

E Green turtles inhabit more than 140 countries but lay their eggs in far fewer.

26. Think about what green turtles look like. From the text, which of these is NOT correct?

Select **one** answer.

A The underside of their shells is much paler than the top.

B They have a large body and small head.

C They are green all over.

D They have a beak.

E They have thirteen bony plates on their shells.

27. What is the current situation regarding killing green turtles for their meat?

Pick the **most accurate** explanation.

A The trade in green turtle meat has completely ceased.

B Quotas have been introduced to limit the number that can be killed.

C It is illegal to kill green turtles in many countries, but it is still permitted in others.

D It is illegal to kill green turtles in all countries, but there is still a black market for their meat.

E It is prohibited to kill green turtles for their meat in most countries, but there are no laws protecting their eggs.

28. From the text, what else threatens green turtle populations?

Select all that are correct.

A Being accidentally caught in fishing nets

B Being eaten by sharks

C Collisions with ships

D Destruction of nesting sites

E Outbreaks of disease

29. Select the **TWO** most accurate words to describe the nesting habits of green turtles.

A Nocturnal

B Reclusive

C Communal

D Spontaneous

E Protracted

30. Think about the life stages of a green turtle. Which of the following are true?

Select all that are correct.

A Adults return to the beach where they were born to reproduce.

B Adolescent and adult turtles spend most of their time close to shore.

C Pregnant females are called hatchlings.

D Baby turtles live in the open sea.

E Adult turtles never leave their home territory.

Section D

Answer the following questions using BOTH extracts.

31. Think about how the two texts deal with the subject of green turtles. Which of these statements are true about BOTH?

Select all that are correct.

A They include statements of fact.

B They explore the mechanics and motivations behind the facts.

C They are objective.

D They use questions to engage the reader.

E They quote statistics.

32. Compare the information given about turtles in the two texts. Which of these is NOT true?

Select **one** answer.

A The given weights correspond.

B Both focus on the migratory habits of green turtles.

C Both cover the fact that humans eat green turtles.

D Text 1 gives information about a specific group of turtles, whereas Text 2 gives information about the general population.

E Text 1 includes the scientific name for green turtles, but Text 2 does not.

33. Why is Ascension Island not mentioned in Text 2?

Pick the **most accurate** explanation.

A It is a fictional place created by the author of Text 1.

B The turtle population that once nested there has completely died out.

C The narrator of Text 1 has been misinformed about Ascension Island.

D The long migration to Ascension Island is not typical of green turtle behaviour.

E The number of females that nest there per season is less than 30 000.

34. Text 1 is a work of fiction, so it might be considered an unreliable source of information.

Which pieces of information in Text 2 make what we are told about Ascension Island in Text 1 seem plausible?

Select all that are correct.

A It tells us that green turtles are solitary nesters.

B It states that Raine Island is one of the largest nesting sites in terms of numbers of turtles.

C It confirms that 1400 miles is a realistic distance for green turtles to migrate.

D It supports the fact that green turtles will migrate long distances to reach specific nesting sites.

E It states that green turtles are found throughout the world.

11+ S.E.T. Practice Test 5 – English – Answers

Marking Guidance

For each question, the maximum number of marks available is shown.

Where questions require multiple answers and use the rubric, '**Select all that are correct**', negative marking should also be applied, whereby 1 mark is deducted for each incorrect answer selected down to 0 marks (note that the number of marks per question cannot be negative).

For example:

If a question is worth 2 marks and requires options A, B and C to be selected:

Award 2 marks for A, B **and** C selected or 1 mark for any two correct answers selected.

Award 1 mark for A, B, C **and** D **or** E selected (2 marks – 1 incorrect = 1 mark).

Award 0 marks for A, B, C, D **and** E selected (2 marks – 2 incorrect = 0 marks).

Award 0 marks for A, B and E selected or equivalent (1 mark – 1 incorrect = 0 marks).

1.	C	[1 mark]
2.	E	[1 mark]
3.	D	[1 mark]
4.	A	[1 mark]
5.	B	[1 mark]
6.	D	[1 mark]
7.	C	[1 mark]
8.	A, B, D, E	[3 marks]
9.	A, D (both answers must be correct)	[1 mark]
10.	C, E	[2 marks]
11.	B	[1 mark]
12.	A, D	[2 marks]
13.	D, E (both answers must be correct)	[1 mark]
14.	D	[1 mark]
15.	A	[1 mark]
16.	D	[1 mark]
17.	B	[1 mark]
18.	A, B, D	[2 marks]
19.	B	[1 mark]

20.	C	[1 mark]
21.	A, C, E	[2 marks]
22.	A, B, C, D	[3 marks]
23.	A, E (both answers must be correct)	[1 mark]
24.	B, D (both answers must be correct)	[1 mark]
25.	B	[1 mark]
26.	C	[1 mark]
27.	C	[1 mark]
28.	A, C, D	[2 marks]
29.	A, B (both answers must be correct)	[1 mark]
30.	A, B, D	[2 marks]
31.	A, E	[2 marks]
32.	B	[1 mark]
33.	E	[1 mark]
34.	C, D, E	[2 marks]

Total: **46 marks**
