SELECTIVE ELIGIBILITY TEST (S.E.T.)
PRACTICE TEST 8

Mathematics
45 minutes

Instructions:

- This test contains 50 questions.
- For each question, choose the correct answer and then mark its letter on the answer sheet.

Your time will start when you turn over the page.

Q1. What is the value of $\frac{20 \times 19 \times 18 \times 17 \times 16}{19 \times 18 \times 17 \times 16}$?

A 40
B 34
C 20
D 18
E 10

Q2. What is $(2 + 3^2) - (2^3 - 4)$?

A 3
B 4
C 5
D 6
E 7

Q3. How many quarters are there in 50?

A 200
B 125
C 12.5
D 1.2
E 100

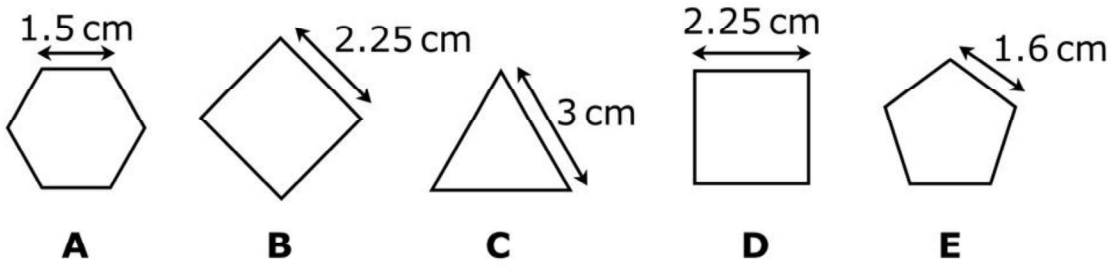

Q4. Which is the approximate number of seconds in one month?

A 2000 seconds
B 3 million seconds
C 25 000 seconds
D 300 000 seconds
E 200 seconds

Q5. Last week, a pair of trainers was on sale for £120.
This week, the pair of trainers is reduced and now costs £90.
By what percentage was the original price reduced?

A 75%
B 25%
C 50%
D 20%
E 33%

Q6. Which of these regular shapes has a different perimeter to the others?

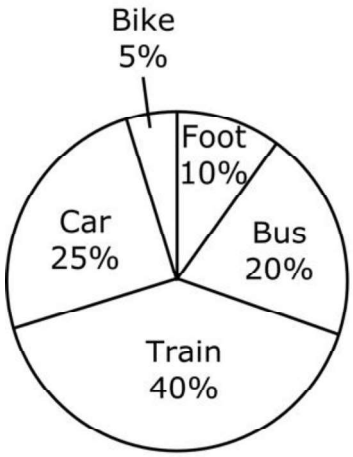

A Shape A
B Shape B
C Shape C
D Shape D
E Shape E

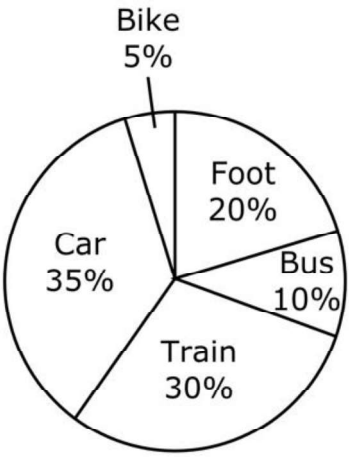

Q7. Mia and Tom have £12 between them.
Mia has £2.40 more than Tom.
How much money does Tom have?

A £8.40
B £3.60
C £7.20
D £4.80
E £5.20

Q8. The pie charts show the modes of transport used by workers in two towns.

Barnsford

Champton

Barnsford has 100 000 workers and Champton has 250 000 workers.

How many more workers travel by bike in Champton than in Barnsford?

A 7500 workers
B the same number of workers
C 15 000 workers
D 5000 workers
E 250 workers

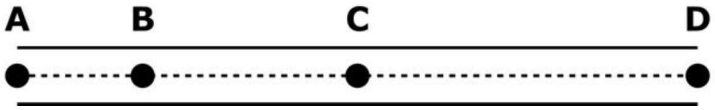

Q9. If the surface area of a cube is 96 cm^2, what is its volume?

A 48 cm^3
B 24 cm^3
C 64 cm^3
D 27 cm^3
E 36 cm^3

Q10. What is the smaller angle between the hands of a clock when the time is 9.30?

A 75°
B 105°
C 90°
D 120°
E 110°

Q11. Towns **A**, **B**, **C** and **D** lie in a straight line on a main road.

It is 25 km between **B** and **C**.
It is 80 km between **B** and **D**.
It is 100 km between **A** and **D**.
How far is it from **A** to **C**?

A 30 km
B 35 km
C 40 km
D 45 km
E 50 km

Q12. Four consecutive numbers are arranged to make a 4-digit number that is divisible by each of the first five prime numbers.
Which of the following is the 4-digit number?

A 2345
B 4356
C 2310
D 4620
E 4312

Q13. G and H represent different digits.

If

$$\begin{array}{r} G\ G\ G\ 7 \\ -\ H\ H\ H\ H \\ \hline 1\ 1\ 1\ 2 \\ \hline \end{array}$$

what is

$$\begin{array}{r} G\ G\ G\ G \\ +\ H\ H\ H\ H \\ \hline \\ \hline \end{array}$$

?

A 11 111
B 1111
C 1221
D 12 221
E 11 211

Q14. A children's bike race took place over 8 laps of a 400 m track.
The adults' bike race started with 2 laps of the track, followed by a 16 km circular road route, and finished with a further 6 laps of the track.
How many times further was the adults' race than the children's race?

A 6 times
B 8 times
C 4 times
D 5 times
E 3 times

Q15. Mr Jones buys a house for £100 000.
The following year, he puts it up for sale at a 10% higher price.
A buyer makes an offer that is 10% less than the asking price.
If Mr Jones accepts the offer will he make a profit or a loss and by how much?

A profit of £1000
B loss of £1000
C Mr Jones will break even.
D profit of £10 000
E loss of £10 000

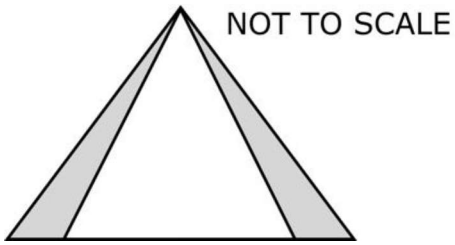

Q16. Ami buys two packets of crisps at 37 p each and a drink for 99 p.
How much change does Ami receive from £5?

A £4.27
B £3.27
C £4.29
D £2.29
E £3.25

Q17. Richard has 120 marbles.
He swaps one-fifth of them for a pen.
Richard then loses one-quarter of the remaining marbles in a game.
He shares the remaining marbles with his sister in a ratio of 1 : 2.
If Richard takes the smaller share, how many marbles does he give to his sister?

A 60 marbles
B 40 marbles
C 24 marbles
D 48 marbles
E 45 marbles

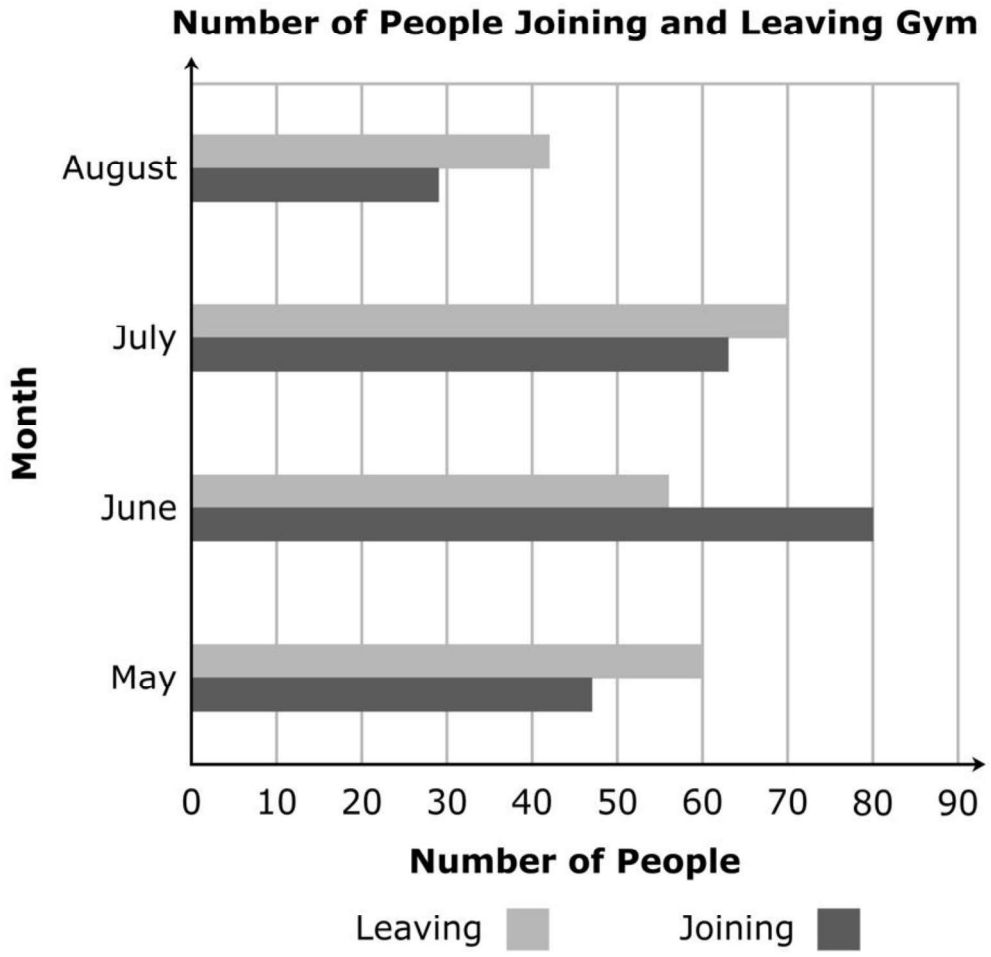

Q18. Two isosceles triangles are put together as shown.

The base of the smaller isosceles triangle is 4 cm and the base of the larger one is 6 cm.
If the height of both triangles is 4 cm, what is the area of the region shaded in grey?

A $4\,cm^2$
B $5\,cm^2$
C $6\,cm^2$
D $7\,cm^2$
E $8\,cm^2$

Q19. The chart shows the number of people who left or joined a gym over several months.

Which two months saw the same overall decline in membership?

A May and June
B May and July
C May and August
D June and July
E June and August

Q20. What is $\left(\frac{1}{4} + \frac{1}{8}\right) \div \left(\frac{1}{3} - \frac{1}{9}\right)$?

A $\frac{1}{48}$

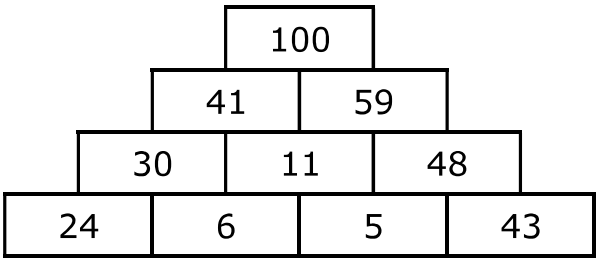

B $\frac{3}{48}$

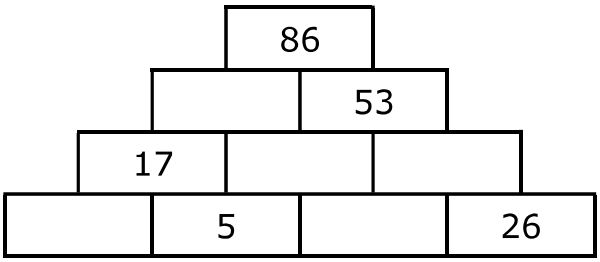

C $\frac{5}{16}$

D $2\frac{1}{8}$

E $1\frac{11}{16}$

Q21. Look at the pyramids.
Each number is the sum of the two numbers directly below it.

What are the missing numbers in the second pyramid?

A 33, 16, 37, 12, 11

B 33, 15, 37, 12, 11

C 23, 15, 38, 11, 13

D 23, 16, 38, 11, 13

E 43, 26, 27, 12, 1

Q22. Nat and Raj start from the same spot.
Nat walks north at a speed of 3 km per hour.
Raj jogs south at a speed of 6 km per hour.
How far apart are Nat and Raj after 20 minutes?

A 1 km
B 1.5 km
C 2 km
D 2.5 km
E 3 km

Q23. Tia starts at 300 and counts down in eights.
What is the first negative number that Tia will count?

A −4
B −5
C −6
D −7
E −8

Q24. The product of three positive numbers is 48 and their sum is 12.
What is the mean of the three numbers?

A 3
B 4
C 5
D 6
E 7

Q25. A cinema has 420 seats.
The ratio of filled seats to empty seats is 3 : 4.
How many seats are empty?

A 180 seats
B 240 seats
C 210 seats
D 200 seats
E 190 seats

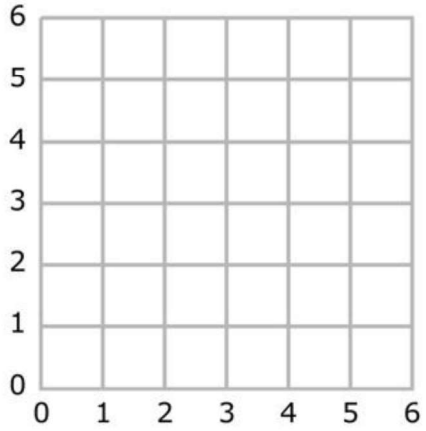

Q26. A machine can produce 450 leaflets in half an hour.
How many leaflets can be produced by three identical machines in two hours?

A 2700 leaflets
B 540 leaflets
C 270 leaflets
D 5400 leaflets
E 3600 leaflets

Q27. Five pupils are each asked to count the number of pens in his or her pencil case.
The average number of pens is 12.
Jon takes his pencil case and leaves the group.
The average number of pens for the four remaining pupils is 8.
How many pens does Jon have in his pencil case?

A 28 pens
B 24 pens
C 20 pens
D 16 pens
E 14 pens

Q28. Naz starts at point **A** (1, 1) and draws a straight line four squares long in a northerly direction to get to point **B**.
From **B**, Naz draws a straight line diagonally through five squares in a south-easterly direction to get to point **C**.
Finally, Naz draws a straight line from **C** to **A**.

What is the shape, **ABC**, that Naz has drawn?

A an isosceles triangle
B a scalene triangle
C a right-angled triangle
D a kite
E a square

Q29. What is 0.005×0.04?

A 0.002
B 0.00002
C 0.0002
D 0.2
E 2

Q30. Half of the members of a tennis club are women.
One-third of the women are aged 40 or under.
One-quarter of the women over 40 will only play doubles.
If there are 600 members of the tennis club, how many women over 40 will only play doubles?

A 50 women
B 60 women
C 80 women
D 75 women
E 25 women

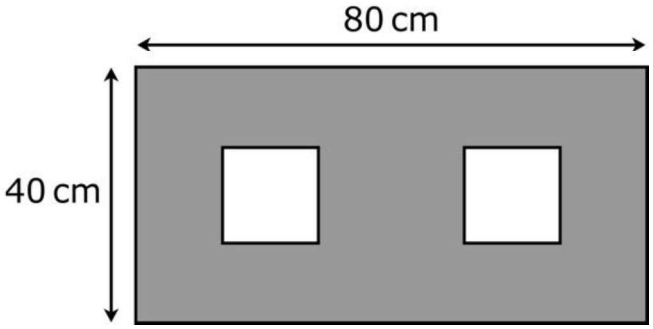

Q31. Which cube number lies between 200 and 250?

A 202
B 204
C 208
D 210
E 216

Q32. How many edges does a cuboid have?

A 8
B 10
C 11
D 12
E 16

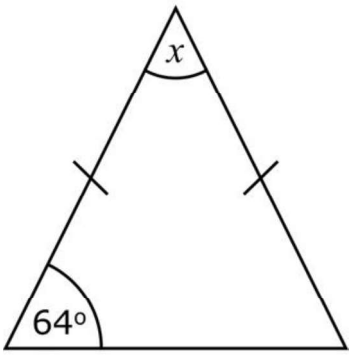

Q33. A rectangular piece of card has two squares of side length 15 cm cut out of it.

What is the area of the remaining piece of card?

A $450\,\text{cm}^2$
B $2500\,\text{cm}^2$
C $2975\,\text{cm}^2$
D $320\,\text{cm}^2$
E $2750\,\text{cm}^2$

Q34. The diagram shows an isosceles triangle.

What is the size of angle x?

A 48°
B 52°
C 56°
D 60°
E 62°

Q35. What is 40 as a decimal fraction of 200?

A 0.2
B 0.25
C 0.3
D 0.4
E 0.8

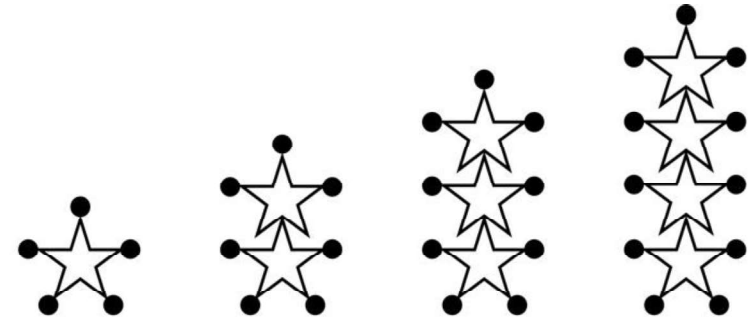

Q36. Seth has a watch that loses 10 minutes throughout each day.
Seth sets the time correctly at 0:00 on 1 January.
If Seth looks at his watch at the actual time of 12:00 on 10 January, what time will his watch show?

A 10:35
B 11:40
C 10:25
D 11:00
E 10:55

Q37. Shivi thinks of a number.
She divides 30 by her number and then subtracts the result from 18.
The answer is 13.
What was Shivi's original number?

A 1
B 930
C 150
D 6
E 10

Q38. The patterns below are made from stars and circles and form a sequence.

Pattern 1 Pattern 2 Pattern 3 Pattern 4 . . .

How many circles will be required for the 7th pattern in the sequence?

A 13 circles
B 14 circles
C 15 circles
D 16 circles
E 17 circles

Q39. If $c = 5$ and $d = 4$ and $c \times d \times e = 120$, what is the value of e?

A 5
B 6
C 7
D 8
E 9

Q40. When a jar of peanut butter is half full, it weighs 850 g.
When the same jar is one-quarter full, it weighs 650 g.
How much does the empty jar weigh?

A 50 g
B 350 g
C 450 g
D 500 g
E 750 g

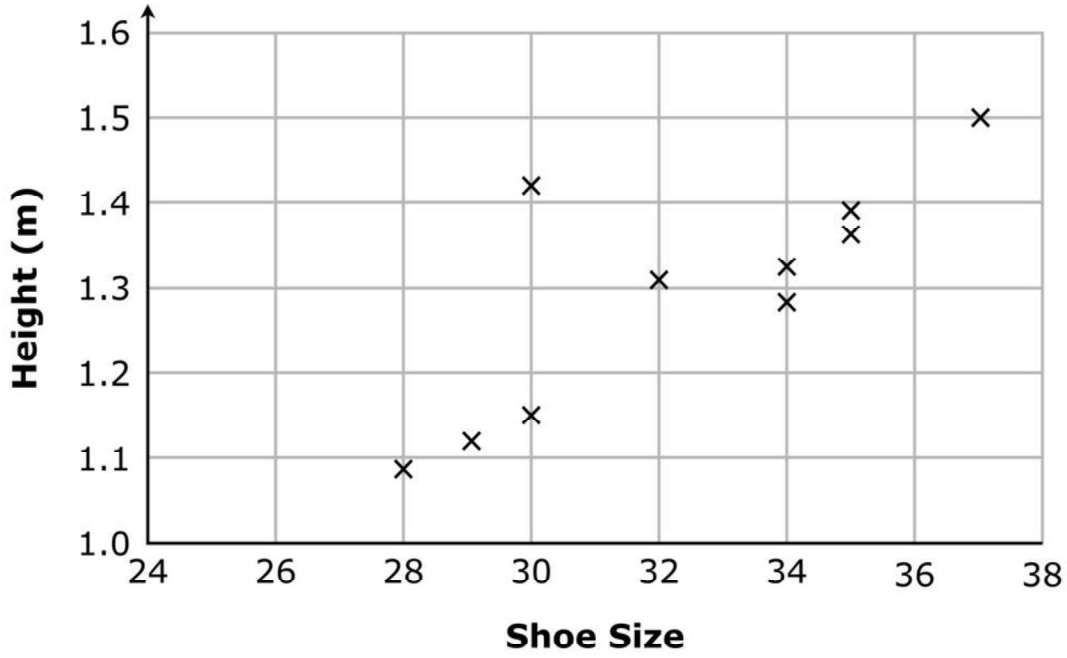

Q41. 19 235 and 3.9271 both have the digit 2 in them.
What is the difference between the two values of the digit 2?

A 199.89
B 1999.89
C 199.98
D 21.98
E 199.998

Q42. Which of the following shapes **must** have exactly one line of symmetry but no rotational symmetry?

A rhombus
B hexagon
C right-angled triangle
D rectangle
E regular trapezium

Q43. The graph shows the shoe sizes and heights of a number of children.

How many children are shorter than 1.35 m and have a shoe size larger than 30?

A 2 children
B 3 children
C 4 children
D 5 children
E 6 children

Q44. The sum of the numbers from 10 to 20 (including 10 and 20) is 165.
Using that information, or otherwise, what is the sum of the numbers from 11–21 (including 11 and 21)?

A 166
B 168
C 170
D 176
E 179

Q45. The table shows the times achieved by nine boys in a 400 m running race.

Name	Time in minutes (min) and seconds (s)
Aks	1 min 17 s
Ben	1 min 19 s
Clive	1 min 12 s
Dev	1 min 24 s
Eli	1 min 27 s
Fred	1 min 21 s
Gary	1 min 19 s
Hari	1 min 18 s
Jay	1 min 24 s

What was the difference in time between first and third place?

A 9 s
B 8 s
C 6 s
D 5 s
E 4 s

Q46. If all the numbers from 1 to 1000 (inclusive) are written out, how many zeros are required?

A 100 zeros
B 192 zeros
C 196 zeros
D 92 zeros
E 94 zeros

Q47. How many square numbers are there between 99 and 201?

A 1
B 2
C 3
D 4
E 5

Q48. A family of two parents and five children take it in turns to feed the dog each morning.
It is the turn of the youngest child on 1 January 2019.
What is the first date in 2020 that the same child will be due to feed the dog?

A 2 January 2020
B 3 January 2020
C 5 January 2020
D 6 January 2020
E 7 January 2020

Q49. (1, 10) and (5, 10) are two points joined by a straight line.
What is the midpoint of the line?

A (6, 10)
B (3, 10)
C (3, 5)
D (5, 5)
E (6, 20)

Q50. Morgan bought two apples and a cheese sandwich for £2.10.
Simon bought a cheese sandwich and an apple for £1.80.
How much would three apples cost?

A 30 p
B 90 p
C £1.50
D 60 p
E 25 p

SELECTIVE ELIGIBILITY TEST (S.E.T.)

PRACTICE TEST 8

English

50 minutes

Instructions:

- This test contains 34 questions, which are split over 4 sections
- You are advised to spend the time suggested below on each section:
  Section A: Spelling – 5 minutes
  Section B: Text 1 – 25 minutes
  Section C: Text 2 – 10 minutes
  Section D: Comparison of Texts 1 & 2 – 10 minutes
- These timings are just recommendations – you are allowed to spend as much of the given time as you like on each section, and you may return to questions at any time during the test.
- Read the instructions for each section carefully.
- Mark all your responses on the separate answer sheet provided.

Your time will start when you turn over the page.

Section A

Which of these is the correct spelling?

1.

A Bycycle

B Bycicle

C Buycicle

D Bicycle

E Bicicle

2.

A Menaceing

B Menacing

C Mennasing

D Menascing

E Menasing

3.

A Vigelant

B Vigalant

C Vigelent

D Vigallant

E Vigilant

4.

A Propporsion

B Proportion

C Proporshun

D Proporsion

E Proporscion

5.

A Certificate

B Surtificate

C Scertificate

D Curtifiacte

E Sirtificate

6.

A Abzurd

B Absured

C Abzerd

D Absurd

E Abserd

Section B

The extract below is from *Life in the Garden,* by Penelope Lively.

Read the extract carefully and then answer the questions that follow.

On the 31st of May 1920, Virginia Woolf went gardening. Here's what she wrote in her diary: "The first pure joy of the garden … weeding all day to finish the beds in a queer sort of enthusiasm which made me say this is happiness. Gladioli standing in troops; the mock orange out. We were out till 9 at night, though the evening was cold. Both stiff and scratched all over today, with chocolate earth in our nails." This is the commentary of a practical, hands-on gardener, a view of the garden wonderfully different from the way in which gardens surface in her novels. But, before considering that, I want to look at where it was that she was gardening, and what that garden was like.

Virginia and Leonard Woolf bought Monk's House, at Rodmell, near Lewes, in July 1919, when she was thirty-seven. It was an old, weather-boarded house, disconcertingly austere by twenty-first-century standards — no electricity or running water, no bathroom, a privy in the garden, and only gradually did the Woolfs overcome these deficiencies. It had three-quarters of an acre of garden, and this, certainly for Leonard, seems to have been the prime attraction. It is clear that he was the gardener-in-chief, with Virginia as an interested accomplice and frequent assistant. There was already a fine orchard (apples, plums, pears, cherries), and as time went on Leonard laid out the hard landscaping — the creation of a garden composed of discrete areas, or rooms, united by brick-paved paths, that is the basis of the garden as it is today, now in the care of the National Trust.

They evidently flung themselves at the garden with immediate enthusiasm. In September 1919 Virginia wrote: "We have been planting tiny grains of seed in the front bed, in the pious or religious belief that they will resurrect next spring as Clarkia, Calceolaria, Campanula, Larkspur and Scabious." A list of annuals — a nice mix except for the calceolaria, which fills me with horror, a nasty bulbous yellow spotty thing which would have offended the palette of otherwise pinks and blues. I do hope it failed to resurrect. But that was evidently, for Leonard, the start of a tradition of growing from seed; later, he had greenhouses.

Caroline Zoob and her husband, Jonathan, were tenants of the National Trust at Monk's House for ten years, and her fine book — *Virginia Woolf's Garden* — is testimony to their talented management of the garden. The brief was to preserve as much as possible of Leonard's original layout and, indeed, some of the Woolf planting preferences. Leonard and Virginia had a taste for strong colours. "Our garden is a perfect variegated chintz: asters, plumasters, zinnias, geums, nasturtiums and so on: all bright, cut from coloured papers, stiff, upstanding as flowers should be," Virginia wrote in a letter. That description has me a bit doubtful, and the sumptuous photographs in Caroline Zoob's book show

planting schemes and palettes rather more subtle and in tune with contemporary taste, though, loyally, zinnias were still grown from seed on their watch, one of Leonard's favourites. Hardly seen elsewhere, nowadays, out of fashion, like the red-hot pokers — kniphofia — that he had (and which flare up in *To the Lighthouse*, as we shall see): "…the garden is full of zinnias. The zinnias are full of slugs. L goes out at night with a lantern and collects snails, which I hear him cracking..." Virginia may have left pest control to him, but she certainly got weeding: "Very soon, in any occupation, one makes a game of it. I mean … that one gives characters to weeds. The worst is the fine grass which has to be sifted out conscientiously. I like uprooting thick dandelions and groundsel."

They had a gardener, of course. Essential for a garden that size, and more was added later when Leonard bought the adjacent field, though clearly he always weighed in much himself. A serious, substantial garden, and it was of central importance to Virginia, even if it was Leonard who was the driving force. She worked in her own writing lodge in a corner of the orchard, and her diary is full of moments of appreciation: "The great lily in the window had four flowers. They opened in the night"; "Never has the garden been so lovely … dazzling one's eyes with reds and pinks and purples and mauves"; "a blaze of dahlias." Vegetables and fruits were grown too — peas, strawberries, beans and lettuce by 1921, and the apples were harvested on an industrial scale.

Leonard's gardening style sounds to have been idiosyncratic, *sui generis*, giving license to personal taste and preference — all those hot colours. No hint of the then-current Gertrude Jekyll influence, say. Vita Sackville-West came there often, that doyenne of early-twentieth-century gardening, but there seems no evidence that she and Virginia talked gardens much, if at all. Virginia herself said that the Monk's House garden was "all Leonard's doing," and Caroline Zoob feels that she was neither knowledgeable nor technically skilled. But the essential point, for me, is that she intensely observed gardens and plants, and that she could get down to it with a will, get her hands dirty, attack the dandelions and the groundsel.

7. Look carefully at lines 1–8. Which of these is NOT correct?

Select **one** answer.

A Virginia was an author.

B Virginia gardened well into the evening.

C Virginia found weeding to be a thankless, arduous task.

D Virginia's muscles hurt the day after she gardened.

E Virginia wrote the diary entry in the spring.

8. What is the effect of the word 'chocolate' in 'chocolate earth' (line 5)?

Select all that are correct.

A It tells us that Virginia has been eating chocolate *and* gardening.

B It helps the reader imagine the rich brown colour of the earth.

C It makes us realise that there is sugar in the earth.

D It emphasises the dryness of the earth.

E It makes the earth sound appealing.

9. What is a 'hands-on gardener' (line 6)?

Select the **most accurate** definition.

A A gardener who gets involved with the physical side of gardening

B A gardener who sticks with the designing side of gardening

C A gardener who tells other people what to do in the garden

D A gardener who has a garden of their own

E A gardener who has an allotment

10. What did Virginia and Leonard's garden have in it when it became theirs?

Select all that are correct.

A National Trust land

B A toilet

C Apple trees

D Pear trees

E Plum trees

11. Select the **TWO** words that are synonyms of 'disconcertingly' in line 10.

A Unsettlingly

B Extremely

C Pleasingly

D Unnervingly

E Largely

12. How old could Virginia have been when she wrote her diary entry on the 31st of May 1920?

Select all that are correct.

A Thirty-five

B Thirty-six

C Thirty-seven

D Thirty-eight

E Thirty-nine

13. Look carefully at lines 20–27. Which of these is NOT correct?

Select **one** answer.

A Virginia hoped to have flowers blooming in the spring of 1920.

B Penelope Lively did not like calceolaria.

C Virginia objected to the aroma of calceolaria.

D Virginia and Leonard were keen gardeners.

E Virginia and Leonard grew larkspurs from seeds.

14. What are 'annuals' in line 23?

Select the **most accurate** definition.

A Plants that complete their life cycle in one year

B Plants that flower twice a year

C Books that are published once a year

D Meetings that take place once a year

E Plants that are grown from seeds

15. Which of these words from the third paragraph are religious terms?

Select all that are correct.

A Clarkia

B Pious

C Palette

D Bulbous

E Resurrect

16. Select the **TWO** words that are synonyms of 'brief' in line 30.

A Short

B Concise

C Case

D Assignment

E Mission

17. Look carefully at lines 28–44. Which of these is NOT correct?

Select **one** answer.

A Caroline worked in the garden at Monk's House.

B Caroline is an author.

C Caroline lived at Monk's house with Virginia.

D Leonard broke the shells of snails.

E Virginia and Leonard had slugs in their garden.

18. According to Penelope Lively, in what way did the Zoobs fail to replicate the garden of the Woolfs?

Select the **most accurate** explanation.

A They did not grow any plants from seed.

B They did not plant any zinnias.

C The flowers they grew were too vivid.

D The flowers they grew were not bright enough.

E They got rid of all the paths.

19. From the text, what do we know that Virginia wrote?

Select all that are correct.

A Newspaper articles

B Works of fiction

C Letters

D A diary

E Travel books

20. Which of the following are weeds?

Select all that are correct.

A Dahlias

B Dandelions

C Asters

D Geums

E Groundsel

21. Select the **TWO** most accurate words to describe Virginia.

A Observant

B Idle

C Imaginative

D Dull

E Passionless

22. What type of word is ‘current’ in line 55?

Select all that are correct.

A An adjective

B A palindrome

C A noun

D A homophone

E A verb

23. Look carefully at lines 54–62. Which of these is NOT correct?

Select **one** answer.

A Caroline did not feel that Virginia knew much about gardening.

B Virginia gave Leonard the credit for the garden at Monk’s House.

C Gertrude Jekyll knew nothing about gardening.

D Vita knew a lot about gardening.

E Virginia and Vita knew each other.

Section C

The extract below is from *This Allotment,* by Rob Cowen.

Read the extract carefully and then answer the questions that follow.

The gate would not open: deadlock.
Key stuck firmly in padlock. And me,
harried, struggling, until I was ready
to abandon the whole damn thing
before it had begun. An intervention:
someone passing with the right tools
said: *Don't fret. This happens a lot.*
You just need to know the knack.
Hands twisted with experience,
then, just like that, I was through.
Carrying all I had. Arriving in a
new place. Searching for a plot.

The setting: a patchwork of what-was
field tilting down towards beck, rising
again, to Killinghall and moor. As big a
sweep of sky as you can get. Survivor
of time and all weathers; square of
possibility, bequeathed in (good) will,
jealously overlooked by houses, roads,
backyards for being what it is: old soil.
Blessed. Left alone through centuries to
tick over to the rhythm of that old chant:
dig, turn, manure, break, plant,
water, weed, pick, rot. The soil begrudges
not the cast of beetles, worms, spiders,
frogs, slugs, snails. Or ancient ancestries
of rats and woodpigeons; it welcomes back
the time-slip kites, the fox-in-heat nights.
The frenzies of birth and death, the seeds,
yellow teeth and bones of long-ago devoured cows.
What a strange and familiar home this is, split
by its rickety barricades; conjoined by bedroom
shelves,
Seventies bathtubs, reclaimed floors, filing cabinets,

front doors. The make-do and mend philosophy
of prehistory. Enough junk to make good fences.
Enough air, space and luminous living things
to feed a family; to spark and fire the senses.

Some days a riot. Some days frozen, eerie quiet.
But a ragged tribe at work, always. A moan, nod
or 'Hello! How's it going? What've you got?
D'you want to swap?' Or some seeds going spare
that you can't refuse or pay for, or a bumper crop
left anonymously by the compost. Or a hand to lend.
And now and then, a can of beer at very end of day.
Summer sunset; a shared, looking away to the west.
Rooks; swifts scrambling up to sky nests. Today:
a woman repairing a green house, twins in tow,
humouring the old man and his unrequired advice
because she knows he's really aching for a daughter,
gone to live in Australia and there's no one home.

24. Look carefully at lines 1–12. Which of these is NOT true?

Select **one** answer.

A The narrator could not unlock the padlock.

B The narrator was feeling stressed.

C A stranger helped the narrator.

D The narrator was at an allotment.

E The narrator had been before to see their plot of land.

25. Select the **TWO** words that are synonyms of 'knack' in line 8.

A Garden

B Method

C Gate

D Door

E Technique

26. Look carefully at lines 15–17. Which language techniques are used here?

Select all that are correct.

A A simile

B A pun

C Personification

D Alliteration

E Onomatopoeia

27. Select the **TWO** words that best describe the soil of the allotment as it is described in the extract.

A Filthy

B Common

C Timeless

D Strange

E Special

28. Look carefully at lines 24–38. Which of these is NOT correct?

Select **one** answer.

A The fences between plots have been put up professionally.

B The allotments provide food for people.

C The soil is portrayed as being easy-going.

D The soil has bones in it.

E Bits and pieces make up the 'fences' between plots.

29. Which of the following are in evidence at the allotments through the behaviour of those that have plots?

Select all that are correct.

A Disdain

B Kindness

C Frugality

D Apathy

E Generosity

30. Think about the extract as a whole. Which of the following statements are true?

Select all that are correct.

A It rhymes in places.

B More than two types of birds are mentioned.

C It has more than one stanza.

D More than two types of vegetables are mentioned.

E More than three types of insects are mentioned.

Section D

Answer the following questions using BOTH extracts.

31. Select the **TWO** themes that are common to BOTH extracts.

A Marriage

B Childhood

C Nature

D Rebirth

E Envy

32. The soil in BOTH extracts is fertile. Select the **TWO** quotes that best support this statement.

A 'apples were harvested on an industrial scale' (Extract 1, line 53)

B 'field tilting down towards beck' (Extract 2, line 14)

C 'As big a sweep of sky as you can get' (Extract 2, lines 15–16)

D 'Essential for a garden that size' (Extract 1, line 45)

E 'a bumper crop left anonymously' (Extract 2, lines 43–44)

33. Which animals are mentioned in BOTH extracts?

Select all that are correct.

A Foxes

B Slugs

C Worms

D Snails

E Spiders

34. Think about BOTH extracts. Which of the following statements are true?

Select all that are correct.

A Both extracts mention weeding.

B Appearance was a priority in Monk House's garden and at the allotments.

C More than two people gardened in Monk House's garden and at the allotments.

D Both Monk House's garden and the allotments were divided into parts.

E Part of Monk House's garden and the whole of the allotments used to be a field.

11+ S.E.T. Practice Test 8 – English – Answers

Marking Guidance

For each question, the maximum number of marks available is shown.

Where questions require multiple answers and use the rubric, '**Select all that are correct**', negative marking should also be applied, whereby 1 mark is deducted for each incorrect answer selected down to 0 marks (note that the number of marks per question cannot be negative).

For example:

If a question is worth 2 marks and requires options A, B and C to be selected:

Award 2 marks for A, B **and** C selected or 1 mark for any two correct answers selected.

Award 1 mark for A, B, C **and** D **or** E selected (2 marks – 1 incorrect = 1 mark).

Award 0 marks for A, B, C, D **and** E selected (2 marks – 2 incorrect = 0 marks).

Award 0 marks for A, B and E selected or equivalent (1 mark – 1 incorrect = 0 marks).

1.	D	[1 mark]
2.	B	[1 mark]
3.	E	[1 mark]
4.	B	[1 mark]
5.	A	[1 mark]
6.	D	[1 mark]
7.	C	[1 mark]
8.	B, E	[2 marks]
9.	A	[1 mark]
10.	B, C, D, E	[3 marks]
11.	A, D (both answers must be correct)	[1 mark]
12.	C, D	[2 marks]
13.	C	[1 mark]
14.	A	[1 mark]
15.	B, E	[2 marks]
16.	D, E (both answers must be correct)	[1 mark]
17.	C	[1 mark]
18.	D	[1 mark]
19.	B, C, D	[2 marks]

20.	B, E	[2 marks]
21.	A, C (both answers must be correct)	[1 mark]
22.	A, D	[2 marks]
23.	C	[1 mark]
24.	E	[1 mark]
25.	B, E (both answers must be correct)	[1 mark]
26.	C, D	[2 marks]
27.	C, E (both answers must be correct)	[1 mark]
28.	A	[1 mark]
29.	B, C, E	[2 marks]
30.	A, B, C	[2 marks]
31.	C, D (both answers must be correct)	[1 mark]
32.	A, E (both answers must be correct)	[1 mark]
33.	B, D	[2 marks]
34.	A, C, D, E	[3 marks]

Total: **48 marks**
